He was gorgeous, older and guarded. I knew he was trouble from the moment we locked eyes. We met at work, on my first day as a barista. He smiled, I melted then he tasted my coffee and threw it away. Again, the next day, and the next. He hated the coffee, yet still came back. I knew his game. He called my coffee death in a cup. I called him god's gift to women. I wasn't lying. Then we ran into each other outside of the coffee house, and that's when things got interesting. No longer suave and sweet with impeccable manners. Mr Garcia had a darker side, his appetite, thick and heavy. He set me on fire. Unable to help it, we fell hopelessly in love. The highest of highs. But his demons are dark, as are mine. I'm not sure if we can make it and I know that I have two choices. Walk away now to save myself. Or try and hold on and let love be the light. I choose option two.

Ever since the caveman gazed longingly at the winged creatures above him, mankind has been enamored with the idea of flight—of just taking off and soaring away. Steven A. Ruffin celebrates that spirit, that sense of wonder, with *Aviation's Most Wanted™: The Top 10 Book of Winged Wonders, Lucky Landings, and Other Aerial Oddities*. With dozens of top-ten lists focusing on notable flights, memorable planes, famous and infamous aviators, aircraft combat, air travel—even space travel—and so much more, Ruffin provides a treasure trove of fun facts and amazing anecdotes celebrating the world's love affair with flight, plus the hurt that accompanies any deep love. Will Rogers died in a plane crash near Point Barrow, Alaska, with aviation legend Wiley Post at the controls. Rogers was writing an article at the time of the crash; eerily, the last word he typed was “death.” Isoroku Yamamoto, who masterminded the surprise attack on Pearl Harbor, met his fate in similarly sneaky fashion. U.S. forces intercepted and decoded information on Yamamoto's travel plans and “Pearl Harbored” his plane, shooting it down into the island jungle of Bougainville. The safest seat in a crash depends on if you crash on takeoff or on landing—so flip a coin! You'll read about the first and worst of flight, aces and races, and everything from crimes, sex, and controversy to planes so fast they can outrun the sun. With *Aviation's Most Wanted™* you'll get the history of flight from the early balloon adventures of the eighteenth century until the pre-

sent, laid out with trivia and tales to amuse and amaze!

The Mile High Club is a novel of intrigue, irreverence, international terrorism, humor, suspense, and cross-dressing, in which the intrepid Kinky Friedman gets more than his leg pulled when he encounters a mysterious vamp on an airplane. It all starts with a casual flirtation, two people on a flight from Dallas to New York. She is gorgeous and mysterious; he is a private detective. When the plane lands, the detective -- our hero Kinky Friedman -- finds that he's been left holding the bag, in this case literally holding a bright pink cosmetic bag. The mysterious woman, having asked the Kinkster to watch her luggage while she visits the dumpster, has taken a powder and somehow has vanished. Confident that he'll find the mystery woman again, Kinky holds on to the bag. Sure enough she does turn up, but not before Kinky has excited the interest of an array of "suits" from the State Department, been party to a thwarted kidnap attempt by Arab terrorists, and found a dead Israeli agent parked on the toilet of his downtown Manhattan loft. Employing the able-bodied assistance of his usual sidekicks, the Village Irregulars, Kinky eventually gets to the bottom of all the comings and goings and comings of the many visitors to his loft -- including two late-night visits by the mysterious, and suddenly affectionate, woman from the plane and one not-so-late visit by her angry brother. Before it's over, the bag is gone. Despite the many comparisons made by the critics, citing his resemblance to one great writer after another, the truth is that no other writer combines intriguing mystery with bawdy one-liners quite like Kinky Friedman. Alternately raunchy, offbeat, and hilarious, *The Mile High Club*, complete with a surprise ending, is Kinky at his very considerable best.

GUNS, EX-CONS AND POLICE INCARCERATION... Sounds more like something that would happen in an action movie than on a date. But as these TRUE stories show, dating can be dangerous, shocking and most of all, FUNNY. So find yourself a seat and get ready to laugh, cry and shake your head in disbelief. And if you're thinking about dating, get yourself some pepper spray--you'll need it! In bestselling author T L Swan's second hot installment to the Miles High Club series, he's sexy, rich, and her mortal enemy. Hate never felt so good. I first met Tristan Miles at a meeting where he was trying to take over my late husband's company. He was powerful, arrogant, and infuriatingly gorgeous, and I hated him with every cell in my body. In the shock of the century, he called me three days later and asked me on a date. I would rather die than date a man like him--though I do have to admit it was good for the ego. Turning him down was the highlight of my year. Six months later, he was the guest speaker at a conference I attended in France. Still arrogant and infuriating--but this time, surprisingly charming and witty. When he looked at me, I got butterflies. But I can't go there. He's just a player in a hot suit, and I'm just a widow with three unruly sons. I just need this conference to be over. Because everybody knows that Tristan Miles always gets what he wants...and what he wants is me.

Real-life flight attendant Heather Poole has written a charming and funny insider's account of life and work in the not-al-

ways-friendly skies. Cruising Attitude is a Coffee, Tea, or Me? for the 21st century, as the author parlays her fifteen years of flight experience into a delightful account of crazy airline passengers and crew drama, of overcrowded crashpads in “Crew Gardens” Queens and finding love at 35,000 feet. The popular author of “Galley Gossip,” a weekly column for AOL's award-winning travel website Gadling.com, Poole not only shares great stories, but also explains the ins and outs of flying, as seen from the flight attendant's jump seat.

Automation in aviation can be a lifesaver, expertly guiding a plane and its passengers through stormy weather to a safe landing. Or it can be a murderer, crashing an aircraft and killing all on board in the mistaken belief that it is doing the right thing. Lawrence Sperry invented the autopilot just ten years after the Wright brothers' first flight in 1903. But progress was slow for the next three decades. Then came the end of the Second World War and the jet age. That's when the real trouble began. Aviation automation has been pushed to its limits, with pilots increasingly relying on it. Autopilot, autothrottle, autoland, flight management systems, air data systems, inertial guidance systems. All these systems are only as good as their inputs which, incredibly, can go rogue. Even the automation itself is subject to unpredictable failure. Can automation account for every possible eventuality? And what of the pilots? They began flight training with their hands on the throttle and yoke, and feet on the rudder pedals. Then they reached the pinnacle of their careers -- airline pilot -- and suddenly they were going hours without touching the controls other than for a few minutes on takeoff and landing. Are their skills eroding? Is their training sufficient to meet the demands of today's planes? *The Dangers of Automation in Airliners* delves deeply into these questions. You'll be in the cockpits of the two doomed Boeing 737 MAXs, the Airbus A330 lost over the South Atlantic, and the Bombardier Q400 that stalled over Buffalo. You'll discover exactly why a Boeing 777 smacked into a seawall, missing the runway on a beautiful summer morning. And you'll watch pilots battling -- sometimes winning and sometimes not -- against automation run amok. This book also investigates the human factors at work. You'll learn why pilots might overlook warnings or ignore cockpit alarms. You'll observe automation failing to alert aircrews of what they crucially need to know while fighting to save their planes and their passengers. The future of safe air travel depends on automation. This book tells its story.
