The primary purpose of a patent law system should be to enhance economic efficiency, in particular by providing incentives for making inventions. The conventional wisdom is that patents should therefore be strictly exclusive rights. Moreover, in practice patent owners are almost never forced to give up their right to exclude others and receive only a certain amount of remuneration with, for instance, compulsory licensing. Other economically inter-

esting patent-law objectives, however, include the transfer and dissemination of knowledge. Mechanisms exist by which the patent owner decides if he or she would prefer exclusive or non-exclusive rights, for instance the opportunity to declare the willingness to license and create patent pools. But it is questionable whether these mechanisms are sufficient and efficient enough in view of the existence of patent trolls and other problems. This work challenges the conventional wisdom to a certain extent and makes proposals for improvements.

The interaction between a user and a device forms the foundation of today's application design. Covering the following topics: A suite of five structural principles helping designers to structure their mock-ups; An agile method for exploiting desktop eye tracker equipment in combination with mobile devices; An approach to explore large-scale collections based on classification systems; A framework based on the use of modeling and components composition techniques to simplify the development of organizational collaborative systems; A low-cost

virtual reality system that provides highly satisfying virtual experiences; Popular hardware and software tools and technologies for developing augmented and virtual reality applications; An implementation to handle connectivity between virtual reality applications and SensAble® Technology Phantom Haptic Devices; The results of a research study implementing a teaching technological strategy to help Down syndrome children develop their reading skills; Platform independent models decreasing the level of cohesion between communication technologies and software for ubiquitous computing; A method for applying gamification as a tool to improve the participation and motivation of people in performing different tasks. New Trends in Interaction, Virtual Reality and Modeling collects the best research from Interacción 2012 and MexIHC 2012, and presents the state-of-the-art in human-computer interaction, user interfaces, user experience and virtual reality. Written by researchers from leading universities, research institutes and industry, this volume forms a valuable source of reference for researchers in HCI and VR.

"This book offers insight into current research practices and trends in Information Resource Management strategies that are implemented electronically"--Provided by publisher. This book constitutes the refereed proceedings of the Third International Symposium on End-User Development, IS-EUD 2011, held in Torre Canne, Italy, in June 2011. The 14 long papers and 21 short papers presented were carefully reviewed and selected for inclusion in the book. In addition the volume contains 2 keynote speeches, 14 doctoral consortia, and information on 3 workshops. The contributions are organized in topical sections on mashups, frameworks, users as co-designers, infrastructures, methodologies and guidelines, beyond the desktop, end-user development in the workplace, meta-design, and supporting end-user developers.

The disjuncture between the design intent of the developers of ICTs and the needs of the users has often led to surprising use of new technologies, as users have refused to become mere agents of the designers. Individual users have adopted their own uses of ICTs based on

the complex webs of relations and meanings in which they function as social actors. Instead of adjusting these webs to new ICTs, they have fit the ICTs into their pre-existing social webs, often resulting in imaginative and creative uses of new technologies, not envisaged by the original designers. The contributions in this volume provide studies of such integrations of ICTs into the lives of human users, and demonstrate that such uses should not be regarded as 'faulty' or 'mistaken', merely because they 'fail' to meet the expectations of the original designers of the ICTs. Instead, human users should be given precedence over ICTs, and the creative uses of 'universal' technologies by individual users should be emphasised and studied, so as to move towards a better understanding and appreciation of the integration of ICTs into human lives. This book was originally published as special issue of *The Information Society*.

Looks at the features of the Android phone, covering such topics as personalizing the device, texting, email, talking with Google Now, managing media, and downloading apps. Manufacturing and Engi-

neering Technology brings together around 200 peer-reviewed papers presented at the 2014 International Conference on Manufacturing and Engineering Technology, held in San-ya, China, October 17-19, 2014. The main objective of these proceedings is to take the Manufacturing and Engineering Technology discussion a step further. Contributions cover Manufacture, Mechanical, Materials Science, Industrial Engineering, Control, Information and Computer Engineering. Furthermore, these proceedings provide a platform for researchers, engineers, academics as well as industrial professionals from all over the world to present their research results and development activities in Manufacturing Science and Engineering Technology.

