#### The Secret to the New IBM Cloud Pak for Multicloud ...

IBM® Cloud Management Console for Power Systems™ is a software as a service (SaaS) offering that provides enterprise-wide performance, inventory, and logging insight for IBM Power Systems servers. This SaaS offering gives clients a central enterprise-wide view of their Power Systems servers without having to install or maintain software at their data center.

IBM Cloud Management Console for Power Systems can provide customers with these aggregated views and insights into their data by leveraging IBM's cloud platform and analytics engines without the need to install any new software and with minimal setup.

Google Cloud Platform lets you build, deploy, and scale applications, websites, and services on the same infrastructure as Google.
