Growth Control in Woody Plants by Theodore T. Kozlowski

Theodore T. Kozlowski, Stephen G. Pallardy, in *Growth Control in Woody Plants*, 1997. Introduction. Woody plants undergo their greatest mortality risk when they are in the ungerminated embryo stage of seed development and in the cotyledon stage of seedling development (Kozlowski, 1979, 1995). Hence, natural regeneration of many communities of woody plants depends on environmental conditions that ...
