TestSoup's Parent Guides are specially designed for parents looking to support their students at home. This eBook is designed for 7th graders who are looking for extra support in math. We have compiled a collection of materials that have been designed to strengthen the basic skills needed for success in the 7th grade with Common Core math. You can use this book to learn about the basic skills they need to master as well as do practice problems with fully explained answers with your student at home. Premium Content Aligned to the Common Core Our eBook Study Guide helps students master Common Core Standards and push themselves with more challenging problems. Mini-lessons on every Common Core strand. Practice questions and answers aligned with new Common Core standards. Overviews of each strand within the Common Core that will tell you what you need to know, what you will be learning, and what you should expect to see in the Common Core. Great for teachers, parents, and students who are new to the Common Core! Superior User Interface Bookmark

pages you want to revisit Make notes with our easy-to-use annotations tool Highlight important passages or questions with our highlight tool Adjust font size Skip to the last page read, or navigate using our table of contents Intuitive hyperlinks allow for intuitive and efficient navigation Content Outline Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from the new common core standards, for each of the following: Expressions & Equations Creating & solving expressions with whole number exponents Creating & solving expressions based on written descriptions Creating equivalent expressions Identifying equivalent expressions Creating expressions using variables to represent unknown numbers in word problems Solving equations & inequalities Using variables to write & solve equations for real world situations Writing inequalities to represent real life situations Determining relationships between variables in order to solve word problems Geometry Finding the area of polygons Finding the area of right rectangular prisms Drawing polygons in a coordinate plane Using 2d nets to represent 3d shapes & find surface area

The Number System Dividing fractions Multiplying multi-digit numbers Adding, subtracting, multiplying & dividing decimals Finding greatest common factors and least common multiples Using positive & negative numbers to represent opposite values or directions Rational numbers as part of the number line Ordering & absolute value of positive & negative numbers Finding the distance between 2 points on a coordinate plane Ratios & Proportions Understanding ratios & using them to describe relationships Using unit rates to describe relationships between 2 quantities Using ratios to solve real world problems Statistics & Probability Identifying & creating statistical questions Describing the distribution of data with center, spread, or overall shape Describing the distribution of data with measures of center and measures of variability Recognizing & generating graphs to represent statistical data Summarizing data sets in relation to the question asked

This book, with over 250 problems, covers the following topics: Whole Numbers, Operations with Whole Numbers, Decimals, Integers, Graphing, Fractions, Measurements, Functions and Probability, Geometry, and more! If you are home schooling (or if you are just trying to get extra practice for your child), then you already know that math workbooks and curriculum can be expensive. Home School Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. Each section of this book may also be purchased individually by searching for the section and "For Sixth Graders."

The PISA 2003 Assessment Framework presents the conceptual underpinning of the PISA 2003 assessments. Within each assessment area, the volume defines the content that students need to

acquire, the processes that need to be performed and the contexts in which knowledge and skills are applied.

Over 50 discussion questions and activities, and 300 questions, fill this comprehensive workbook. The book covers science, math and social science for Third grade. If you are homeschooling (or if you are just trying to get extra practice for your child), then you already know that social science workbooks and curriculum can be expensive. Homeschool Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. Each subject may also be purchased individually.

Total Math and Reading for grade 2 is a must-have, comprehensive guide to skill mastery. This standards-based resource provides a variety of challenges, practice, puzzles, games, and activities to help children learn time, money, addition, subtraction, phonics, parts of speech, and more. The Total Math and Reading series for grades PreK-2 boosts school skills while keeping children engaged with at-home learning! Designed to establish and support a strong foundation in math and reading, each book offers challenging, grade-appropriate lessons with clear explanations, colorful art, and skill-sharpening practice. Challenging extension activities are included to help children enhance critical-thinking skills.

