IBIEAL - RAY BENTON

Interest Rate Caps, Floors and Collars are option-based Interest Rate Risk Management products. These option products can be used to establish maximum (cap) or minimum (floor) rates or a combination of the two which is referred to as a collar structure. These products are used by investors and borrowers alike to hedge against adverse interest rate movements.

The CBA also decided to keep the interest rate cap at the level of 12 percent and the interest rate floor at the level of 8 percent. Azerbaijan's Central Bank keeps discount rate unchanged Adding an interest rate floor to the asset side of the pension balance sheet can offset much of the risk, in this case.

Interest rate caps and floors are option like contracts, which are customized and negotiated by two parties. Caps and floors are based on interest rates and have multiple settlement dates (a single data cap is a "caplet" and a single date floor is a "floorlet").

The maximum interest rate that may be charged on a contract or agreement. For example, an adjustable-rate mortgage may have an interest rate ceiling stating that the rate will not go over 9% even if the formula used to calculate the interest rate would have it do so. An interest rate ceiling reduces the risk of the party paying the interest.
