The Samsung Galaxy S10 is set to be revealed on February 20. This is based on reports about any new features, the specs, the number of variants of the device, and hardware design upgrades. According to reports, there will be four variants of the S10; Galaxy S10 X, Galaxy S10+, Galaxy S10, and Galaxy S10 Lite. The Galaxy S10 X will have 5G connectivity so it will most likely be launched only where there are 5G networks. Each of the Galaxy S10 series phones will have a different display size. The S10 X is expected to have a huge amount of RAM. There are not enough details about the specs but there is little information about display sizes. Samsung is likely to use the Snapdragon 855, Qualcomm's latest chipset in the flagship phones.

"There is science and there is religion and never the twain shall meet." Is that to be the fate of these two disciplines? Having one foot in the religious world and the other in the scientific can be as precarious as attempting to remain astride two logs in a river. In this sequel to A User's Guide to Our Present World: What Everyone Should Know about Religion and Science, complexions of what religion and science look like today are investigated. It discusses topics from Jesus and family values, evangelists who arrive at your door, discrimination and racism, and the dark side for religion, to delicate balances impacting us and the world, climate change, the pandemic, and how ancient structures like Stonehenge and the pyramids could have been built for science. The study then turns to theological implications of scientific theories, including relativity and quantum. Sure to ruffle the feathers of some from both sides, the examination focuses on how scientific paradigms fail to cohere with traditional theological doctrines and presents the potentially uncomfortable view that scientific revolutions might warrant a corresponding revolution for theology itself.

Introduction to Cyber Security is a handy guide to the world of Cyber Security. It can serve as a reference manual for those working in the Cyber Security domain. The book takes a dip in history to talk about

the very first computer virus, and at the same time, discusses in detail about the latest cyber threats. Lao Tzu said, "A journey of a thousand miles begins with a single step." But the journey of imagination begins with a single idea—one that can shape entire worlds, if you so choose. And no one knows that better than bestselling fantasy author Richard C. White, who brings his expertise for world building to this reference guide for

writers interested in crafting their own storytelling environments. In *Terra Incognita*, White outlines the detailed steps by which writers can create the sort of countries, populations, governments, and militaries that are essential for building a three-dimensional fantasy world that will engage readers. You'll learn how to: Avoid the pitfalls of naming characters, regions, and countries Apply the technique of "outside in" to develop and then refine ideas for your world Create a world your readers can relate to, regardless of its technological levels Identify how to create backstories and conflict by observing how your world comes together Add details to make your story richer without overwhelming your readers Identify useful resources for research With the inspiration provided by *Terra Incognita: A Guide to Building the Worlds of Your Imagination*, you'll soon be on your way to constructing the framework for your own fantasy or science fictional realms—and taking readers along for the journey! Includes an exclusive interview with New York Times bestselling fantasy author Tracy Hickman."

One Day at a Time meets Mindy Kim in this first book in a charming new chapter book series about Catalina Castaneda, a Mexican American girl with a magical sewing kit! Catalina Castaneda is not persnickety, even though that's what her parents and sister, Coco, like to think. Catalina just likes things the way she likes them—perfect. That's why it's very hard to hide her disappointment when her glamorous Tía Abuela, a famous telenovela actress, gives her an old sewing kit for her eighth birthday. However, Catalina soon discovers the sewing kit isn't as boring as she thinks—it's magic, turning ordinary clothing into magical disguises. When Tía Abuela's most famous costume has rhinestones stolen from it where it's being displayed at the local library, Catalina gets to work on creating the perfect disfraz (disguise) to track down the thief. But, as Tía Abuela warned her, the magic is only as strong as her stitches, and Catalina doesn't always have the patience for practice...

The latest iPhone models were released on September 19th in the United States and the United Kingdom, and according to Apple, are the "biggest advancements in iPhone history." It's a clever play on words, as the new models both sport much larger screens than the iPhones of yesteryear. Whereas the iPhone 4S and below had a meager 3.5 inch screen (considered generous at the time), the iPhone 5, 5S and 5C were stretched out to 4 inches. Faced with stiff competition from Android flagships that have long featured big screens, the iPhone 6 and 6 Plus are Apple's authoritative answer to the growing number of iOS fans restlessly awaiting their own big phones. The new phones are powered behind the scenes by Apple's latest software release, iOS 8, which also brings many features and changes with it. This guide is designed to walk you through the most important parts of the phone, from the basics and learning how to navigate through the phone, to more advanced features like setting up email accounts and understanding what the cloud really is. Towards the end, a list of the 20 top paid and free applications will be available to add many different functionalities to your phone once you are comfortable enough with it.

The Access to Global Online Research in

Agriculture (AGORA) User guide provides in-depth information about the AGORA programme including its background, content, how to join, eligibility details, partners and impact. The user guide also includes step-by-step instructions on how to access and efficiently utilize the AGORA content portal for current users, along with answers to troubleshooting issues. This publication will help to increase AGORA's target audience (interested and registered public institutions in low-income countries) ability to utilize the AGORA platform efficiently, providing them with free or low-cost access to thousands of major scientific journals, electronic books and other resources from the world's leading academic publishers in the fields of agriculture, fisheries, food, nutrition, veterinary science and related biological, environmental and related social sciences. The goal of the guide, and how it contributes to FAO's Strategic Objectives and priorities is to improve the quality and effectiveness of access to agricultural research, education and training in low-income countries, and in turn, improve food security. Through the proper use of the AGORA programme and content platform, researchers, policy-makers, educators, students, technical workers, and extension specialists have digital access to high-quality, relevant and timely agricultural information.
