Here we introduce a simple, flexible, and robust data storage and retrieval method based on sequence alignment of the genomic DNA of living organisms. Duplicated data encoded by different oligonucleotide

sequences was inserted redundantly into multiple loci of the *Bacillus subtilis* genome.

### **Alignment-Based Approach for Durable Data Storage into ...**

Information retrieval (IR) is the activity of obtaining information system resources that are relevant to an information need from a collection of those resources. Searches can be based on full-text or other content-based indexing. Information retrieval is the science of searching for information in a document, searching for documents themselves, and also search-

ing for the metadata that ...
