"When Elizabeth Kaufman received the news of her husband's death at the Battle of Vicksburg in 1863, she felt only relief. She determined that she would never be at the mercy of any man again, even if it meant she would never have a family of her own. Then Aaron Zook comes home with her brother when the war ends two years later. Despite the severity of his injuries, Aaron resolves to move West and leave the pain of the past behind him. He never imagined that the Amish way of life his grandfather had rejected long ago would be so enticing. That, and a certain widow he can't get out of his mind. Yet, even in a simple community, life has a way of getting complicated. Aaron soon finds that while he may have left the battlefield behind, there is another fight he must win--the one for the heart of the woman he loves. Welcome back to the Amish community at Weaver's Creek, where the bonds of family and faith bind up the brokenhearted"--

To stay competitive and meet market expectations in a global economy, both domestic and foreign companies must realign their manufacturing processes, make improvements, and increase their manufacturing capabilities. With large numbers of employees working in a network of domestic and foreign facilities, production processes are as varied as the products being produced. Manufacturing managers need a manufacturing plan or strategy that will bring structure to this complex environment. In *Manufacturing Strategy: How to Formulate and Implement a Winning Plan*, 2nd Edition, John Miltenburg offers a sensible and systematic method to: (1) evaluate domestic and foreign factories and international manufacturing and (2) plan the appropriate manufacturing strategy to be first in the market. Incorporating comments and suggestions from managers who used the first edition of *Manufacturing Strategy*, John Miltenburg expands and improves on his focus in the areas of: International Manufacturing — where the focus is on a company's international network of factories; Competitive Strategy — where managers must understand the role manufacturing strategy plays in their company's business strategy; and Manufacturing Programs — showing how programs such as quality management, six sigma, agile manufacturing, and supply chain management fit within the manufacturing strategy. *Manufacturing Strategy* gives managers a common language for dealing with manufacturing problems at both strategic and operational levels. It improves communication between manufacturing managers and those outside manufacturing (who will now have a better understanding of what manufacturing can and cannot do).

In the rush to redefine the place of black Americans in contemporary society, many radical activists and academics have mounted a campaign to destroy traditional American history and replace it with a politicized version that few would recognize. According to the new radical orthodoxy, the United States was founded as a racist nation—and everything that has happened throughout our history must be viewed through the lens of the systemic oppression of black people. Rejecting this false narrative, a collection of the most prominent and respected black scholars and thinkers has come together to correct the record and tell the true story of black Americans in all its complexity, diversity of experience, and poignancy. Collectively, they paint a vivid picture of black people living the grand American experience, however bumpy the road may be along the way. But rather than a people apart, blacks are woven into the united whole that makes this nation unique in history. Featuring Essays by: John Sibley Butler Jason D. "Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of *Tom Kundig: Houses*, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined—disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone through dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
