Both printed book and eBook purchasers can receive a free copy of the database on CD-ROM, enabling export of employer contacts, phone numbers and addresses.

'We fed the monster until it blew up ...' While Wall Street was busy creating the biggest credit bubble of all time, a few renegade investors saw it was about to burst, bet against the banking system - and made a fortune. From the jungles of the trading floor to the casinos of Las Vegas, this is the outrageous story of the misfits, mavericks and geniuses who, against all odds, made the greatest financial killing in history.

Private investment funds are currently investing more capital than ever and the funds themselves are larger than ever. This practical guide features contributions by leading industry specialists on a wide range of issues arising at all stages of a private investment fund's life cycle.

This book, written jointly by an engineer and artificial intelligence expert along with a lawyer and banker, is a glimpse on what the future of the financial services will look like and the impact it will have on society. The first half of the book provides a detailed yet easy to understand educational and technical overview of Fin-Tech, artificial intelligence and cryptocurrencies including the existing industry pain points and the new technological enablers. The second half provides a practical, concise and engaging overview of their latest trends and their impact on the future of the financial services industry including numerous use cases and practical examples. The book is a must read for any professional currently working in finance, any student studying the topic or anyone curious on how the future of finance will look like.

An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focuss-

ing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

Indexes the Times, Sunday times and magazine, Times literary supplement, Times educational supplement, Times educational supplement Scotland, and the Times higher education supplement.

Why should and how can organisations manage their reputations? All organisations, the executives who direct them, the employees who create value and their stakeholders who influence them, all interact and can impact corporate reputation. In a 24/7 media environment, where even a tweet can shape impressions, the importance of reputation management has never been higher. Every single move, decision taken and each isolated event that involves a company or public figure, is scrutinised, documented and publicised globally, compounding the task of reputation managers. Just ask BP, Toyota or Tiger Woods. This report provides an assessment of how governments can generate inclusive economic growth in the short term, while making progress towards climate goals to secure sustainable long-term growth. It describes the development pathways required to meet the Paris Agreement objectives and underlines the value of well-aligned policy packages in mobilising investment and social support for the transition while enhancing growth. The report also sets out the structural, financial and political changes needed to enable the transition.

'If you're thinking about trying mindfulness, this is the perfect introduction....I'm grateful to Andy for helping me on this journey.'
BILL GATES 'It's kind of genius' EMMA WATSON Feeling stressed about Christmas/Brexit/everthing? Try this... Demystifying meditation for the modern world: an accessible and practical route to improved health, happiness and well being, in as little as 10 minutes. Andy Puddicombe, founder of the celebrated Headspace, is on a mission: to get people to take 10 minutes out of their day to sit in the now. Here he shares his simple to learn, but highly effective techniques of meditation. * Rest an anxious, busy mind * Find greater ease when faced with difficult emotions, thoughts, circumstances * Improve focus and concentration * Sleep better * Achieve new levels of calm and fulfilment. The benefits of mindfulness and meditation are well documented and here Andy brings

this ancient practice into the modern world, tailor made for the most time starved among us. First published as Get Some Headspace, this reissue shows you how just 10 minutes of mediation per day can bring about life changing results.

This report provides a detailed description and analysis of the different legal provisions in twenty-two OECD countries relating to taxpayers' rights and the compliance powers of tax authorities. The accompanying tables present a comparison of country practices in 1989 and identify major reforms introduced in recent years.

A true story of high finance, murder, and one man's fight for justice.

What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of

economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

In his autobiography Stanley S.K. Kwan discusses his roots, Hong Kong after the War, Hang Seng Bank, the new China and home and country.

ONE WOMAN'S QUEST TO REBUILD BRITAIN'S BROKEN BANKING SYSTEM 'If there was ever a business book suitable for TV adaptation, this is it' FT In the aftermath of the 2008 financial crash, the British banking industry had come to a standstill. Trust in the sector had been left in tatters and, despite the emergence of technologies which could revolutionise the customer experience, nobody wanted to upset the status quo. That was until Anne Boden decided to do something radical and start her own bank. Founder of Starling Bank, winner of Best British Bank three years running, in this awe-inspiring story Anne reveals how she broke through bureaucracy, successfully tackled prejudice to realise her vision for the future of consumer banking and revolutionised the entire industry forever. ***ONE OF THE TIMES TOP 5 BEST BUSINESS BOOKS OF THE YEAR 2020*** 'A banking blockbuster' The Observer Magazine 'Sent shockwaves through the tight-knit world of UK tech and venture capital' Yahoo Finance

Achieving food security is vital for any nation. But despite progress in food availability in the postwar period, food insecurity

still prevails in many developing countries, with more than half the world's undernourished in Asia. This unacceptable number calls for urgent action. Differences in levels of food security across countries cannot be explained solely by conventional economic arguments, such as resource endowments, country or population size, the level of economic development, and cultural or social differences. This book approaches the issue of food security in a number of Asian and other countries by highlighting the crucial role played by government and economic institutions and by examining how they influence food availability. It lays out valuable policy initiatives for national governments and international bodies, acting through improved institutions, to reduce poverty and inequality and to achieve higher levels of food security nationally and globally.

The aim of this book is to provide a benchmark statement of key issues on housing and to emphasise the need to embed our understanding of housing issues in an international and multidisciplinary setting.

