Iaido is the classical Japanese discipline of drawing and cutting with the long sword in defence of an unanticipated attack, throwing off the blood and returning the sword to its sheath. It is the direct inheritor of techniques perfected by centuries of samurai whose life and honour depended upon their spirit and prowess. Author Richard W Babin brings together all the practical and theoretical information needed to pursue a formal study of the classical Japanese martial art of Iaido. You will learn how to choose a sword, how to cut with it, how to take care of it, how to assume the clothing and how to enter a dojo. He covers not only the basic moves and positions, but the entire curriculum of forms of the *Muso Shinden Ryu* of Iaido. Equally important, he puts the art in its historic and social perspective, helping to clarify for the reader the spiritual pathway that the way of the sword offers.

This highly topical book is an original contribution to the current literature on counter-terrorist financing, compliance and soft law. Specifically, the book focuses on Financial Action Task Force recommendations and counter-terrorism financing legislation. This thought-provoking investigation demonstrates that an understanding of the counter-terrorism financing regime can shed light on the departure from regular international law-making processes, and on the emerging forms of international governance in an era of globalisation. An understanding of the regime's multi-layered approach shows how this can be replicated as a tool in the prevention and resolution of conflict and the promotion of international justice in areas such as human trafficking, drug trafficking, and weapons of mass destruction. This book will be an invaluable resource for those studying and researching in law, terrorism studies, criminal justice and finance, in particular comparative law and compliance with hard and soft law. It will also be relevant to policymakers and practitioners working in counter-terrorism.

"The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine. It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period.

It is hoped that the following historical account of the discovery, partial utilization, and almost complete extermination of the great American bison may serve to cause the public to fully realize the folly of allowing all our most valuable and interesting American mammals to be wantonly destroyed in the same manner. The wild buffalo is practically gone forever, and in a few more

years, when the whitened bones of the last bleaching skeleton shall have been picked up and shipped East for commercial uses, nothing will remain of him save his old, well-worn trails along the water-courses, a few museum specimens, and regret for his fate. If his untimely end fails even to point a moral that shall benefit the surviving species of mammals which are now being slaughtered in like manner, it will be sad indeed. Although *Bison americanus* is a true bison, according to scientific classification, and not a buffalo, the fact that more than sixty millions of people in this country unite in calling him a "buffalo," and know him by no other name, renders it quite unnecessary for me to apologize for following, in part, a harmless custom which has now become so universal that all the naturalists in the world could not change it if they would.

"China is in the midst of breakneck transformation. The last 30 years of astonishing economic growth and political and cultural reform are driven by the urbanization processes which are remaking the world today. But the new China is now halfway built: within the next 30 years the world's most populous nation will most likely take center-stage as global superpower, with hundreds of millions of new urbanites flooding into rapidly swelling cities. But this urban boom? presenting no less than the construction of a new society? is taking place almost without time to think. The present is so all-consuming that fast realities threaten to eclipse the slow dream of tomorrow. Taking as its starting

point the goal announced in China in 2001 to build 400 new cities of 1 million inhabitants each by 2020, or 20 new cities a year for 20 years, the book explores the hopes and hazards of dreaming on such a scale. The question being asked is in fact no less than how to build a new utopia. But is China mortgaging its present for a promised future, and doing so at the same time that current speeds of construction eclipse any real forward planning? The Chinese Dream is a visual tour de force, both encyclopedic in scope

and holistic in approach. Cutting across all levels of scale? from individual to nation? and backed by a truly multi-disciplinary team (encompassing architecture & urban planning, politics, economics, arts & culture, environmental concerns, and sociology) the book synthesizes a vast body of research to tackle the big questions of today, and to unpack the paradoxes at the heart of China's struggle for change."--Publisher's website
