Mit der Version 7.1 erweitert SAP den SAP Solution Manager mit einigen Funktionen in den Bereichen Testmanagement und Testautomatisierung. Besonders interessant sind die Testwerkzeuge der Testautomatisierung, da das SAP-eigene Testautomatisierungs-Tool eCATT die neuen SAP-Benutzer-

oberflächen mit unterschiedlichen Technologien nicht unterstützt und somit für das Testen von Geschäftsprozessen nicht geeignet ist. Um diese Lücke zu schließen, wurden verschiedene Drittanwendungen integriert. In diesem Buch wird auf die Möglichkeiten der Testautomatisierung, die sich durch das Upgrade im SAP Solution Manager 7.1 ergeben, eingegangen. Hierzu werden die Werkzeuge eCATT und HP QTP (Drittanwendung) ausführlich untersucht und deren Stärken und Schwächen in der Automatisierung von technologieübergreifenden Geschäftsprozessen aufgezeigt.

Want to learn HP's new UFT API functionality as fast as possible? With the release of UFT API testing, I felt most people who were new to the product would be looking for a resource to help get them up to speed quickly. Also, I believe that with the industry-wide adoption of Agile's development process, the need for test automation engineers to understand and be able to create API level test has become critical. This book is what I wished I had when I first began using UFT API testing. I'm adopting a "hands-on" approach, and have tried to include practical examples and pithy explanations for all the concepts presented. This is not meant to be an exhaustive look at every aspect of UFT API but rather to serve as a quick-start workbook. Hopefully, this book will save you some time (and headaches) by painlessly getting you up to speed on UFT API testing. I've been using HP Service Test since its initial 11.0 release. There was little documentation and next to zero information on the web to help me get started. I decided to change that by regularly sharing information, including tips and tricks for service test and other automation tools, on my blog, <http://www.joecolantonio.com>.

Test Automation using HP Unified Functional Testing (UFT) 11.5, is the first book released globally on HP UFT 11.5, which is the latest and enhanced version of the HP test automation tool, Quick Test Professional (QTP). This UFT book has been designed with the objectives of simplicity and ease of understanding. This book is recommended both for those who are beginning to learn test automation (using QTP) and for advanced automation users. Another major highlight of this book is that you will be learning on our custom developed web based application instead of windows based flight reservation application that comes by default with HP QTP/UFT. This application with enhanced test scenarios will bring you very close to real-time automation using HP QTP/UFT. With author's huge experience as corporate trainer on HP QTP/UFT, this book follows a unique training based approach instead of a regular text book approach.

This book is a collection of chapters written by experts on various aspects of big data. The book aims to explain what big data is and how it is stored and used. The traditional framework of relational databases can no longer provide appropriate solutions for handling big data and making it available and useful to users scattered around the globe. The study of big data covers a wide range of issues including management of heterogeneous data, big data frameworks, change management, finding patterns in data usage and evolution, data as a service, service-generated data, service management, privacy and security. All of these aspects are touched upon in this book. It also discusses big data applications in different domains. The book will prove useful to students, researchers, and practicing database and networking engineers.
