Cognitive English Grammar is designed to

be used as a textbook in courses of English and general linguistics. It introduces the reader to cognitive linguistic theory and shows that Cognitive Grammar helps us to gain a better understanding of the grammar of English. The notions of motivation and meaningfulness are central to the approach adopted in the book. In four major parts comprising 12 chapters, *Cognitive English Grammar* integrates recent cognitive approaches into one coherent model, allowing the analysis of the most central constructions of English. Part I presents the cognitive framework: conceptual and linguistic categories, their combination in situations, the cognitive operations applied to them, and the organisation of conceptual structures into linguistic constructions. Part II deals with the category of 'things' and their linguistic structuring as nouns and noun phrases. It shows how things are grounded in reality by means of reference, quantified by set and scalar quantifiers, and qualified by modifiers. Part III describes situations as temporal units of various layers: internally, as types of situations; and externally, as located relative to the time of speech and grounded in reality or potentiality. Part IV looks at sit-

uations as relational units and their structuring as sentences. Its two chapters are devoted to event schemas and space and metaphorical extensions of space. *Cognitive English Grammar* offers a wealth of linguistic data and explanations. The didactic quality is guaranteed by the frequent use of definitions and examples, a glossary of the terms used, overviews and chapter summaries, suggestions for further reading, and study questions. An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the pheno-

menon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima Porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 *The Battle of Sedan*, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul

Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

Current research within the framework of Construction Grammar (CxG) has mainly adopted a theoretical or descriptive approach, neglecting the more applied perspective and especially the question of how language acquisition and pedagogy can benefit from a CxG-based approach. The present volume explores various aspects of "Applied Construction Grammar" through a collection of studies that apply CxG and CxG-inspired approaches to relevant issues in L2 acquisition and teaching. Relying on empirical data and covering a wide range of constructions and languages, the chapters show how the cross-fertilization of CxG and L2 acquisition/teaching can improve the description of learners' use of constructions, provide theoretical insights into the processes underlying their acquisition (e.g. with reference to inheritance links or transfer from the L1), or lead to novel teaching practices

and resources aimed to help learners make the generalizations that native speakers make naturally from the input they receive.

The "genetic bomb" marks a turn in the history of humanity. The accident is a new

form of warfare. It is replacing revolution and war. Sarajevo triggered the First World War. New York is what Sarajevo was. September 11th opened Pandora's box. The first war of globalization will be the global accident, the total accident, including the accident of science. And it is on the way. In 1968, Virilio abandoned his work in oblique architecture, believing that time had replaced space as the most important point of reflection because of the dominance of speed. We were basically on the verge of converting space time into space speed... Speed facilitates the decoding of the human genome, and the possibility of another humanity: a humanity which is no longer extra-territorial, but extra-human. *Crespuscular Dawn* expands Virilio's vision of the implosion of physical time and space, onto the micro-level of bioengineering and biotechnology. In this cat-and-mouse dialogue between Sylvere Lotringer and Paul Virilio, Lotringer pushes Virilio to uncover the historical foundations of his biotech theories. Citing various medical experiments conducted during World War II, Lotringer asks whether biotechnology isn't the heir to eugenics and the "science for racial improvement" that the Nazis enthusi-

astically embraced. Will the endocolonization of the body come to replace the colonization of one's own population by the military? Both biographical and thematic, the book explores the development of Virilio's investigation of space (architecture, urbanism) and time (speed and simultaneity) that would ultimately lay the foundation for his theories on biotechnology and his startling declaration that after the colonization of space begins the colonization of the body.

A guide to understanding the Greeks which takes an insightful, irreverent look at their character and attitudes "Xenophobia: an irrational fear of foreigners, probably justified, always understandable." "Xenophobe's Guides: an irreverent look at the beliefs and foibles of nations, almost guaranteed to cure Xenophobia." Individuality is the chief feature that characterizes the Greeks, which precludes any attempt to box and label them as a people. After that comes their temperament which flourishes uninhibited throughout their waking hours. This is probably why the ancient sages saw fit to carve their maxims "Nothing in excess" and "Know thyself" on the portals of the Delphic Oracle in an attempt to persuade their fellow Greeks to curb their emotionsthey were not heeded then any more than they are now."

Early this century Enrico, a young intellec-

tual, leaves the abundantly diverse Austro-Hungarian city of Gorizia to spend several years living on the Patagonian pampas, alone with his ancient Greek texts, his flocks and every now and then a woman. He has been taught by his closest friend, Carlo, a philosopher/poet who commits suicide in his early twenties, to search for an authentic life, free of social falsehoods. But in his search for this unattainable goal, Enrico destroys every chance he has of a normal existence; even after his return to a life of isolation by the Istrian seashore, his attempts at human intercourse, are thwarted. In recounting the life of Enrico, Magris paints a remarkably shrewd picture of a whole world in ferment, that of the decaying Austro-Hungarian empire, shaken to its foundations by the Great War, and emerging from the German occupation and the Communist revolution ripe for disintegration and forever seeking, as does Enrico, for a reason to go on living.

In the last 25 years foreign language teaching has been able to increase its efficiency through an orientation towards authentic language materials, pragmatic language functions and interactive learning methods. However, so far foreign language teaching has lacked a sufficiently strong theoretical framework to support the teach-

ing of language in all its aspects. Arguably, such a linguistic theory has to be usage-based and cognition-oriented. Since cognitive linguistics - and especially cognitive grammar - is concerned with conceptual issues against the larger background of human cognition and because it is based on actual language use, it becomes a powerful tool for dealing adequately with the main issues of a pedagogical grammar. A pedagogical grammar aims at providing all the essential linguistic patterns considered relevant by theoretical and descriptive linguistics for the preparation of teaching materials and their exploitation in foreign language instruction. The volume contains thirteen contributions organized into three parts. In Part 1 Langacker, Taylor and Broccias introduce the basic grammar concepts, rules and models that are available in cognitive linguistics and which are directly relevant to the construction of a pedagogical grammar. Meunier, on the other hand, describes how such a grammar could benefit from corpus linguistics. Part 2 looks at some cognitive tools and conceptual errors with contributions by Danesi and Maldonado and also reconsiders contrastive analysis in the papers by Ruiz de

Mendoza and Valenzuela & Rojo. Part 3, finally, discusses language-specific constraints on a number of linguistic phenomena such as the construal of motion events (papers by Cadierno and De Knop & Dirven), distinctions in the tense-aspect system (papers by Niemeier & Reif and Schmiedtová & Flecken), and voice (Chen & Oller).
