The outer spirals are the 9 "Parts of Parts" octaves of Scale-2, also supported on spokes from the 4 Fundamental Points of the inner octaves of Scale-1. The vertical scale of this model is a multiple of the logarithm (base 2) of the frequencies of the notes, so that all doubling octaves in Scale-1 are the same in height.

INNER OCTAVES PIANO STUDIO I believe in the transcendental nature of music. I wish to inspire my students to discover their "inner sound". Music is for every human being. It is much like a life journey - our inner octaves take us from note to note, passing through ...

Wilson and McArdle (2014) report that for more than 50 years, audiologists and dispensers have been taught if the octave frequencies (250, 500, 1000, 2000, 4000, and 8000 Hz) provide thresholds that are less than 20 dB apart, there is no need to test the inter-octave-frequencies (750, 1500, 3000, and 6000 Hz). This clinical protocol is called the "20 dB Rule." Despite Wilson and McArdle ...

In other words, the inner triangle also represents the provision of the 'shocks' necessary for a single octave to continue to completion. In another sense, although every 'complete' being is an enneagram, many phenomena exist only on one level and the inner triangle is also limited to that level.

Thumbs also carry an important role in octave playing. It's an idea to practice inner parts alone using thumbs, in the same way as working at the outer notes with fourth or fifth fingers. Inner parts guide octaves and if worked at thoroughly, can support pianists in gaining control of the keyboard as well as the work being studied.
