Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of ICT. Everything you need is here: guidance on developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. The book shows you how to plan lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book comes with access to a companion website, [www.sagepub.co.uk/secondary](http://www.sagepub.co.uk/secondary), where you will find: - Videos of real lessons so you can see the skills discussed in the text in action - Links to a range of sites that provide useful additional support - Extra planning and resource materials. If you are training to teach ICT this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also provides examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE.

This report from the Home Affairs Select Committee cautions the Government against introducing measures which could damage the UK's thriving educational export sector. The Committee remains concerned that a number of the Government proposals could have serious unintended consequences. International students make up 10% of first degree students and over 40% of post-graduate students at UK universities. The international student

market, estimated to be worth £40 billion to the UK economy is a significant growth market and the UK is the second most popular destination in the world for international students. The Committee's findings include: the importance of the Post-Study Work route in attracting students to the UK and disagrees with the Government proposal to close it; it suggests alternatives to the Government's proposals on language requirements, specifically a permanent change to the parameters of the student visitor visa so that it can be used as a viable route for all of those attending pre-degree programmes; it supports the Government's proposals to tighten the accreditation of language schools but is concerned that Government approval of the current accreditation bodies has lapsed. The Committee calls for a single streamlined accreditation system and agrees that any cap on student visas is unnecessary and undesirable; the Committee also notes that progress has been made on closing down bogus language schools and supports the Government's intention to crack down on bogus colleges and bogus students but it is not persuaded that students are migrants, as defined by the UN and suggests that students ought to be excluded from net migration numbers. The Committee also raises concerns that the data used in assessing migration figures are not fit for purpose and could inhibit effective policy making.

'AQA Functional English' provides an exact match for the Functional Skills English specification, so you can prepare students fully for their Level 2 assessments.

Affordable VLE content for Functional Skills ICT Level 1 to Level 2, targeted at level progression and mixed ability teaching. Com-

pletely Moodle compatible, this VLE content includes a wealth of resources including activity source material, worksheets, interactive activities, and detailed tutor notes.

Comprising three Worksheet Packs and a textbook, this title is useful for the Adult Numeracy Curriculum, covering Entry Levels 1, 2 and 3 and Levels 1 and 2. All topics are clearly labelled with a curriculum reference to assist with planning.

FE and other post-16 tutors are increasingly being asked to embed and develop English and maths skills in their lessons, and the revised common inspection framework from Ofsted places an increased emphasis on this. You may lack confidence or the required background knowledge to do this, or be struggling to find ideas that will engage and motivate your learners. Specifically written for use within vocational contexts, this text provides you with a theoretical understanding of the issues involved, including barriers to learning and how to overcome these. In addition it offers a range of practical strategies and ideas to get you started and build confidence and competence in your students. Each activity is accompanied by detailed notes that highlight key learning points, the development of vocational skills and extension opportunities.

This new edition of a core undergraduate textbook for construction managers reflects current best practice, topical industry preoccupations and latest developments in courses and fundamental subjects for students. While the construction process still requires traditional skills, changes over recent decades today demand improved understanding of modern business, production and contractual practices. The authors have responded accordingly and the book has undergone a thorough re-write, eliminating some of the older material and adding new processes now considered essential to achieving lean construction. Particular emphasis is given, for example, to supply chains and networks, value and risk management, BIM, ICT, project arrangements, corporate social responsibility, training, health and welfare and environmental sustainability. Modern Construction Management presents construction as a socially responsible, innovative, carbon-reducing, manager-involved, people-orientated, crisis-free industry that is efficient and cost effective. The overall themes for the Seventh Edition are: Drivers for efficiency: lean construction underpinning production management and off-site production methods. Sustainability: reflecting the transition to a low carbon economy. Corporate Social

Responsibility: embracing health & safety, modernistic contracts, effective procurement, and employment issues. Building Information Management: directed towards the improvement of construction management systems. The comprehensive selection of worked examples, based on real and practical situations in construction management and methods will help to consolidate learning. A companion website at <http://www.wiley.com/go/MCM7> offers invaluable support material for both tutors and students: Solutions to the self-learning exercises PowerPoint slides with discussion topics Journal and web references Structured to reflect site, business and corporate responsibilities of managers in construction, the book continues to provide strong coverage of the salient elements required for developing and equipping the modern construction manager with the competencies and skills for both technical and business related areas.

