Inhaltsangabe:Abstract: Germany is Russia s biggest trade partner. According to Russian official statistics, Russia imported 8.1% from and exported 13.4% to Germany in 2006. For Germany, Russia ranks eighth in overall trade volume, with exports about 23 Billion Euro and imports about 30 Billion Euro. Due to high prices for oil and gas, which amount for roughly 60% of Russian exports, the statistics indicates a negative trade balance for Germany since 2003. Germany is Russia s oldest trade partner, as well. No other West-European country has the same history of cultural, social and economical exchange with Russia as Germany does. The very term `German´ in Russian language was century long the word for all `foreigners´. Having left behind a century of forced antagonism, both countries are nowadays converging steadily. Today, the Russo-German trade relationships become more and more important for both countries. This paper focuses on the strategies German companies pursue on the Russian market. The fundamental question is empirical in nature: What have German companies done in Russia? . The ultimate aim, however, is to gain empirical evidence for theoretical reasoning: What should German companies do in Russia? . The paper consists of three parts. The first part gives a brief overview over Rus-

so-German trade relations and Direct Foreign Investment. The Second part describes the legal, social and cultural environment in Russia and how German companies cope with it. The third part focuses on their strategy in response to their aims and to the environment. Course: Principles of Management is the introductory course taken by most undergraduate business majors. Almost every text/course is organized around the four functions of management: planning, leading, organizing, and controlling (PLOC). What makes the texts different are their approach to the subject (principles vs. OB focused) and their strengths of coverage (high/strategic vs. low level/applied/skills). The aim of this text is to show how the four functions interact.

This book demonstrates how the theories and insights of anthropology have positively influenced the conduct of global business and commerce, providing a foundation for understanding the impact of culture on global business, and global business on culture.

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

In today's increasingly globalized context of business, significantly richer theories from interdisciplinary perspectives are needed to explain the complexity of the interplay between multiple facets of language and how they affect day-to-day operations. Today, with the pervasive impact of globalization and liberalization sweeping across the globe, exerting its influence on both the developed and the developing nations, business is no more confined to the national borders of a country. More and more companies are spreading their business to markets abroad (for example, Tata Consultancy Services and Infosys Technologies spreading their business to USA and elsewhere) or acquiring new companies (for instance, Tata acquiring the Corus and the Land Rover and Jaguar, or reversely, Vodafone acquiring Hutch). International business, therefore, has become such an important area of study for students of management and commerce. This comprehensive and easy-to-read text tries to lay bare the ramifications and complexities of international business. Divided into six sections, the book provides a harmonious blend of concepts and applications of international business. What distinguishes the text is the emphasis it lays on the Indian cases and the Indian scenario through the provision of many cases and illustrative examples. However, the book goes beyond the Indian context by giving international cases, thus imbuing the text with a global business flavour. Key Features □ The case studies discussed include the cases such as Tata Motors, Hindustan Unilever, Ranbaxy, McDonald, Nokia, Microsoft and Walt Disney. □ The opening case in each chapter introduces the students to a real-life example, followed by the text which provides the theoretical knowledge on the subject. The concluding case study correlates the theoretical knowledge with the real-life situation. □ Review questions are cited after every case study to check students' comprehension of the subject. Primarily intended as a text for undergraduate and postgraduate students of Business Administration, MBA, MIB and postgraduate students of Commerce, the book would be of great value also to practising managers.
