Fundamentals of Gas Reservoir Engineering: Hagoort ...

A well in a solution gas drive reservoir has a reservoir pressure of 4000 psia. A single test point is $q_o = 200$ STB stock tank barrels /day with $p_{wf} = 3220$ psia. Substituting the data in the IPR equation and solving for q_{max} gives Substituting the calculated q_{max} and the given p_R in the equation calculates points on the IPR, as follows:
