In retrospect, all martial arts are mixed, but MMA has taken on a mystique of its own in the newest wave of combative experimentation. This book presents an encompassing perspective of this phenomenon in eight chapters written by experts in the field. In their individual chapters they provide analyses of the techniques utilized during many of the leading competitive events, mainly the Ultimate Fighting Championships (UFC), and give practical "how to" instruction. This book pulls together some of the best writings published in the *Journal of Asian Martial Arts* regarding modern mixed martial arts. Daniele Bolelli uses a scholarly approach to produce two excellent chapters, as does Rhadi Ferguson with his two chapters. Bolelli provides a superb overview by analyzing 176 matches that took place between 1993 and 1999 under the UFC umbrella. He also highlights the different ways in which

grappling techniques are currently used in mixed martial arts competition. While utilizing a comprehensive approach, Dr. Ferguson zeros in on armbar and chokehold submissions to conclude just how often these were utilized in 1,263 UFC bouts. His works here can assist mixed martial arts professionals with analytical information to help them in training practices and winning strategies. What do the analyses show? Well, one thing is that all the techniques used are found in many old martial traditions. Some techniques are extremely old. Certainly cave-men used chokes. Many are from the previous millennium, as hinted by the numerous Japanese terms used since the samurai sipped sake. Fundamental techniques are discussed by Andrew Zerling and Steve Scott. Four other chapters provide insightful text and the photographic detail to present the theory and practice of the major techniques utilized by mixed martial artists: chokes, armlocks, and leg locks. Zerling offers three chapters with the precious help of his teacher, Renzo Gracie. Scott's chapter is a highly detailed piece on the cross-body armlock, giving four primary applications all will appreciate as vital to MMA practice. The eight chapters are filled with analytical text helpful for the pursuit of combat expertise. There is enough here to find of great value. But there is more. In the chapters you'll also find perspective and insight that illuminate what is occurring in the evolution of MMA competition. Read closely and you'll see that—beneath the hype—changing competitive rules and dollar amounts play a role in the outcome of championship belts and competitive crowns. We need to factor these aspects into our quest to understand the rich variety of martial traditions.

Soon after birth, tiger cubs are instinctively drawn to wrestling. Eventually their play transforms into real skills of potentially lethal efficiency. Humans have done the same. In this anthology, you will find unique combative techniques

found in some cultures as well as some techniques that are universal. Allen Pittman gives a portrayal of Dr. Tim Geoghegan's particular blend of Eastern and Western wrestling, and his formidable arsenal for grappling and throwing. In another chapter, Pittman focuses on the shoulder throw. The technical variations seem endless for this valued movement. Steve Scott illustrates the cross-body armlock according to skills he hopes will give readers a better understanding and mastery of this armlock. His following chapter shows a rare Russian technique. Known as the Kharbarelli Pick-up, it is a good example of how different cultures and their unique grappling traditions have been adopted outside their original location. The chapter on the carotid choke is presented from the perspectives of a martial arts instructor and that of a physician. The application, effects, and ramifications of drug usage and mental state are discussed in detail. Tim Cartmell explains the key concepts of "sticking and following" as they apply to throwing methods found in Chinese xingyi, taiji and bagua. The concepts are explained and illustrated with examples of sample techniques. David Allen's writes on the Mongolian Nadaam Festival. Athletes from all over the country assemble to compete in horse racing, archery, and wrestling. Mongolian wrestling is probably the least watched martial art in the world. The author's photo exposé brings the festival to us. The chapter by Burdick, Wolske and Daneshagar gives us a rare view into the Persian grappling tradition. Iran's national sport is the strength training system found in the "house of strength," where bodybuilders and wrestlers are steeped in both Zarathrushran and Islamic traditions. The following chapter by Zhang Yun is on the throwing art of Shuai Jiao. It in-

cludes: history and development, analysis of fighting principles, details of hand and footwork, body movement, training methods, training equipment, relationship with other Chinese styles, and demonstrations of applications. The final article focuses on sumo with some parallels being drawn between sumo and mixed martial arts. Techniques and tactics are presented so readers might add some of these sumo moves to their own martial arts repertoire.

Real estate investing is one of the most attractive ways of making good money (that is if you do it correct). Moreover, real estate investing is also a lot of fun. A lot of people practice real estate investing as their core profession and, in fact, make a lot of money that way. Real estate investing is really an art and, like any art, it takes time to master the art of real estate investing. The key, of course, is to buy at a lower price and sell at higher price and make a profit even after paying all the costs involved in the two (buy/sell) transactions. When you start looking for houses that you can repair and resale, you should always take your time and buy the right homes. You won't have the money, time, experience, or support to buy the bigger houses at first, which means you won't have any room for mistakes. Once you have purchased and resold a few smaller homes, you'll eventually be able to work your way up to the bigger homes - which is where the big profits will come into play. Like any form of investment, there are certainly benefits and dangers involved, and there's no difference with real estate investing. If you are interested to know more about them, then continue reading as they are discussed further in this report. In addition, you will also learn useful tips to get you started with investing in real estate.
