Frustrated by a regime of statutory testing, and keen for a midlife adventure, Sue Cowley and her partner decided to step out of the system, and set off on the educational adventure of a lifetime with their children. Road School is the story of their family's adventures around Europe and across China, and what they learned along the way. Part comedy travelogue, part parenting guide, part educational philosophy, Road School asks you to consider what 'an education' really means and offers tips for anyone planning their own learning adventure. As a parent in the UK, you must make sure that your child has a full time education, once they are of compulsory school age. However, this education does not have to take place in a school.

A growing number of parents are finding that home educating, or 'unschooling', either permanently or on a short term basis, is a viable and attractive option. The national curriculum, benchmark tests and exams serve to reinforce the idea that there is a specific set of knowledge which equates to 'an education'. However, when you are home educating, it is entirely up to you what and how you wish to teach your children. Or, rather, what and how you wish your children to learn. You might choose to include part or everything that is in the national curriculum, or you might not. Sue's family found that one of the best things about Road School was the freedom to follow their interests. Sue offers plenty of advice based on the lessons her family learned on their Road School adventure, such as: take into account how learning can happen simply by visiting a place and exploring it. Don't feel that you always have to formalise your visit by turning it into a 'lesson'. The experience of going somewhere can be memorable and educational in its own right. Much of what your children will learn on the road is social and emotional rather than

intellectual. They learn how to cope, how to adapt, how to be resilient and how to be brave. The challenges and difficulties that you face on the road will teach them all these things without any direct 'teaching' needed at all. Involve your children in making decisions about the content of their curriculum, particularly when it comes to choosing topics or themes. What would they most like to study during your learning journey together? You can teach subjects such as English or history through cross-curricular 'themes' rather than as discrete lessons. Ask your children to decide which topics interest them the most and capitalise on those. One of the great things about educating your child yourself is that you get to learn alongside them. Not only do you provide a model of lifelong learning, but it's also very liberating to learn new things as an adult. Remember that teaching is not the same thing as learning. You don't have to teach your children directly for a set number of hours each day in order to educate them. Learning can take place all the time, and anywhere, rather than just during 'school' hours. It doesn't matter what time

of the day or day of the week it is - if there is learning happening, then your child is being educated. Contents include: England, English Lessons, Stepping Out of the System, The Netherlands, Dutch Lessons, The Practicalities, Germany, German Lessons, Cultural Literacy, Italy, Italian Lessons, An Education, Portugal, Portuguese Lessons, Travelling with Children, France, French Lessons, Pussycat Parenting, China, Chinese Lessons, A Road School Curriculum.

Is teaching an art, rather than a science? Instead of measuring education and reducing everything to data, what if we looked at it through the lens of the arts? Sue Cowley demonstrates how teachers can become artists, sculptors, actors, dancers, musicians, playwrights, poets, designers and directors, no matter which subject or age group they happen to be teaching. The artful educator paints the air with ideas and weaves magic with words. They aren't afraid of a little risk, or of planning and delivering lessons a little differently. Learn how to be more creative, experimental, playful and imaginative in the methods you use to manage your classroom, and in the myriad

ways in which you help your students to learn. Discover what an 'artful attitude' to education looks like, with plenty of practical, real-life ideas for artful teaching and learning. Sue has collected inspiring examples of how colleagues in a range of settings, from early years to secondary and further education, are already using artful approaches in their classrooms. Find out how to engage with your artful side, reinvigorate your approach to teaching and inspire yourself and your children with the pure joy of learning. Getting artful can involve borrowing techniques from the arts to use in teaching, getting learners hands-on with creating artworks themselves and also engaging learners with great existing works of art, cultivating the cultural capital that comes from this in the process. A collection of suggestions designed to inspire you to take creative risks with your learners, this is a book for explorers and rebels. An ideal resource for trainees, NQTs and experienced teachers alike, *The Artful Educator* is for anyone looking for inventive, innovative approaches to teaching.

Using clear examples, tried and tested in some of the most challenging classrooms in inner city schools, the book offers practical and honest advice on both the difficulties and rewards that can be gained when employing all forms of talk-based teaching in the classroom. Packed with real examples of successful talk based lessons with children of all abilities and needs, this book will show teachers how they can

succeed in overcoming problems of disruption and engage even the most difficult pupils in real learning through talk. The book shows that bringing the child's individual experience into a lesson through talk has huge emotional and psychological benefits – this can be particularly marked in classrooms where there are low levels of literacy, behaviour issues or where pupils' first language is not English. and its verve." Nick Hytner Drama teaching is at a critical juncture. With new qualifications in the market, changes in government approach to the arts in education and hundreds of thousands of students wanting to be part of the country's hugely successful performing arts industry, the pressures on drama teachers are enormous. ing to design their own creative curriculum to understand how students learn.
