### **Periodontal Treatment Plans for Older Adults**

Patient management during therapy may include the administration of intravenous conscious sedation. The goals of periodontal therapy are to preserve the natural dentition, periodontium and peri-implant tissues; to maintain and improve periodontal and peri-implant health, comfort, esthetics, and function.

### **Clinical Guidelines for the treatment of Periodontitis ...**

### **Guideline for Periodontal Therapy - AAPD**

A panel of experts convened by the American Dental Association (ADA) Council on Scientific Affairs presents an evidence-based clinical practice guideline and systematic review on nonsurgical treatment of patients with chronic periodontitis by means of scaling and root planing (SRP) with or without adjuncts. For patients with chronic periodontitis, SRP showed a moderate benefit, and the benefits were judged to outweigh potential adverse effects.

Treatment may be performed by a periodontist, a dentist or a dental hygienist. The goal of periodontitis treatment is to thoroughly clean the pockets around teeth and prevent damage to surrounding bone.

The adjunctive use of host modulators in non-surgical periodontal therapy. A systematic review of randomized, placebo-controlled clinical studies Nikolaos Donos

### EBD: Nonsurgical Treatment of Chronic Periodontitis

AAP treatment guidelines stress that periodontal health should be achieved in the least invasive and most cost-effective manner. This is often accomplished through non-surgical periodontal treatment. Non-surgical periodontal treatment does have its limitations. When it does not achieve periodontal health, surgery may be indicated to restore periodontal health.

Abstract. The American Academy of Periodontology offers the following Guidelines for Periodontal Therapy. These guidelines are intended to fulfill the Academy's obligation to the public and to the dental profession to set forth the clinical objectives and scope of periodontal therapy. They also are designed to give guidance to state legislatures and agencies that regulate the practice of periodontology and should be considered in their entirety.

### **Perio Workshop 2019 draws up new guideline on periodontal ...**

CHICAGO — Dentists treating patients with chronic periodontitis, a severe form of gum disease that can lead to tooth loss, are advised to use scaling and root planing (SRP), deep cleaning of the teeth, as initial treatment, according to new guidelines from the American Dental Association (ADA). The guidelines, based on a systematic review and meta-analysis of treatment of periodontitis, were published in the July issue of the Journal of the American Dental Association (JADA).

Scaling and root planing (SRP) is still considered the gold standard for non-surgical therapy to address periodontal disease.
