This book is designed to introduce designers, engineers, technologists, estimators, project managers, and financial analysts as well as students in engineering and business to strategic cost tools for project cost evaluations. The three main sections are as follows. (1) Cost Relationships, Financial Statements, and Performance Measures—This section describes the relationships between cash flows and profits; the relationships between financial statements and the Purcell Diagram; and the issues of cost estimating, time-based breakeven analysis and time-based earned schedule. (2) Tools for Economic Evaluations—This section considers the basic mathematical relations used behind the economic equations and factors; discrete and continuous interest; depreciation terms and methods; and the Present Value of Principal Approach for evaluating loans. (3) Methods

for Project Evaluation and Risk Analysis—This section considers payback periods, present worth analysis, return on investment, internal rate of return, benefit/cost ratios and positive-negative project balances; risk techniques of sensitivity analysis, optimistic-pessimistic analysis, discrete probability examples, and continuous probability models using the normal and triangular distributions.

Addressing the specific needs of engineers, scientists, and technicians, this reference introduces engineering students to the basics of marketing, human resource management, employment relations, personnel management, and financial management. This guide will help engineering students develop a sense for business and prepare them for the commercial and administrative dealings with customers, suppliers, contractors, accountants, and managers.

This book has been written specifically for the students of BCom (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

Service firms have high overhead costs which are difficult to assign to individual services. To bring transparency to their value chain, they need costing approaches that help them find their own improvements. Markus B. Baum explores current theory and practice of value chain approaches and cost accounting to develop a costing approach with a suitable instrument for the allocation of fixed and overhead costs for a service firm. He describes the service business costing (SBC) approach. This hybrid-costing model has a hierarchical structure in terms of consolidation and allocates cost and revenues on the lowest hierarchical level possible to ensure that all costs and income are assigned to activities from which they originated.

Eldenburg's fourth edition of Management Accounting combines the basic technical issues associated with cost management, management accounting and control with more recent and emerging themes and issues. Management accounting is a compulsory element of the accounting major, and this text is written to cover the content typically taught in the two management accounting units offered in most accounting programs. The Management Accounting in-

teractive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes case videos, interactive problems and questions with immediate feedback. Eldenburg's unique resource can also form the basis of a blended learning solution for lecturers.

Fundamentals of Cost Accounting provides a direct, realistic, and efficient way to learn cost accounting, integrated with new technology learning tools. Fundamentals is short (approximately 700 pages) making it easy to cover in one semester. The authors have kept the text concise by focusing on the key concepts students need to master. The Decision opening vignettes and Business Application boxes show realistic applications of these concepts throughout. All chapters conclude with a Debrief that links the topics in the chapter to the decision problem faced by the manager in the opening vignette. Comprehensive end-of-chapter material provides students with all the practice they need to fully learn each concept. McGraw-Hill Connect Accounting Plus provides students every advantage as they strive to understand the key concepts of cost accounting and its role in business. Connect Accounting Plus offers a complete digital solution with a robust online learning and homework management system, an integrated media-rich eBook, assignable end-of-chapter material, algorithmic functionality, and reporting capabilities. Contained within Connect Accounting is McGraw-Hill's adaptive learning system, LearnSmart, which is designed to help students learn faster, study more efficiently, and retain more knowledge for greater success.
