Transnational Marketing and Transnational Consumers are becoming increasingly common in today's globalizing and fast moving world of business. This book presents a fresh perspective focusing on the transnational character of organizations and firms while underlining the importance of the transnationality of marketing strategies for success. At the same time, it introduces the novel concepts of Transnational Consumers and Transnational Mobile Consumers which take into account the increasing human mobility and its implications for marketing success. This book gives flesh to the ever popular shorthand "glocal" referring to strategies thinking globally but acting locally. This is the reality of current business environment where the norm is fast mobility of goods, services, finance, and consumers. The book is highly recommendable for both academics and practitioners in International Marketing. Svend Hollensen University of Southern Denmark Author of 'Global Marketing' (Pearson)

Essay from the year 2007 in the subject Communications - Intercultural Communication, grade: 1,0, University of Newcastle upon Tyne, course: Language and Cross-Cultural Communication, language: English, abstract: The world is growing together. In the wake of globalization many companies have expanded their markets to countries around the world. No matter if in Europe, America, Africa, Asia or Australia - everywhere we are greeted by the familiar corporate logos of global players like Coca Cola, McDonald's and Burger King. I would like to suggest that an important factor of the international success of these companies are specialised marketing concepts, which are based on the individual culture of the respective target country. Intercultural communication seems therefore an important element in marketing products worldwide. In this essay, I will have a look at a company whose name has become synonymous with globalization: McDonald's. The development of the term "McDonaldization" shows that the company's strategy of efficiency, calculability, predictability and control is effective around the globe (Ritzer in Usunier 2000; Jandt 2004).

It is discussed to which extent the company choses to standardise or adapt certain areas of its marketing mix across international markets. Furthermore, different internationalisation strategies are explained and the internationalisation process undertaken by NIVEA is analysed. The paper concludes by evaluating

the country of origin effect in case of NIVEA and how it influences consumer brand perception. Addresses the impact on international marketing of major trends in the external and internal environment of the firm: technology-enabled international marketing research, global account management, procurement and international supplier networks, internationalization of small and entrepreneurial firms, and outsourcing and offshoring.

Essay from the year 2007 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 1,0, Northumbria University, 32 entries in the bibliography, language: English, abstract: L'ORÉAL considers whether it should endorse its skin care products in the international markets and strengthen its international brands by using a celebrity. They further need advice regarding a standardised or adapted "product offering" and promotion campaign. This report will first give an overview of major cultural issues which l'Oréal might encounter in the international market place when implementing a standardised international marketing strategy. It will be then further investigated if these cultural issues will impinge on the suitability of celebrities to promote l'Oréal clients brands while addressing the aspects of local and global branding and promotion. At the very end, guidelines will be identified as to how to find the most fitting celebrity and a possible endorser for its products will be introduced.

The rapidly changing context of the modern tourism and hospitality industry, responding to the needs of increasingly demanding consumers, coupled with the fragmenting nature of the marketing and media environment has led to an increased emphasis on communications strategies. How can marketing communication strategies meet the changing and challenging demands of modern consumers, and maintain a company's competitive edge? Marketing Communications in Tourism and Hospitality: concepts, strategies and cases discusses this vital discipline specifically for the tourism and hospitality industry. Using contemporary case studies such as South African Tourism, Travelocity and Virgin Trains, it explains and critiques the practice and theory in relation to this industry. Combining a critical theoretical overview with a practical guide to techniques and skills, it illustrates the role that communications play in the delivery and representation of hospitality and tourism services, whilst developing practical skills needed to understand, interpret and implement communications strategies within a management context. This systematic and cohesive text is essential reading for hospitality management students, and an invaluable resource for marketing practitioners in this growing area.

The fourth edition of 'International Marketing' provides a complete introduction to international marketing in the 21st century.