Android ist der unumstrittene Marktführer bei den Smartphone-Systemen. Die c't-Redaktion hat Android unter die Haube geschaut und zeigt, wohin sich das Betriebssystem entwickelt. In der Diskussion um die Datenkrake Google fällt immer wieder die enge Verknüpfung mit Android auf, mehrere Artikel stellen dar, wie Sie Ihr Smartphone von den Google-Diensten entkoppeln können. Eine Test-

strecke gibt Ihnen Tests und Kaufberatungen an die Hand, mit denen Sie im Dschungel aktueller Smartphones und Tablets den Überblick bekommen, zusätzlich hat die Redaktion die neusten Smartwatches auf ihre Alltags-tauglichkeit untersucht. In einem großen Praxisteil erfahren Sie, wie man einfache Hardware-Defekte selbst beheben kann, wie Sie mit Apps mehr aus Ihrem Mobilgerät heraus-holen und den mobilen Be-gleiter voll auf Ihre Bedürfnisse einrichten. Darüberhinaus bietet das Heft zwei Aktionen: 50 Prozent Rabatt (gültig bis 31.5.2015) auf das Verbatim Dual USB Power Pack und die Sicherheits-App Mobile Security & Antivirus von Eset kostenlos für ein Jahr. Die Aktivierung der App ist bis zum 31. Juli 2015 möglich. Today's market for mobile apps goes beyond the iPhone to include Black-Berry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS,

and other standard web tools. You'll also explore platform variations, finicky mobile browsers, Ajax design patterns for mobile, and much more. Before you know it, you'll be able to create mashups using Web 2.0 APIs in apps for the App Store, App World, OVI Store, Android Market, and other online retailers. Learn how to use your existing web skills to move into mobile development Discover key differences in mobile app design and navigation, including touch devices Use HTML, CSS, JavaScript, and Ajax to create effective user interfaces in the mobile environment Learn about technologies such as HTML5, XHTML MP, and WebKit extensions Understand variations of platforms such as Symbian, BlackBerry, webOS, Bada, Android, and iOS for iPhone and iPad Bypass the browser to create offline apps and widgets using web technologies

This volume presents the 5th European Conference of the International Federation for Medical and Biological Engineering (EM-BEC), held in Budapest, 14-18 September, 2011. The scientific discussion on the conference and in this conference proceedings include the following

issues: - Signal & Image Processing - ICT - Clinical Engineering and Applications - Biomechanics and Fluid Biomechanics - Biomaterials and Tissue Repair - Innovations and Nanotechnology - Modeling and Simulation - Education and Professional

This book explores from an English law and Institutional perspective the various types of injunctive relief that are available to a party before and during arbitral proceedings. In particular, this book examines the basis of the power of English Courts to grant such injunctions and explains when such injunctions will be granted. It considers any limitations attached to such injunctions and the relationship between section 44 of the Arbitration Act 1996 and section 37 of the Senior Courts Act 1981. It also provides an in-depth analysis of case law and the emerging trends in this area of arbitration, as well as the powers of arbitrators under the ICC and LCIA Rules to grant such relief and other remedies that might be available to a party seeking to uphold an arbitration agreement. This book will be a vital reference tool for practitioners, arbitrators and postgraduate students.

