There has been a lot of talk about real estate being a bad investment. Many financial and economic advisers suggest buying a home may be worse for your finances than renting. However, I think most people do not take the home buying or selling process seriously. They put all their faith in other people to get the right deal done for them. If you blindly buy a house based on what your real estate agent or lender tell you, it may not be a good investment! However, if you are able to find great deals, get a good loan, and take

care of your home, real estate can be an incredible tool to build wealth. I am a real estate agent, and real estate investor who has done very well buying hundreds of houses. I try to teach what I know to others to help them make smarter and better decisions. If you know the right way to buy a home, it beats renting every time. There is a lot of information in this book, and depending on your real estate experience you may know some of it, or be familiar with a lot of it. I have created four sections with many chapters to make it easy to navigate. The first part of the book focuses on the bare basics of buying and selling houses, while the later sections go deeper into each aspect of real estate. I hope you enjoy the book and learn how to make your real estate purchases awesome investments.

Find happiness at home with five guiding principles from cultural phenomenon THE MODERN HOUSE. 'A source of fascination, inspiration and fantasy' Guardian In 2005, childhood friends Matt Gibberd and Albert Hill set out to convince people of the power of good design and its ability to influence our wellbeing. They founded The Modern House - in equal parts an estate agency, a publisher and a lifestyle brand - and went on to inspire a generation to live more thoughtfully and beautifully at home. As The Modern House grew, Matt and Albert came to realise that the most successful homes they encountered - from cleverly conceived studio flats to listed architectural masterpieces - had been designed with attention to the same timeless principles: Space, Light, Materials, Nature and Decoration. In this lavishly illustrated book, Matt tells the stories of these remarkable living spaces and their equally remarkable owners, and demonstrates how the five principles can be applied to your own space in ways both large and small. Revolutionary in its simplicity, and full of elegance, humour and joy, this book will inspire you to find happiness in the place you call home. An essential and fun read about buying your own home - from First Time Buyers, for First Time Buyers. Illustrated throughout by well-known creative artist Ben Jones to make you smile. How to get thousands of Pounds for free towards your purchase. Work out a feasible financial scenario early. Research your property and be a step ahead. Be best prepared for viewing and offering. Understand and manage the conveyancing process step-by-step. Learn from others Almost two years ago, me and my partner had this brilliant idea: let's buy our own home! We were fed up with renting and

thought we got this - a few months and we are sorted. Little did we know. When we embarked on the adventure, first thing we realised was that we didn't actually have a clue what we were doing, falling for the tricks of the trade at almost every step of the journey. We relied on online material and a few books explaining WHY you should buy, but not really HOW. We tumbled through the process from step to step, without being properly prepared for what was supposed to happen next and what was realistic. We had to let one house go after its survey revealed lots of issues that we could have spotted, then spent more than half a year trying to find another one and finally wound up in a chain that caused an additional 6-month delay. Thankfully, we are both scientists. In our best bid to get on top of everything, we started to do uncountable hours of research, calculations, reading up and talking to relevant people - agents, surveyors, mortgage brokers, other First Time Buyers. While we were suffering through the conveyancing process, I finally realised that I increasingly needed a therapeutic outlet. This is how this book was born: a catharsis, a plea that no matter what, something good must come out of this!! I thought - if nothing else, let's pass on everything that we have learned to make this a little easier for someone else. Because no-one deserves the unnecessary chaos, stress and financial losses that come with buying your own home. This book is our compiled wisdom to make the home buying process more transparent. We hope it will help you plan, make informed choices, be better in control of the process and, most importantly, know what is coming and what to expect. The purpose of this book is for you to be prepared and less at the mercy of 'the system'. Contents Chapter 1.

Aspects of the traditional property system in Australia and New Zealand are dated and no longer work for buyers or sellers. Many first time home buyers are unable to purchase, even with government grants and concessions. Home Owners are finding it increasingly difficult to make their mortgage payments, as interest rates rise. Sellers are unable to achieve their sales prices as banks have pulled back on their lending, making it increasingly difficult to borrow. Negative gearing has been the preferred property investing strategy, yet why are Australia, New Zealand and Canada the only three countries in the world who use it for tax benefits? In how to buy a House for \$1 Rick Otton, with over two decades of property investing experience, lays out the strategies to solve these current problems. This book will transform the way readers think and invest.

No-one obsesses over property quite like the British, even though buying and selling a home can be a personal headache and a financial lucky-dip. British newspapers groan under the weight of property supplements; TV reports constantly track house prices; young people fret about getting on the property ladder, while established homeowners worry about how to increase the value of their home or the market crashing. Buying a property is rarely straightforward and can be very time-consuming. There are numerous choices to make, from the style of building and location, to proximity to schools and other amenities. Most

of all, there are plenty of opportunities to make the wrong decisions. Selling your home is also fraught with stress; from deciding to move and evaluating your property's worth to finding an estate agent and putting your home on the market, every step comes with its own difficulties. Plus the advent of the Home Information Packs has also created a new headache for potential vendors. Buying and Selling a Home For Dummies, 2nd Edition covers everything from finding a property and getting a mortgage to preparing your home for sale and moving on. It is also one of the few guides to cover England, Wales and Northern Ireland as separate entities from Scotland, and to cover the Scottish property market. This updated guide also contains coverage of HIPS (Home Information Packs), which were made compulsory in September 2007 and apply to all properties with three or more bedrooms.
