"My name is Nyah and I'm a hacker. I know things most people would never believe. Things that shouldn't exist, but do."

New York Times bestselling author Ted Dekker brings an exotic tale of adventure and creates his most memorable character ever. The story of how I, Julian Carter, and my precious two-year old son, Stephen, left Atlanta Georgia and found ourselves on a white sailboat, tossed about like a cork on a raging sea off of Australia's northern tip in 1963, is harrowing. But it pales in comparison to what happened deep in the jungle where I was taken as a slave by a savage tribe unknown to the world. Some places dwell in darkness so deep that even God seems to stay away. There, my mind was torn in two by the gods of the earth. There, one life ended so another could begin. Some will say I was a fool for making the choices I made. But they would have done the same. They, too, would have embraced death if they knew what I knew, and saw through my eyes. My name is Julian and this is my story. But more, it is the story of my son who was born to change the world. From deep in the impenetrable jungles where New York Times bestselling author Ted Dekker was born and raised, comes **OUTLAW**, an epic adventure of two worlds that perhaps only he could write. Full of harrowing twists, sweeping violence, and wild love, *Outlaw* takes us beyond the skin of this world to another unseen.

New York Times bestselling author Ted Dekker delivers the gripping story of Maviah, a slave who becomes a queen in Arabia, A.D. 33. They call her the Queen of the Outcasts. Maviah, a woman whose fate was sealed on her birth by this world-unwanted, illegitimate, female, a slave-subject to the whims of all. But then she met a man named Yeshua who opened her eyes. She found strength in his words, peace from the brutal word around her. Because of what he taught her, she has gathered her own traveling kingdom of outcasts deep in the desert, wielding an authority few have seen. But when her growing power threatens the rulers around her, they set out to crush all she loves, leaving her reeling as a slave once more. She must find Yeshua to save her people, but when she does, she will be horrified to discover that he faces his own death. Enter a story full of intrigue, heart-wrenching defeat, uncompromising love and staggering victory—one that re-examines everything you thought you knew about the heart of Jesus's stunning message and the power that follows for those who follow his easily forgotten way.

Alice Snow, a thirteen-year-old orphan, is abducted from her adopted home by a strange man claiming that her real mother is alive, and a frantic FBI manhunt ensues.

An analysis of the invasion of our personal lives by logo-promoting, powerful corporations combines muckraking journalism with contemporary memoir to discuss current consumer culture

A sweeping epic set in the harsh deserts of Arabia and ancient Palestine. A war that rages between kingdoms on the earth and in the heart. The harrowing journey of the woman at the center of it all. Step back in time to the year of our Lord...A.D. 30. The outcast daughter of one of the most powerful Bedouin sheikhs in Arabia, Maviah is called on to protect the very people who rejected her. When their enemies launch a sudden attack with devastating consequences, Maviah escapes with the help of two of her father's warriors--Saba who speaks more with his sword than his voice and Judah, a Jew who comes from a tribe that can read the stars. Their journey will be fraught with terrible danger. If they can survive the vast forbidding sands of a desert that is deadly to most, they will reach a brutal world subjugated by kings and emperors. There Maviah must secure an unlikely alliance with King Herod of the Jews. But Maviah's path leads her unexpectedly to another man. An enigmatic teacher who speaks of a way in this life which offers greater power than any kingdom. His name is Yeshua, and his words turn everything known on its head. Though following him may present even greater danger, his may be the only way for Maviah to save her people--and herself.

Grizz Brickbottom, toughest cowboy in the West, yearns for a companion and convinces his cattle-rustling cohorts that they need a dog to help with the work.

Collects three novels that begin in Paradise, Colorado with a man cloaked in black and possessing the power to grant unfulfilled dreams.

Attempting to rescue two worlds from collapse, Thomas Hunter races to stop a virus unleashed by terrorists, as he also commands an army of primitive warriors fighting for their survival.

During the apocalypse, Thomas Hunter enters the Black Forest when armies begin to gather for the final battle in the valley of Migdon, and changes the course of history.