Learn to build and optimize attractive, functional web sites for smartphones Today, mobile devices outnumber desktop and laptop computers three to one. Skill in developing web sites that work on mobile devices is in demand, and this friendly, step-by-step guide shows how to build and optimize sites using HTML5 and other standard web development tools. Building web sites that work for all types of smartphones and tablets, including iPhones, iPads, Android devices, and BlackBerry devices is a skill much in demand as mobile devices outpace both desktop and laptop computers, and this book gets you started. Guides you through creating and optimizing mobile sites with HTML, CSS, and JavaScript Covers HTML5, WebKit extensions, platform variations, accommodating different browsers, security issues, and making mobile sites richer with Flash, graphics, and video Includes code for differences in mobile app design and navigation, including touch devices HTML, CSS, and JavaScript Mobile Web Development For Dummies makes it easy to start developing great sites for mobile devices.

The ISC Class 11 sample

Paper for English Paper-1, English Paper-2, Accountancy, Economics & Business Studies 2022-2023 is considered by an expert panel to be one of the best ISC reference books for class 11 English Paper-1, English Paper-2, Accountancy, Economics & Business Studies exam. It includes MCQs & objective type questions for ample practice. Students of class 11 shouldn't leave any stone unturned, and therefore this is the best ISC reference book for class 11 English Paper-1, English Paper-2, Accountancy, Economics & Business Studies exam as it's curated with latest ISC specimen papers. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Accountancy, Economics & Business Studies 2022-2023 includes 10 sample question paper which are further divided into 5 solved and 5 self-assessment papers which are strictly designed as per the latest CISCE syllabus & board specimen paper making it the best ISC reference book for class 11 English Paper-1, English Paper-2, Accountancy, Economics & Business Studies exam. On top of that, the ISC Class 11 sample Paper for English Paper-1, English Paper-2, Accountancy,

Economics & Business Studies 2022-2023 on-tips notes and revision notes for 1000+ concepts for quick and advanced revision. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Accountancy, Economics & Business Studies 2022-2023 also contains Mind Maps and Mnemonics for robust learning to prepare for ISC class 11 exams 2023. This best ISC reference book for the class 11 English Paper-1, English Paper-2, Accountancy, Economics & Business Studies exam contains 200+ MCQs and objective-type questions for robust practice and score maximum in the ISC exam. It contains proper explanations for all the ISC exam questions that students might encounter in exams. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Accountancy, Economics & Business Studies 2022-2023 will assist in understanding the dos and don'ts for the ISC class 11 exams. This ISC reference book for the class 11 English Paper-1, English Paper-2, Accountancy, Economics & Business Studies exam provides a holistic approach toward learning, and therefore, enhances the preparation level of stu-

dents making it the best ISC Class 11 sample Paper for English Paper-1, English Paper-2, Accountancy, Economics & Business Studies 2022-2023

This book presents modern approaches to improving the energy efficiency, safety and environmental performance of industrial processes and products, based on the application of advanced trends in Green Information Technologies (IT) Engineering to components, networks and complex systems (software, programmable and hardware components, communications, Cloud and IoT-based systems, as well as IT infrastructures). The book's 16 chapters, prepared by authors from Greece, Malaysia, Russia, Slovakia, Ukraine and the United Kingdom, are grouped into four sections: (1) The Green Internet of Things, Cloud Computing and Data Mining, (2) Green Mobile and Embedded Control Systems, (3) Green Logic and FPGA Design, and (4) Green IT for Industry and Smart Grids. The book will motivate researchers and engineers from different IT domains to develop, implement and propagate green values in complex systems. Further, it will

benefit all scientists and graduate students pursuing research in computer science with a focus on green IT engineering.

This book is an essential resource for any legal practitioner involved in any aspect of English arbitration law. It provides a thorough annotation of the Arbitration Act 1996, and contains comprehensive explanations of developments in the relevant case law to each section of the Act. Since the fourth edition of this book, the English courts have decided many important new cases on virtually every aspect of arbitration law. The most important developments relate to: The growth of anti-arbitration injunctions; The use of freezing injunctions against third party assets and the availability of anti-suit injunctions in EU proceedings; The definition of seat, the appointment of arbitrators, choice of applicable law, jurisdiction, the form of the award and the slip rule; Enforcement of foreign awards, and challenges to domestic awards by way of jurisdictional attacks, serious irregularity or error of law. In this 5th edition, the notes to each section contain helpful sub-headings and a new Appendix will