Activity-based in bite-sized chunks, these engaging student books from the BTEC team support and motivate learners through the BTEC Level 1 Vocational Studies for Foundation Learning. This title focuses on BTEC Level 1 construction.

This unique and innovative Functional Skills ICT Levels 1 & 2 resource provides a comprehensive and practical guide to using technology at home, at work and in education. The book is a comprehensive and practical study guide for use in all standalone Functional Skills qualifications or as part of the GCSE, apprenticeship and diploma courses.

British Vocational Qualifications is an indispensable reference for careers advisors, human resource managers, employers, teachers and students, featuring up-to-date information on over 3,500 vocational qualifications available in the United Kingdom. These include Vocational Qualifications (VQs), National Vocational Qualifications (NVQs), Scottish Vocational Qualifications (SVQs), Related Vocational Qualifications (RVQs) and apprenticeships. The directo-

ry also covers the latest developments within the fast-changing field of vocational qualifications, and details of awarding, examining and validating bodies. British Vocational Qualifications is a simple guide for anyone who needs to understand vocational education, whether researching what is available, verifying a qualification for legal purposes, or reviewing where best to study for them. This book addresses strategies for teaching and recording achievement as well as exploring ways in which students learn. Readers are invited, through a case study approach, to consider differing student needs and how they might be served within FE.

This book provides an up-to-date, accessible and critical resource relating to contemporary issues and debates in the Lifelong Learning Sector (LLS). This comprehensive book is an essential read, intended to support the numerous modules that cover this theme and striving to encourage readers to become critical, questioning practitioners in the LLS. It offers reflective tasks which focus on key issues and debates in the lifelong learning sector today and each chapter is clearly linked to the Qualified Teacher Learning and Skills (QTLS) standards, so it will provide a practical, useful reader for trainees and staff working in the LLS. The themes that are covered are presented in an accessible yet scholarly and critical format, and are underpinned by recent research as well as policy analysis.

Affordable VLE content for Functional Skills English Level 1 to Level 2, targeted at level progression and mixed ability teaching. This Moodle compatible VLE content offers a wealth of resources in-

cluding activity source material, worksheets, interactive activities, and detailed tutor notes.

Written by the man whose signature is on millions of exam certificates, *Cheats, Choices & Dumbing Down* lifts the lid on the UK's complex exams and qualifications system. Whether you're studying for exams, or are a parent, teacher, governor or administrator, this eye-opening book will be a valuable guide. It deals with the main qualifications in the UK, including GCSE, A Level, BTEC, the Diploma, International Baccalaureate, the English Baccalaureate and other vocational and professional qualifications. Read it to find out: How to achieve the best results Whether some subjects are easier than others The truth about 'dumbing down' and educational standards What examiners are looking for - and how they decide what grade to award Why millions of exam questions are marked by non-teachers How to claim an advantage and challenge grades How people cheat - and the consequences of getting caught What the future holds for exams and qualifications

OCR Functional Skills ICT Student Book has been written to support teachers and students following the OCR Functional Skills pilot. The book is written by a well established author and supports the teaching of practical skills in ICT. - Features context-based tasks (using relevant scenarios) - Designed to build confidence using a step-by-step approach - Covers entry level 3, as well as levels 1 and 2, by differentiated tasks

Constantly evolving, Information Technology (IT) is entwined with everyday life, affecting industry, education, security, the environ-

ment, the global economy and culture. IT teachers need to balance students' understanding of IT's role within society alongside developing the skills required to design and deliver successful IT projects. Through case studies and reflective activities drawn from a range of environments, the authors share successful teaching and learning strategies from IT teachers and industry practitioners. This book also presents strategies for delivery and assessment, as well as reviewing functional and key skills, such as communications, team working and problem solving. It also helps teachers differentiate between the many IT qualifications. This text supports trainee and experienced teachers in developing exciting and engaging IT programmes for pupils 14+ whether they are learning in schools, adult and community education or colleges.