"A rollicking history of the telephone system and the hackers who exploited its flaws." —Kirkus Reviews, starred review Before smartphones, back even before the Internet and personal computers, a misfit group of technophiles, blind teenagers, hippies, and outlaws figured out how to hack the world's largest machine: the telephone system. Starting with Alexander Graham Bell's revolutionary "harmonic telegraph," by the middle of the twentieth century the phone system had grown into something extraordinary, a web of cutting-edge switching machines and human operators that linked together millions of people like never before. But the network had a billion-dollar flaw, and once people discovered it, things would never be the same. Exploding the Phone tells this story in

full for the first time. It traces the birth of long-distance communication and the telephone, the rise of AT&T's monopoly, the creation of the sophisticated machines that made it all work, and the discovery of Ma Bell's Achilles' heel. Phil Lapsley expertly weaves together the clandestine underground of "phone phreaks" who turned the network into their electronic playground, the mobsters who exploited its flaws to avoid the feds, the explosion of telephone hacking in the counterculture, and the war between the phreaks, the phone company, and the FBI. The product of extensive original research, *Exploding the Phone* is a groundbreaking, captivating book that "does for the phone phreaks what Steven Levy's *Hackers* did for computer pioneers" (Boing Boing). "An authoritative, jaunty and enjoyable account of their sometimes comical, sometimes impressive and sometimes disquieting misdeeds." —The Wall Street Journal "Brilliantly researched." —The Atlantic "A fantastically fun romp through the world of early phone hackers, who sought free long distance, and in the end helped launch the computer era." —The Seattle Times

When Trent McCauley's obsession for making movies by reassembling footage from popular films causes his home's internet to be cut off, it nearly destroys his family. Shamed, Trent runs away to London. A new bill threatens to criminalize even harmless internet creativity. Things look bad, but the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds...

Normally, Wes Grayson would have been attracted to the striking woman with the camera. But this woman has clearly been stalking Amy, his adoptive daughter and the center of his life. And a threat to Amy is a threat to Wes. Laney Fields has no desire to threaten anyone, just a longing to see the child she'd brought into the world six years ago and then been forced to release for adoption. But when she learns that Amy's adoptive mother has died, Laney becomes determined to play a part in her daughter's life. Between a man and woman torn by past losses, present fears, and the paradox of their growing fascination for each other, stands one small child. She could be the object of distrust that will drive them apart or the agent of faith in God that can bring them together.

As foretold by ancient prophets, an apocalypse destroyed Earth during the twenty-first century. But two thousand years later Elyon set upon the earth a new Adam. This time, however, he gave humanity an advantage. What was once unseen became seen. It was good and it was called...Green. But the evil Teeleh bided his time in a Black Forest. Then, when least expected, a twenty-four year old named Thomas Hunter fell asleep in our world and woke up in that future Black Forest. A gateway was opened for Teeleh to ravage the land. Devastated by the ruin, Thomas Hunter and his Circle swore to fight the dark scourge until their dying death. That was then. Now the Circle has lost all hope. And Samuel, Thomas Hunter's cherished son, has turned his back on his father and is aligning dark forces to wage the final war. Thomas is crushed--but determined to rescue the Circle and his son even if he has to cross two worlds to do so.

In *Hacking Cyberspace* David J. Gunkel examines the metaphors applied to new technologies, and how those metaphors inform, shape, and drive the implementation of the technology in question. The author explores the metaphorical tropes that have been employed to describe and evaluate recent advances in computer technology, telecommunications systems, and interactive media. Taking the stance that no speech is value-neutral, Gunkel examines such metaphors as "the information superhighway" and "the electronic frontier" for their political and social content, and he develops a criti-

cal investigation that not only traces the metaphors' conceptual history, but explicates their implications and consequences for technological development. Through *Hacking Cyberspace*, David J. Gunkel develops a sophisticated understanding of new technology that takes into account the effect of technoculture's own discursive techniques and maneuvers on the actual form of technological development.