contain a fully annotated version of CPR Part 62 and the Practice Direction. The book will also be useful for academics and university students of law at all levels seeking an understanding of the 1996 Act, including those on the Legal Practice Course. An Industry Perspective on Key Tunable Technologies and Applications Tunable RF Components and Circuits: Applications in Mobile Handsets provides a technical introduction to the state of the art in tunable radio frequency (RF) components, circuits, and applications and discusses the foundational work that has been done to date. Leading practitioners in the field share their expertise on tunable devices in mobile handset applications. Through these practical viewpoints, readers discover how to use tunable RF techniques and devices to develop successful product designs. A substantial portion of the book focuses on antennas and antenna tuning, reflecting the dominance of the antenna tuning application in today's commercial market for tunable RF. The book explains how RF-microelectromechanical systems (RF-MEMS), barium strontium titanate (BST), silicon-on-insulator (SOI)

field effect transistors (FETs), and high-performance complementary metal oxide semiconductors (CMOS) are used as enabling technologies for tunable functions in current and next-generation radio architectures. The book also describes power amplifier envelope tracking, an emerging and important technique for improving efficiency; presents a network operator's perspective on the evolution of the handset front end; and explores emerging approaches to production testing of wireless devices.

This book provides an introduction to digital storage for consumer electronics. It discusses the various types of digital storage, including emerging non-volatile solid-state storage technologies and their advantages and disadvantages. It discusses the best practices for selecting, integrating, and using storage devices for various applications. It explores the networking of devices into an overall organization that results in always-available home storage combined with digital storage in the cloud to create an infrastructure to support emerging consumer applications and the Internet of Things. It

also looks at the role of digital storage devices in creating security and privacy in consumer products.

Full-color guide to the exciting HTC Droid ThunderBolt! Now that you've got your high-powered new HTC ThunderBolt smartphone, you've got to figure out how to use it! If you're more than a little intimidated by the technology and somewhat put off by the formal documentation, this book can help. Written in the fun but clear and thorough For Dummies style, this book answers all your questions about Verizon's first 4G LTE Android device and helps you get the very most out of it. Helps you get up to speed quickly on how to use the ThunderBolt smartphone Delves into the basics?how the technology works, how to configure everything, and how to purchase apps through the Android Market or Verizon's AppSphere Delivers a full slate of how-tos, tricks, features, and techniques, all in full color Covers everything you need to know, including setup and configuration, texting, e-mailing, accessing the Internet, maps, navigation, camera, video, and synching with a PC Shows you how to customize your

HTC ThunderBolt, how to maintain it, and how to expand or upgrade it with new software Once you learn all the bells and whistles, you'll be overjoyed with your new Android device. The fun starts with HTC ThunderBolt For Dummies.

This book is a printed edition of the Special Issue "LC-MS/MS Method for Mycotoxin Analysis" that was published in Toxins

The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCI 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCI 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area

of human-computer interaction, addressing the following major topics: adaptive, personalised and context-aware interaction; computational vision in HCI; emotions in HCI; biophysiological aspects of interaction.

IT changes everyday's life, especially in education and medicine. The goal of ITME 2014 is to further explore the theoretical and practical issues of Ubiquitous Computing Application and Wireless Sensor Network. It also aims to foster new ideas and collaboration between researchers and practitioners. The organizing committee is soliciting unpublished papers for the main conference and its special tracks.

This book provides the foundations for understanding hardware security and trust, which have become major concerns for national security over the past decade. Coverage includes issues related to security and trust in a variety of electronic devices and systems related to the security of hardware, firmware and software, spanning system applications, online transactions and networking services. This serves as an invaluable reference to the state-of-the-art research that is of critical signifi-

cance to the security of and trust in, modern society's microelectronic-supported infrastructures.