TestSoup's Parent Guide to 5th Grade Advanced Math has been specifically designed to support parents as they work with their students on advanced math skills. This is a great tool to help parents push their students and challenge them beyond what they are doing in the classroom. The resources we have compiled into

this Parent Guide have been designed to help parents understand the Advanced math skills their students can learn to further challenge themselves. ~Premium Content~ *Our eBook Study Guide helps parents work with students to push themselves with more challenging problems. *Mini-lessons on every skill. *Hundreds of practice questions with fully explained answers. *Overviews of each skill that will tell you what you need to know, what you will be learning, and mini lessons to explain each one. *Great for parents looking to challenge their students in math! ~Superior User Interface~ *Bookmark pages you want to revisit *Make notes with our easy-to-use annotations tool *Highlight important passages or questions with our highlight tool *Adjust font size *Skip to the last page read, or navigate using our table of contents *Intuitive hyperlinks allow for intuitive and efficient navigation ~Content Outline~ Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from these advanced skills, for each of the following: -Expressions & Equations- *Creating & solving expressions with whole number exponents *Creating & solving expressions based on written descriptions *Creating equivalent expressions *Identifying equivalent expressions *Creating expressions using variables to represent unknown numbers in word problems *Solving equations & inequalities *Using variables to write & solve equations for real world situations *Writing inequalities to represent real life situations *Determining relationships between variables in order to solve word problems -Geometry- *Finding the area of polygons *Finding the area of right rectangular prisms *Drawing polygons in a coordinate plane *Using 2D nets to represent 3D shapes & find surface area -The Number System- *Dividing fractions *Multiplying multi-

-digit numbers *Adding, subtracting, multiplying & dividing decimals *Finding greatest common factors and least common multiples *Using positive & negative numbers to represent opposite values or directions *Rational numbers as part of the number line *Ordering & absolute value of positive & negative numbers *Finding the distance between 2 points on a coordinate plane -Ratios & Proportions- *Understanding ratios & using them to describe relationships *Using unit rates to describe relationships between 2 quantities *Using ratios to solve real world problems -Statistics & Probability- *Identifying & creating statistical questions *Describing the distribution of data with center, spread, or overall shape *Describing the distribution of data with measures of center and measures of variability *Recognizing & generating graphs to represent statistical data *Summarizing data sets in relation to the question asked

This book, with over 250 problems, covers the following topics: Number Sense, Addition/Subtraction, Fractions, Operations, Money, Shapes/Patterns, Length, Weight/Capacity, Probability, and more! If you are home schooling (or if you are just trying to get extra practice for your child), then you already know that math workbooks and curriculum can be expensive. Home School Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. The problem portion of the book may also be purchased.

Peterson's Private Secondary Schools: Traditional Day and Boarding Schools is everything parents need to find the right day or boarding private secondary school for their child. Readers will find hundreds of school profiles plus links to informative two-page

in-depth descriptions written by some of the schools. Helpful information includes the school's area of specialization, setting, affiliation, accreditation, subjects offered, special academic programs, tuition, financial aid, student profile, faculty, academic programs, student life, admission information, contacts, and much more.

Sponsored by Division 15 of APA, the second edition of this groundbreaking book has been expanded to 41 chapters that provide unparalleled coverage of this far-ranging field. Internationally recognized scholars contribute up-to-date reviews and critical syntheses of the following areas: foundations and the future of educational psychology, learners' development, individual differences, cognition, motivation, content area teaching, socio-cultural perspectives on teaching and learning, teachers and teaching, instructional design, teacher assessment, and modern perspectives on research methodologies, data, and data analysis. New chapters cover topics such as adult development, self-regulation, changes in knowledge and beliefs, and writing. Expanded treatment has been given to cognition, motivation, and new methodologies for gathering and analyzing data. The *Handbook of Educational Psychology, Second Edition* provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, policy makers and the academic libraries serving these audiences. It is also appropriate for graduate level courses devoted to the study of educational psychology.

This report presents the conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge, skills and well-being. Like previous cy-

cles, the 2018 assessment covered reading, mathematics and science, with the major focus this cycle on reading literacy, plus an evaluation of students' global competence – their ability to understand and appreciate the perspectives and world views of others. Financial literacy was also offered as an optional assessment.

Carries readers into Chinese and American elementary and high school classrooms, and highlights the big differences between schooling in China and the United States. Nancy Pine reveals how these two countries need to extract themselves from outmoded practice and learn from each other's strengths.

Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. These nationally acclaimed titles ensure students' academic success with teachers and parents. The key to the Master Skills series is reinforcing skills through practice; using a contemporary

approach to learning fundamentals through real-life applications. The workbooks in this series are excellent tools to prepare young learners for proficiency testing and school success. Answer keys included.