**ONE THING CONNECTS EYES WIDE OPEN, WATER WALKER, AND HACKER—THEY CALL HIM OUTLAW.** It all begins with Christy Snow in *Eyes Wide Open*: seventeen, buried alive in a coffin, and about to die. Is what she's experiencing real? Or is she suffering a delusional breakdown? In *Water Walker*, Alice Ringwald is a thirteen-year-old orphan suffering from amnesia. She is still adjusting to her new life when suddenly she is kidnapped by a strange man. Finally, in *Hacker*, skilled computer expert Nyah Parks is using her technical knowledge to get money for her mom's life-saving medical treatment. When Nyah cracks the wrong firewall, it's not just her mother's life that is in danger. Nyah is forced into one last hack that will either save her or kill her. Humming with intensity, *The Outlaw Chronicles Trilogy* is a raw adrenaline rush from the first page to the last from master of suspense Ted Dekker. .

Living in Los Angeles in the early 1970s, real-estate dealer Stephen Friedman becomes hungry for answers after he discovers a deceased woman's papers that indicate she owned a priceless religious relic, and that she may have been his mother.

From the author of the New York Times bestseller *The Inevitable*— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Two stranded couples find shelter in an inn but find themselves trapped in a game with rules setting up a life-or-death situation.

Some say the great mystery of how one can live in two worlds at once died with Thomas Hunter many years ago. Still others that the gateway to that greater reality was and is only the stuff of dreams. They are wrong. In the small town of Eden, Utah, a blind girl named Rachelle Matthews is about to find out just how wrong. When a procedure meant to restore Rachelle's sight goes awry, she begins to dream of another world so real that she wonders if Earth might only be a dream experienced when she falls asleep in that reality. Who is a simple blind girl to have such strange and fantastic dreams? She's the prophesied one who must find and recover five ancient seals--in both worlds--before powerful enemies destroy her. If Rachelle succeeds in her quest, peace will reign. If she fails, both worlds will forever be locked in darkness. So begins a two-volume saga of high stakes and a mind-bending quest to find an ancient path that will save humanity. The clock is ticking; the end rushes forward. Ready? Set? Dream.

Provides information on eight of the most notorious criminals who were caught on the run, including John Dillinger, Adolf Eichmann, and Osama bin Laden.

First in the newest series from Ted Dekker, master of suspense, whose books have sold 9 million copies. Humming with intensity, *Eyes Wide Open* is a raw adrenaline rush from first page to last.

*Masters of Doom* is the amazing true story of the Lennon and McCartney of video games: John Carmack and John Romero. Together, they ruled big business. They transformed popular culture. And they provoked a national controversy. More than anything, they lived a unique and rollicking American Dream, escaping the broken homes of their youth to co-create the most notoriously successful game franchises in history—*Doom* and *Quake*—until the games they made tore them apart. Americans spend more money on video games than on movie tickets. *Masters of Doom* is the first book to chronicle this industry's greatest story, written by one of the medium's leading observers. David Kushner takes readers inside the rags-to-riches adventure of two rebellious entrepreneurs who came of age to shape a generation. The vivid portrait reveals why their games are so violent and why their immersion in their brilliantly designed fantasy worlds offered them solace. And it shows how they channeled their fury and imagination into products that are a formative influence on our culture, from MTV to the Internet to Columbine. This is a story of friendship and betrayal, commerce and artistry—a powerful and compassionate account of what it's like to be young, driven, and wildly creative. "To my taste, the greatest American myth of cosmogenesis features the maladjusted, antisocial, genius teenage boy who, in the insular laboratory of his own bedroom, invents the universe from scratch. *Masters of Doom* is a particularly inspired rendition. Dave Kushner chronicles the saga of video game virtuosi Carmack and Romero with terrific brio. This is a page-turning, mythopoeic cyber-soap opera about two glamorous geek geniuses—and it should be read while scarfing down pepperoni pizza and swilling Diet Coke, with *Queens of the Stone Age* cranked up all the way."—Mark Leyner, author of *I Smell Esther Williams*

