73F2YL - NORRIS MIDDLETON

Car Engine Cooling for 2014 Hyundai i10 for sale | eBay

If it isn't, you'll need to top it up... TOPPING UP YOUR ENGINE COOLANT. To top up your engine's coolant, you can simply open the reservoir cap (be careful the engine is not too hot and use a cloth wrapped around the cap to open it, as there could be some residual pressure left in the system) and add to the fluid level - what you use to do this is very important though.

Hyundai | myHyundai | How To Check And Fill Coolant - YouTube

Your i10's cooling system works by cycling the engine coolant from the engine through the radiator. The water pump pushes the water through the entire system. The thermostat opens up once the engine reaches operating temperature and allows coolant in. If any part of this system fails, your i10 will eventually overheat.

Recommended antifreeze for radiators of Hyundai i10. Find out how much coolant does your car need. Car A Rac presents recommended by manufacturers types for all pop-

ular vehicles.

Recommended antifreeze for radiators of Hyundai i10. Find out how much coolant does your car need. Car A Rac presents recommended by manufacturers types for all popular vehicles.

What Type of Antifreeze & Coolant for Hyundai i10. How Much

Coolant, also called antifreeze or radiator fluid, circulates through your Hyundai's engine. Locate the coolant expansion (overflow) tank in the front, left of the engine bay. It is next to the oil dipstick, has a black cap and is tan in colour. Inspect the fluid level indicator on the side of the tank.

How to Fill Coolant in a Hyundai

Coolant, also called antifreeze or radiator fluid, circulates through your Hyundai's engine. This regulates the temperature and prevents the engine from reaching temperatures that could damage it. Over time, it is common for coolant to evaporate or even leak a small amount of fluid from

the overflow tank.

Coolant, also called an-
 tifreeze or radiator fluid,

circulates through your
 Hyundai's engine. Locate
 the coolant expansion
 (overflow) tank in the
 front, left of the engine
 bay. It is next to the oil
 dipstick, has a black cap
 and is tan in colour. In-
 spect the fluid level indica-
 tor on the side of the
 tank.

Coolant, also called an-
 tifreeze or radiator fluid,
 circulates through your
 Hyundai's engine. This reg-
 ulates the temperature
 and prevents the engine
 from reaching tempera-
 tures that could damage
 it. Over time, it is com-
 mon for coolant to evapo-
 rate or even leak a small
 amount of fluid from the
 overflow tank.
