As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Will 'making a Living' remain a dream for the deprived and excluded? Jobs are one of Europe's most important problems. Employment provides the basic means of distributing wealth in society, in providing for

families, and ensuring pensions for the elderly. Yet unemployment, and increasingly 'non-employment', continues at near record levels in the European Union. Making a Living in Europe shows how the culture of work has been transformed in the industrialised nations of the EU. Exploring the relationship between employment change, society and economic restructuring, the shift toward 'flexible' work for women in services, away from traditional industrial jobs for men, is demonstrated within three key sectors: business services, retailing and tourism. The outcome of change is discussed in terms of shifts of people and jobs from urban to rural areas. Europe must be understood in the context of the new Europe, of change in the USA and of

global change. Drawing on examples from UK and European Regions and USA, the author challenges long-standing assumptions about changes in economy and society and highlights the need for stronger local and European policies to reduce inequality at large and contribute positively to local people's struggles to make a living in Europe.

Support your students to achieve their best grade with the ultimate course companion; providing clear and concise explanations of all syllabus requirements, with exam practice questions to check understanding and consolidate revision. - Fully prepare for the final assessment with examiner advice on how to approach and explore each topic, including additional top

tips and common mistakes. - Practice and revise effectively from a range of strategies and a variety of high achieving example answers. - Focus revision by using key terms with definitions listed for each topic and subtopic of the course. - Answers available to download for free: www.hoddereducation.co.uk/ib-extras

The 2009-10 volume of the formal governing regulations of the University of Cambridge, annually updated.

Textbook for IB Diploma Geography covering Standard and Higher Level Option 5 for Paper 1 examinations.

The International Year of Planet Earth (IYPE) was established as a means of raising worldwide public and political awareness of the vast, though frequently under-used, potential the Earth Sciences possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Gov-

ernmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of, and enhancing research in the Earth sciences on a global scale in both the developed and less-developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr. Ted Nield and Dr. Henk Schalke (all four being core mem-

bers of the Management Team at that time) drew up outlines of a Science and an Outreach Programme. In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the "Year" grew into a triennium (2007–2009).

Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time, effort and money in order to become authorised. This manual is a resource for schools already offering the diploma, as well as for prospective diploma schools.
