The sixteen labs in the Exploring Environmental Problems Lab Manual provide two types of labs: Calculator-Based Labs and Global Positioning System (GPS) labs. The lab problems reinforce environmental concepts presented in the textbook, but they can be used in conjunction with any other high school Earth science text.

Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere; the evolution of landforms; patterns of change that cause weather; the scale and structure of stars; and the interactions that occur among the water, atmosphere, and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy, and oceanography. - p. 8-9.
