### BZDP56 - YARELI NOVAK

This history of the British nature conservation movement describes an organized movement which is now 100 years old. The text traces the early campaigns for an end to the millinery industry and for freedom to walk the mountains, the legislation for bird protection and access to the countryside, the battles against pesticides and pollution, farming and forestry, and the present concerns with global issues and the presumed greening of governments. The book questions governmental concern for the environment and the efficacy of the established conservation bodies. The author argues that the purchase of reserves and the saving of remnant populations is not enough; the movement must draw itself together in order to address the global issues which it has previously avoided.

A significant collection of essays by the late Nicholas Mansergh, one of the leading historians of twentieth century Ireland, edited by his wife, Diana

Rather than reaffirm George III's reputation as Mad King George, Hibbert portrays him as not only a competent ruler during most of his reign, but also as a patron of the arts and sciences, as a man of wit and intelligence, indeed, as a man who greatly enhanced the reputation of the British monarchy until he was finally stricken by a rare hereditary disease.

Born in India of British colonial parents, Roland Oliver moved to Africa as a young man and became one of the continent's leading modern historians. In this memoir, he writes of his work in training African scholars to conduct regional surveys and collect oral histories, in assembling the multivolume Cambridge History of Africa, and in struggling to give African history academic legitimacy at a time when most universities did not have scholars qualified to teach even an elementary course in the subject. Along the way Oliver considers the questions that engage Africanists today, such as the significance of European colonialism in the historical development of the continent and whether nationalism did more harm than good in the formation of modern African states.

English as spoken in the north of England has a rich social and cultural history; however it has often been neglected by historical linguists, whose research has focused largely on the development of 'Standard English'. In this groundbreaking, alternative account of the history of English, Northern English takes centre stage for the first time. Emphasising its richness and variety, the book places northern speech and culture in the context of identity, iconography, mental maps, boundaries and marginalisation. It reassesses the role of Northern English in the development of Modern Standard English, draws some pioneering conclusions about the future of Northern English, and considers the origins of the many images and stereotypes surrounding northerners and their speech. Numerous maps, and a useful index of northern English words and pronunciations, are included. Innovative and original, Northern English will be welcomed by all those interested in the history and regional diversity of English.

Chief ministers in 18th century Britain, the Pelham brothers guided Britain through the War of the Austrian Succession and the Seven Years' War. Yet it is only in the second half of the 20th century that historians have confirmed their importance. Designed to facilitate research on the Pelhams, this is the first bibliography devoted to material on these two ministers. The work covers their personal papers and other manuscript collections as well as contemporary memoirs, diaries, and correspondence. Relevant books and articles, illustrating all aspects of the brothers' lives and careers, are arranged topically and annotated. The volume also includes information on material, such as microfilmed manuscripts, outside the United Kingdom.

Jeremy Black looks at two millennia of English history, and identifies two major themes: a lack of geographic and concomitant economic unity; and the fact that from the Roman invasion onward, a united England was often politically associated with Europe, from Cnut to the Hanoverians.

Chartism, the mass movement for democratic rights, dominated British domestic politics in the late 1830s and 1840s. It mobilized over three million supporters at its height. Few modern European social movements, certainly in Britain, have captured the attention of posterity to quite the extent it has done. Encompassing moments of great drama, it is one of the very rare points in British

history where it is legitimate to speculate how close the country came to revolution. It is also pivotal to debates around continuity and change in Victorian Britain, gender, language and identity.

An unruly bunch of bright, funny sixth-form boys in pursuit of sex, sport and a place at university. A maverick English teacher at odds with the young and shrewd supply teacher. A headmaster obsessed with results; a history teacher who thinks he's a fool. In Alan Bennett's screenplay, staff room rivalry and the anarchy of adolescence provoke insistent questions about history and how you teach it; about education and its purpose. Fox Searchlight Pictures, DNA and the BBC have joined forces to bring the National Theatre's award-winning production of *The History Boys* to the big screen, directed by Nicholas Hytner from a script adapted for the screen by Alan Bennett.

The foundation of the National Health Service on 5 July 1948 was a momentous development in the history of the United Kingdom. Issues of health care touch the lives of everyone, and the NHS has come to be regarded as the cornerstone of the welfare state and as a model for state-organised health care systems elsewhere. Yet throughout its history, the Service has existed in an atmosphere of crisis. Charles Webster's political history is an entirely new and original examination of the NHS from its inception through to its management under the first term of the current Labour government, providing the necessary framework for assessing its future as we enter the new millennium.

*Scent from the Garden of Paradise: Musk and the Medieval Islamic World* traces the history of musk from ancient Asia to the early medieval Islamic world and examines the important role musk played in perfumery and medicine in this new context.

In this volume Peter Marshall explores a wide range of evidence that underlines the complex web of overlapping and competing religious identities that Henry VIII's subjects were forced to assume as he sought to take control of the English church. Investigating broad issues of conversion, polemic and propaganda, scripture, exile, forgery and miracles, as well as looking at specific cases of individuals and events, a rich picture is built up of the ambiguities and paradoxes of the early reformation process in England. This book includes three entirely new chapters, and eight previously published but updated essays.

Steven Ellis provides a history of the British Isles from 1450-1660, a period which ended with the acts of British Union and the restoration of the monarchy.

A comprehensive survey of the significant literature of the English-speaking world

A consolidated list of 6,784 masters and doctoral theses on urban history, organized by thematic categories and sub-categories. The theses cited include primarily those studies undertaken at British universities between 1990 and 1991, and secondarily theses completed at a cluster of North American universities, many of which have for some time been particularly associated with the field. The overwhelming majority are concerned with British urban history themes, though a significant proportion focus on European, American, African, and Asian urban settlements. Distributed by Ashgate. Annotation copyright by Book News, Inc., Portland, OR Fascinating detective stories into the connections between names and related subjects.