Real-life all too rarely offers stories that are quite as satisfying as fiction. *Bringing Down the House* is one of the exceptions. Cheating in casinos is illegal; card-counting - making a record of what cards have so far been dealt to enable the player to make some prediction of what cards remain in the deck - is not. But casinos understandably dislike the practice and make every effort to keep card-counters out of their premises. *Bringing Down the House* tells the true story of the most successful scam ever, in which teams of brilliant young mathematicians and physicists won millions of dollars from the casinos of Las Vegas, being drawn in the process into the high-life of drugs, high-spending and sex. *Bringing Down the House* is as readable and as fascinating as *Liar's Poker* or *Barbarians At the Gate*, an insight into a closed, excessive and utterly corrupt world.

On the distant planet of Jijo, six exiled races live side by side. Only ancient relics from their home planets, fragments of half-forgotten stories and the crumbling ruins of the mysterious and god-like Buyur remind the dispossessed of a more noble past, when they were full citizens of the Five Galaxies. The races of Jijo, it seems, have been forgotten, along with whatever crimes they committed. But for how long? It is at the time of the Gathering, the council of the sages, when the spacecraft is first spotted. For some, it offers a new hope. For others, it heralds a time of reckoning. *Brightness Reef* is the compelling story of a world threatened by its past and fighting for its future. With a gallery of extraordinary characters, and a wealth of thought provoking ideas, it is a novel fuelled by

the spirit of adventure and discovery. David Brin at his very best.

As global society becomes more and more dependent, politically and economically, on the flow of information, the power of those who can disrupt and manipulate that flow also increases. In *Hacktivism and Cyberwars* Tim Jordan and Paul Taylor provide a detailed history of hacktivism's evolution from early hacking culture to its present day status as the radical face of online politics. They describe the ways in which hacktivism has re-appropriated hacking techniques to create an innovative new form of political protest. A full explanation is given of the different strands of hacktivism and the 'cyberwars' it has created, ranging from such avant garde groups as the Electronic Disturbance Theatre to more virtually focused groups labelled 'The Digitally Correct'. The full social and historical context of hacktivism is portrayed to take into account its position in terms of new social movements, direct action and its contribution to the globalization debate. This book provides an important corrective flip-side to mainstream accounts of E-commerce and broadens the conceptualization of the internet to take into full account the other side of the digital divide.

A near-future eco-thriller from the bestselling author of *Schismatrix Plus* and *The Difference Engine*. The Storm Troupers are a group of weather hackers who roam the plains of Texas and Oklahoma, hopped up on adrenaline and technology. Utilizing virtual reality, flying robots, and all-terrain vehicles, they collect data on the extreme storms ravaging an America decimated by climate change. But even their visionary leader can't predict the danger on the horizon when a volatile new member joins their ranks and faces a trial by fire: a massive tornado unlike any the world has seen before. "A remarkable and individual sharpness of vision . . . Sterling hacks the future, and an elegant hack it is." —Locus "Lucid and tremendously entertaining. Sterling shows once more his skills in storytelling and technospeak. A cyberpunk winner." —Kirkus Reviews "So believable are the speculations that . . . one becomes convinced that the world must and will develop into what Sterling has predicted." —Science Fiction Age "A very exciting coming-of-age story in a wild future America . . . What's it got? Cyberpunk attitude, genuine humor, nanotechnology, minimal sex but some cool medications and very big weather systems." —SFReviews.net "Brilliant . . . Fascinating . . . Exciting . . . A full complement of thrills." —The New York Review of Science Fiction

Hailed as "a chilling portrait" by The Boston Globe and "a crafty thriller" by Newsweek, this astonishing story of an obsessive hacker promises to change the way you look at the Internet forever. *At Large* chronicles the massive manhunt that united hard-nosed FBI agents, computer nerds, and uptight security bureaucrats against an elusive computer outlaw who broke into highly secured computer systems at banks, universities, federal agencies, and top-secret military weapons-research sites. Here is "a real-life tale of cops vs. hackers, by two technology writers with a flair for turning a complicated crime and investigation into a fast-moving edge-of-your-seat story" (Kirkus Reviews, starred). *At Large* blows the lid off the frightening vulnerability of the global online network, which leaves not only systems, but also individuals, exposed.

