There has been growing interest in recent years in the influence of tests on teaching and learning - a phenomenon commonly referred to as 'washback'. Despite persistent assertions about its nature and scope, empirical studies investigating test washback are still limited in number, and few of these make use of both qualitative and quantitative methods in washback research. This volume presents a study of how the introduction of the 1996 Hong Kong Certificate of Education in English - a high stakes public examination - impacted on classroom teaching and learning in Hong Kong secondary schools. The washback effect was observed initially at the larger 'macro' level, among different stakeholder groups within the Hong Kong educational context; and also at the more local 'micro' level, in terms of teachers' attitudes, teaching content and classroom interactions. This study: provides a theoretic-

cal background to the washback concept, discusses the need for empirical investigation of washback, describes the use of a mixed methodology approach in washback research, offers insights into the role of tests as agents of innovation and change in the classroom and broader educational context. This volume will be of particular relevance to language test developers and researchers interested in the consequential validity of tests; it will also be of interest to teachers, curriculum designers, policymakers and others in education concerned with the interface between language testing and teaching practices/programs. Book jacket.

The Practice of Foreign Language Teaching: Theories and Applications is a collection of essays which will appeal to teachers of modern languages no matter the level of instruction. The volume analyzes the concepts of foreign language education and multicultural competence, including the notion of the intercultural speak-

er. It also discusses the ways in which language education policy develops, by comparing the theories and purposes of foreign language education. The essays collected here highlight the various different methods and approaches in language teaching, and introduce more experienced teachers to new approaches and teaching ideas. The book will also provide language instructors with the theoretical background and practical solutions they need to decide which approaches, materials, and resources can and should be used in their L2 classrooms.

"[A] monumental editorial enterprise....It is to be commended and used widely and wisely."---ESL Magazine --

Australia has a reputation for sustained work in language policy and has had over 20 years of experience of language policy development. During these years, language policies have sought to increase and reshape languages education in Australian schools, but have had only limited success in achieving their objectives. This means that Australia's extensive work in language policy has not yet guaranteed a secure place for languages within education. After a period of comparative neglect of languages and multiculturalism, Australia is now entering a new phase of activity in language policy and it is timely to consider critically what has and has not been achieved to date and the reasons why. The aim of this book is to examine the current state, nature, role and purposes of languages in Australian education as a basis for considering a viable, encompassing language education policy. The book is divided into four specific focus areas for discussion, each of which is based on a core theme in Australian languages education: engaging with diversity; the current state of policy and participation in languages education and languages teacher education; current

orientations to languages education, and future possibilities and directions in languages education. Underlying the discussion is the recognition that at this particular juncture in languages education policy in Australia it is necessary to re-examine constructs, research, evidence and practice as the basis for renewal. The book presents a collection of papers dealing with each of the themes and aims to give greater focus to the contemporary debates around languages in education in Australia and more generally.

Foreign language teaching is social interaction, subject to the influences and forces of the societies in which it takes place. This text argues that geo-political changes have an effect on language teachers in their beliefs about their work and in the everyday methods they use in their classrooms. Based on empirical research in Denmark and England, the book explores the effects of major contemporary changes as they are perceived and understood by language teachers.

This book presents empirical research on teaching, learning and assessment, and teacher development practices in Pakistan. Despite extensive academic research conducted in Pakistan over the last decade, there is a dearth of internationally published literature on English language teaching in the country. This book covers current research priorities and initiatives concerning English language teaching, learning and assessment, empirical developments, and major professional development initiatives, both in Pakistan and involving the work of Pakistani scholars based in abroad. It highlights the impacts that development efforts are having in the ELT world in Pakistan. The respective chapters cover a diverse range of topics, including: continuous professional de-

velopment (CPD), identity construction, English language policy, curriculum development, and innovative ELT approaches and methodologies used in Pakistan. This volume provides valuable insights for TESOL and applied linguistics scholars and practitioners working in the field of ELT, both in Pakistan and elsewhere in the globalized world.

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. This book presents exchanges between scholars arguing different positions, and directs attention to the key points at issue.

Starting from the premise that each person develops a unique and personal code for communication, Christopher Brumfit ex-

amines the roles of teachers and learners and the approaches that education professionals should develop in support of learners. The book draws upon linguistic, psychological, philosophical, and sociolinguistic principles and uses practical examples from second, foreign, and mother tongue teaching. It attempts to integrate theoretical and empirical work with the practical needs of institutions and of teachers without losing sight of learners' needs for free personal choice combined with effective communication. Drawing upon the author's extensive experience in the field, it considers the roles of literature and culture, as well as language policy in relation to learners' rights, and attempts to outline a humane and realistic philosophy for language teaching.

This book, comprising two parts, is concerned with both the science and the art of foreign language teaching, with a particular, but not exclusive, focus on Asia. Under the theme of "Theoretical foundation and research", Part 1 of this book informs the readers about recent efforts in theoretical and empirical research which have had an impact on foreign language teaching or promise to yield results that will shape its future. These studies, not just from the domain of foreign language teaching but also its primary feeder disciplines of linguistics and second language acquisition, offer the necessary theoretical and conceptual foundation for both current and future research and practice. As its theme "Classroom practice and evaluation studies" suggests, Part 2 focuses on new and innovative developments in curricular and classroom practice, all built upon insights from research in the above-mentioned disciplines and poised to become standard practices. These projects include qualitative and quantitative evaluation studies which have yielded insightful data for the refinement

and continued development of the projects and their underlying theoretical concepts.

This book investigates first language (L1) and second language (L2) use in Chinese university classrooms, focusing on the experiences of four Chinese EFL teachers who were teaching non-English major students at four different proficiency levels. It examines these four teachers' actual use of L1 and L2, including the distribution of their L1 and L2 use; the circumstances, functions and grammatical patterns of their language use; and their language use across different frames of classroom discourse. It also explores their attitudes and beliefs regarding this issue in depth, as well as their own perceptions of and reasons for their language use and possible influencing factors. Through its detailed analysis of the teachers' language use, as well as their respective beliefs and decision-making techniques, this book contributes to L2

teachers' professional development and L2 teaching in general, especially with regard to establishing a pedagogically principled approach to L1 and L2 use.