Now in its fifth edition, this is an established standard textbook on contemporary British political history since the end of World War II. This authoritative chronological survey discusses domestic policy and politics in particular, but also covers external and international relations.

This is the first comprehensive survey of the economic development of the world's first great industrial metropolis. Modern theories of urban economics are used to shed new light on the process of change in the city.

John Ferris' work in strategic and intelligence history is widely praised for its originality and the breadth of its research. At last his major pioneering articles are now available in this one single volume. In *Intelligence and Strategy* these essential articles have been fundamentally revised to incorporate new evidence and information withheld by governments when they were first published. This volume reshapes the study of communications intelligence by tracing Britain's development of cipher machines providing the context to *Ultra* and *Enigma*, and by explaining how British and German signals intelligence shaped the desert war. The author also explains how intelligence affected British strategy and diplomacy from 1874 to 1940 and world diplomacy during the 1930s and the Second World War. Finally he traces the roots for contemporary intelligence, and analyzes intelligence and the RMA as well as the role of intelligence in the 2003 Gulf War. This volume ultimately brings new light to our understanding of the relations between intelligence, strategy and diplomacy between the

end of the 19th century and the beginning of the 21st century.

**\*\*WINNER OF THE WELLCOME BOOK PRIZE 2014\*\* A NEW YORK TIMES BESTSELLER** Sometimes your child - the most familiar person of all - is radically different from you. The saying goes that the apple doesn't fall far from the tree. But what happens when it does? Drawing on interviews with over three hundred families, covering subjects including deafness, dwarfs, Down's Syndrome, Autism, Schizophrenia, disability, prodigies, children born of rape, children convicted of crime and transgender people, Andrew Solomon documents ordinary people making courageous choices. Difference is potentially isolating, but Far from the Tree celebrates repeated triumphs of human love and compassion to show that the shared experience of difference is what unites us. Winner of the National Book Critics Circle Award for General Non-fiction and eleven other national awards. Winner of the Green Carnation Prize.

How should we tell the histories of academic disciplines? All too often, the political and institutional dimensions of knowledge production are lost beneath the intellectual debates. This book redresses the balance. Written in a narrative style and drawing on archival sources and oral histories, it depicts the complex pattern of personal and administrative relationships that shape scholarly worlds. Focusing on the field of social anthropology in twentieth-century Britain, this book describes individual, departmental and institutional rivalries over funding and influence. It examines the efforts of scholars such as Bronislaw Malinowski, Edward Evans-Pritchard and Max Gluckman to further their own visions for social anthropology. Did the future lie with the humanities or the social sciences, with addressing social problems or developing scholarly autonomy? This new history situates the discipline's rise within the post-war expansion of British universities and the challenges created by the end of Empire.

Matthew Craske looks closely at tomb sculptures in their social context. He discusses a large number of monuments by many different sculptors, all with a knowledge of the person commemorated and the circumstances behind the commission.

Though the publication of Hutton's *Theory of the Earth* (1795) is usually regarded as the beginning of modern geology, it and other works by Hutton have rarely been studied in the original. Dean provides an accurate account of Hutton's major geological writings, in the light of his training and exper

This book explores the role of Venereal Disease in shaping perceptions of sexuality in twentieth-century Scotland, and in defining the response of the Modern State to patterns of sexual behaviour. It examines how civic, medical and political authorities reacted to the 'Hideous Scourge' in times of peace and war and how far policy was informed by anxieties surrounding social change and public morality as much as by the incidence of disease and developments in medical knowledge. It focuses in particular on the moral assumptions underpinning epidemiological debate, and the various dimensions of stigmatisation and control within VD discourse, including gender, generation and class. This study also highlights the protracted campaign in Scotland for legal controls over those suffering from VD, and the enduring problem, resurrected by the threat of HIV and AIDS, of balancing the demands of public health against those of civil liberties in the regulation of 'dangerous sexualities'.

This volume is a comprehensive discussion of British diplomats and diplomacy in the formative period in which Britain emerged as the leading world power.

Kleinwort Benson is one of the most distinguished international investment banks in the City of London, becoming part of the Dresdner Bank Group in 1995. This is the story of how two families, the Kleinworts and the Bensons, emerged from medieval beginnings in Holstein and the Lake District to seek their fortunes in Hamburg, Cuba, and Liverpool, before arriving in the 1850s in London. There they founded two very different merchant banks, which merged in 1967 to create Kleinwort Benson Lonsdale, later Kleinwort Benson. The Kleinwort Benson story mirrors both the spectacular

growth of English capital and its often turbulent side-effects. It shows how the two families survived the collapse of the Benson bank in 1875, the freezing of Kleinwort assets and business by the European financial crisis of 1931, and two World Wars, and how they established their banks as powerful City players in the post-war period. Their story is as much a human drama as a financial history. Brimming with generations of Kleinworts, Bensons, and the families with whom they married and formed partnerships, the book evokes their feuds and friendships, their successes and failures, set against the background of more than two hundred

years of social and business history. This is the first full history of Kleinwort Benson. It contributes to our understanding of the way in which business is carried out in the City of London, and provides fascinating insights into the lives of those concerned. Jehanne Wake was given unrestricted access to the bank's archives and staff and has drawn upon a wealth of original sources to furnish this lively and readable history of the members of two banking dynasties and their boardroom successors.