The first release in The Beach House series is the story of four women, friends from childhood, who reunite to celebrate their fortieth birthdays. After the distance of time and geography, they look forward to the camaraderie of old friends and the escape from everyday life as they stay at a San Diego beach house. When thoughts and discussion turn to the history of their friendship, will problems of the past threaten to overtake the present? The quest for understanding, identity, faith, and friend-

ship provides a universal thread in this tender and charming story from Sally John that will connect with women from all walks of life.

A famine relief expert, a Canadian Red Cross nurse, and an Ethiopian orphan experience the power of the Holy Spirit and ignite a spiritual revolution.

"My name is Nyah and I'm a hacker. I know things most people would never believe. Things that shouldn't exist, but do."

Kevin Parson escaped a twisted childhood and built his own life, leaving his bizarre past behind him. . .until his cell phone rings and a gravelly voice calling himself Slater tells him he has just three minutes to confess his "sin" or his car will be blown to pieces. Kevin panics. Who would make such a demand, and what sin is he supposed to confess? Not sure what else to do, Kevin swerves into a parking lot and runs from his car. . . just in case. Exactly three minutes later, a massive explosion sets his world on a collision course with madness. Obsessed both with Kevin's downfall and the number 3, Slater initiates a game in which Kevin must answer riddles to avoid Slater's destructive, murderous retribution. From #1 bestselling author Ted Dekker comes a powerful story of good, evil, and all that lies between. The perfect blend of suspense, mystery, and horror in one psychological thriller Now a major motion picture! Also by bestselling author Ted Dekker: The Circle Series, Saint, and Sinner

Some say the great mystery of how one can live in two worlds at once died with Thomas Hunter many years ago. Still others that the gateway to that greater reality was and is only the stuff of dreams. They are all wrong. Rachele Matthews, who grew up in the small town of Eden, Utah, discovered just how wrong when she dreamed and awoke in another world. There she learned that she was the 49th Mystic, the prophesied one, tasked with finding five ancient seals before powerful enemies destroy her. If Rachele succeeds in her quest, peace will reign. If she fails, the world will forever be locked in darkness. In The 49th Mystic, Rachele found the first three of those five seals through great peril and mind-altering adventure. But two seals remain hidden and the fate of both worlds hangs in their balance. As Rachele Matthews sits deep in a dungeon, Vlad Smith is just getting started. Thomas Hunter's world is about to be turned inside out. The mystics say that there is no defense against the Fifth Seal--but finding it will cost Rachele everything. So begins the final volume of high stakes in one girl's quest to find an ancient path that will save humanity. The clock is ticking; the end rushes forward. Ready? Set? Dream.

THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young ac-

tivist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, The Guardian The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. The Age of Surveillance Capitalism is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

An old woman shares a story of violence and tragedy during World War II when Marci asks her to make her beautiful.

Provides an introduction to American pulp fiction during the twentieth century with brief author biographies and lists of their works.

The Trateri are about to learn a vital lesson of the Broken Lands. Deep in the remote expanse where anything can happen, it pays to be on a pathfinder's good side. Nobody ventures beyond their village walls. Nobody sane that is. Monstrous creatures and deadly mysteries wait out there. Lucky for the people she serves, Shea's not exactly sane. As a pathfinder, it's her job to face what others fear and protect her charges from the dangers that await in the Broken Lands. It's not an easy job, but she's the best at what she does. When the people she serves betray her, Shea must rely on her wits and skill to survive the Trateri, a barbarian horde sweeping in to conquer the Lowlands, and their warlord, a man as dangerous as he is compelling. Her actions and the decisions she makes might mean the difference between life or death. Danger looms on the horizon and a partnership with the Warlord may be the only thing preventing the destruction of everything she holds dear.

Thomas Hunter narrowly survives a shooting attempt only to awaken in an alternate universe of green forests, a world to which he subsequently travels every time he goes to sleep.