Like sharks, epidemic diseases always lurk just beneath the surface. This fast-paced history of their effect on mankind prompts questions about the limits of scientific knowledge, the dangers of medical hubris, and how we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent

SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

Wealth management is one of the areas in which banks and other personal financial services players are investing heavily. But the market is changing fast. Going forward, players therefore need to adapt their strategies to the new realities: what worked in the past will not, for the most part, be appropriate in the future. This unique book, written by a former McKinsey consultant, offers an up-to-date, detailed, practical understanding of this exciting area of financial services.

Financial Services Marketing: an international guide to principles

and practice contains the ideal balance of marketing theory and practice to appeal to advanced undergraduates and those on professional courses such as the Chartered Institute of Banking. Taking an international and strategic view of an increasingly important and competitive sector, Financial Services Marketing adopts a fresh approach in terms of structure, and is organised around the core marketing activities of marketing for acquisition and marketing for retention. Financial Services Marketing features: * Strong international focus: case studies and vignettes representing Asia-Pacific, Europe and the US. * Comprehensive coverage, focusing on both B2B and B2C marketing. * Expert insights into the latest innovations in the sector, from technological developments, CRM and customer loyalty to issues of social responsibility. Financial Services Marketing will help both the student and the practitioner to develop a firm grounding in the fundamentals of: financial services strategy, customer acquisition, and customer development. Reflecting the realities of financial services marketing in an increasingly complex sector, it provides the most up-to-date, international and practical guide to the subject available.

From the Vault Career Library covering the basics of financial statements, fit portion of interviews and equity and debt valuation techniques in a step-by-step process.

This book examines, in detail, the political context within which the civil service operates, including the role of the central government in Hong Kong SAR civil service policy making, the changing leadership role of Hong Kong's administrative elite, and attempts by the government to boost executive accountability since 2002.

Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated into places of poverty and prosperity. Tracing the long arc of human history from hunter-gatherer societies to the early twenty-first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbates the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. *The End of Development* provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

The digital transformation is in full swing and fundamentally changes how we live, work, and communicate with each other. From retail to finance, many industries see an inflow of new technologies, disruption through innovative platform business models, and employees struggling to cope with the significant shifts occurring. This Fourth Industrial Revolution is predicted to also transform Logistics and Supply Chain Management, with delivery systems becoming automated, smart networks created everywhere, and data being collected and analyzed universally. *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution* provides a holistic overview of this vital subject clouded by buzz, hype, and misinformation. The book is divided into three themed-sections: Technologies such as self-driving cars or virtual reality are not only electrifying science-fiction lovers anymore, but are also increasingly presented as cure-all remedies to supply chain challenges. In *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution*, the authors peel back the layers of excitement that have grown around new technologies such as the Internet of Things (IoT), 3D printing, Robotic Process Automation (RPA), Blockchain or Cloud computing, and show use cases that give a glimpse about the fascinating future we can expect. Platforms that allow businesses to centrally acquire and manage their logistics services disrupt an industry that has been relationship-based for centuries. The authors discuss smart contracts, which are one of the most exciting applications of Blockchain, Software as a Service (SaaS) offerings for freight procurement, where numerous data sources can be integrated and decision-making processes automated, and marine terminal operating systems as an integral

node for shipments. In *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution*, insights are shared into the cold chain industry where companies respond to increasing quality demands, and how European governments are innovatively responding to challenges of cross-border eCommerce. People are a vital element of the digital transformation and must be on board to drive change. *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution* explains how executives can create sustainable impact and how competencies can be managed in the digital age - especially for sales executives who require urgent upskilling to remain relevant. Best practices are shared for organizational culture change, drawing on studies among senior leaders from the US, Singapore, Thailand, and Australia, and for managing strategic alliances with logistics service providers to offset risks and create cross-functional, cross-company transparency. *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution* provides realistic insights, a ready-to-use knowledge base, and a working vocabulary about current activities and emerging trends of the Logistics industry. Intended readers are supply chain professionals working for manufacturing, trading, and freight forwarding companies as well as students and all interested parties.

"The Committee on Payment and Settlement Systems (CPSS) publishes - under the aegis of the Bank for International Settlements (BIS) - reference works on the payment systems and other financial market infrastructures of various countries, widely known as Red Books. The Red Book for the CPSS countries was last pub-

lished in April 2003. After the enlargement of the CPSS to 24 countries in 2009, this edition of the Red Book for the CPSS countries is in two volumes"--Foreword.

Economics of Money, Banking, and Financial Markets heralded a dramatic shift in the teaching of the money and banking course in its first edition, and today it is still setting the standard. By applying an analytical framework to the patient, stepped-out development of models, Frederic Mishkin draws students into a deeper understanding of modern monetary theory, banking, and policy. His landmark combination of common sense applications with current, real-world events provides authoritative, comprehensive coverage in an informal tone students appreciate.

The new edition of Rayden and Jackson focusses on the needs of the practitioner. Volume 1 deals comprehensively with the law of relationship breakdowns and the financial applications that flow from those breakdowns: the substantive law, the procedural law and inter-jurisdictional matters. The Family Procedure Rules 2010 are analysed and explored and the ever-developing case law is set out in the text. The new loose-leaf format ensures that practitioners are kept up to date in an ever-developing area. Volume 2 is a one-stop resource for practitioners, judges and scholars. Comprehensive, authoritative, practical and easily accessible, the Volume brings together statutes, procedural rules, case-law and analysis in self-contained sections and covers all areas of family law relating to children, including international aspects, local authority duties, appeal and costs. Rayden and Jackson will be updated four times a year.