This comprehensive textbook considers all of the key business, management and technical issues of e-Business, examining and explaining how technologies can help organizations in both the public and private sectors conduct business in new ways. After addressing the changing nature of the e-Economy and the impact of the dot.com 'bubble' of the late 1990s, Eckersley, Harris and Jackson go on to analyse key software developments and the impact these have had on organizational practices. They then outline the legal and ethical frameworks of e-Business, and consider how companies use various e-commerce tools to enter new markets. Finally, they trace the progress public sector organizations have made in adopting e-Business practice. This is an accessible, jargon-free and focused textbook that offers readers both a technical and managerial overview of the issues surrounding e-Business. It uses illustrative cases and discussion questions to help students and ma-

nagers in organizations not only to familiarize themselves with e-Business but also to equip themselves with the skills to challenge and analyze the changing business environment.

In this book, the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of "price theory" and "price policy," the authors coined the term "price management" to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, pretium, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research, consulting, and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a "bible" for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students alike. Praise for Price Management "This book is truly state of the art and the most comprehensive work in price management." - Prof. Philip Kotler, Kellogg School of Management, Northwestern University "This very important book builds an outstanding bridge between science and practice." - Kasper Rorsted, CEO, Adidas "This book provides practical guidelines on value creation, communication and management, which is an imperative for businesses to survive in the coming era of uncertainty." - Dr. Chang-Gyu Hwang, Chairman and CEO, KT Corporation (Korea Telecom)

What is transparency? What does it do? How much of it do we need, and for what purpose? Seminar paper from the year 2001 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: A, Heriot-Watt University Edinburgh, course: International Marketing, language: English, abstract: Reasons for the Internationalisation Process of Companies I.) Introduction "Global interdependence is pervasive. It is not only political and military.... but] also environmental.... Perhaps the most important aspect of interdependence however is economic." (Terpstra, 1993, Preface) Today more and more firms operate internationally and in some cases even globally. In almost all major economies of the world, the significance of domestic and/or foreign-based transnational corporations is increasing. Such corporations, directly or indirectly, account for a large part of world trade in goods and services (cf. Nilsson, Dicken 1996 p.1). Attempts to theorise such international developments are widespread; therefore, there is no

such thing as a "universal" theory. However, the emphasis of most theories tends to be on how businesses should internationalise rather than on why they should do so. Most contributions in literature focus on strategies and structures of international firms but do not explain the reasons of internationalisation. The main aim of this essay is therefore to give an outline of the reasons why companies choose to go international. Using only relevant theories and different examples from business, it shall be demonstrated that there is not only "one" motive for companies to choose international expansion but that there is a variety of causes depending on the respective internal and external environment of the different companies. In the following, under II.) there will be an overview of different reasons for companies to choose international expansion; these reasons will be substantiated by different statements and theories from literature and in each case illustrated by relevant examples. Under III.) finally, t

This book analyzes the current Islamic marketing environment. Since the Muslim world is extremely diverse in terms of economic development, customs and traditions and political and legal systems, it is vital for companies and marketers to analyze the environment before attempting to address these markets. The author emphasizes that it is ineffectual to elaborate the distribution and promotion strategies if the market does not exist in terms of purchasing power or demographics, if potential consumers do not believe that products and services answer their needs and demands or if there are political and legal barriers to companies wanting to enter these markets. The book offers detailed insights into the economic, socio-cultural, and politico-legal environment in the Muslim world, which are essential for marketers to understand and form the foundations of effective marketing strategies.

Seminar paper from the year 2018 in the subject Business economics - Business Management, Corporate Governance, grade: A, Kenyatta University, language: English, abstract: This paper aimed at exploring the competitive strategy of Adidas and growth opportunities that the company can take advantage of. Strategy is very important to the success and sustainability of any company. It involves understanding of the company's core capabilities, weaknesses, risks it faces and strengths and using them to design a sustainable competitive strategy. The paper begins by exploring how the main competitors in the sporting goods industry; Adidas and Nike used various strategies to survive and sustain their positions in the market. Both companies focused on broad differentiation. However, Adidas focused on design innovation, cost advantages, speed of production and enhancing attractiveness of its products. Nevertheless, Nike remains to be the market leader in sport footwear and apparel industry. To challenge Nike's position, Adidas must strive to penetrate Nike main market of North America, develop new markets in the emerging economies and while putting more investments in product and process innovations. The author also found that the company can consider strategic partnerships and greater use of technological applications such as CRM systems to enhance its competitiveness.
