#### How to Replace Fork Seals: 13 Steps (with Pictures) - wikiHow

Learn how to change a front wheel bearing with a step-by-step guide with photos and a video. In the video, you will learn what a damaged wheel bearing sounds like and how to determine which wheel bearing is causing the noise. Once you learn this trick of the trade, your mechanic can never sell you a wheel bearing you don't need.

Remove the old seal. Wedge the dust seal from the fork leg. Find the fork seal itself. It is held into place by a clip within a groove. Pry the seal out carefully. Flush the area as you go to remove debris within the fork. Take the tube in 1 hand and the stanchion in the other. Use muscle to pull the 2 apart.

These assemblies allow you to replace both of your front struts yourself in less than two hours. You'll have to get an alignment done afterward (about \$100), but you'll still save about \$300 by doing the job yourself. You'll need rust penetrant, wrenches, a pin punch or large screwdriver, and a thin piece of plywood.