Lists and describes schools in the United States and Canada

Summer Link Math Plus Reading is designed to be a fun way to help a child prepare for the grade ahead during the summer. Each 320-page book includes fun learning activities covering a range of topics in math and reading. The activities review skills from the previous grade and gradually increasing in difficulty to prepare a child for the grade ahead. --Summer Link Math Plus Reading is designed for parents looking for a fun and affordable way to help their children stop the summer learning slide and prepare for the grade ahead during the 10 weeks of summer. The easy-to-use full-color activities review and extend essential skills and increase confidence at school. A Test Practice section at the end of each book provides tips and practice for standardized tests and will allow the child to review the topics covered. A skills checklist for parents, a recommended summer reading list, and an answer key are also included.

TestSoup's Parent Guide to 6th Grade Math has been specifically designed to support parents as they work with their students on challenging math skills. The resources we have compiled into this Parent Guide have been designed to help parents understand what students are learning at school and how to best help them at home. 6th Grade Math can be tough, so let us work with you to develop a strong understanding of what is expected from your students with these new standards and skills! Premium Content Our eBook Study Guide helps you practice and master the 6th

grade math skills. This study guide has been designed specifically for 6th grade students so that you can use this as a resource independently, for extra support and practice in math. It includes: Mini-lessons for each skill with a sample problem. Practice questions and fully explained, easy to follow answers Overviews of each skill that will tell you what you will be learning, important vocabulary, and practice problems for that skill. Superior User Interface Bookmark pages you want to revisit Make notes with our easy-to-use annotations tool Highlight important passages or questions with our highlight tool Adjust font size Skip to the last page read, or navigate using our table of contents Content Outline Lessons, vocabulary, practice problems & explanations, as well as a description of what you can expect, for each of the following: Expressions & Equations Creating & solving expressions with whole number exponents Creating & solving expressions based on written descriptions Creating equivalent expressions Identifying equivalent expressions Creating expressions using variables to represent unknown numbers in word problems Solving equations & inequalities Using variables to write & solve equations for real world situations Writing inequalities to represent real life situations Determining relationships between variables in order to solve word problems Geometry Finding the area of polygons Finding the area of right rectangular prisms Drawing polygons in a coordinate plane Using 2d nets to represent 3d shapes & find surface area The Number System Dividing fractions Multiplying multi-digit numbers Adding, subtracting, multiplying & dividing decimals Finding greatest common factors and least common multiples Using positive & negative numbers to represent opposite values or directions Rational numbers as part of the number line Ordering & ab-

solute value of positive & negative numbers Finding the distance between 2 points on a coordinate plane Ratios & Proportions Understanding ratios & using them to describe relationships Using unit rates to describe relationships between 2 quantities Using ratios to solve real world problems Statistics & Probability Identifying & creating statistical questions Describing the distribution of data with center, spread, or overall shape Describing the distribution of data with measures of center and measures of variability Recognizing & generating graphs to represent statistical data Summarizing data sets in relation to the question asked

**** WAGmob: An eBook and app platform for learning, teaching and training !!! **** WAGmob brings you, simpleNeasy, on-the-go learning eBook for "Grade 8 Math". The eBook provides snack sized chapters for easy learning. It provides a quick summary of essential concepts in Grade 8 Math via easy to grasp snack sized chapters: Rational Numbers, Square and Square roots, Cube and Cube Roots, Powers and Exponents, Ratio, Proportion and Percent, Profit and Loss, Simple Interest, Compound Interest, Linear Equation, Algebraic Expression and Identities, Factorization, Polygons, Triangles and its Properties, Congruence of Triangles, Quadrilateral, Practical Geometry, Mensuration, Statistics, Charts and Graphs, Probability. About WAGmob eBooks: 1) A companion eBook for on-the-go, bite-sized learning. 2) Over Three million paying customers from 175+ countries. Why WAGmob eBooks: 1) Beautifully simple, Amazingly easy, Massive selection of eBooks. 2) Effective, Engaging and Entertaining eBooks. 3) An incredible value for money. Lifetime of free updates! *** WAGmob Vision : simpleNeasy eBooks for a lifetime of on-the-go

learning.***** WAGmob Mission : A simpleNeasy WAGmob eBooks in every hand.***** WAGmob Platform: A unique platform to create and publish your own apps & e-Books.*** Please visit us at www.wagmob.com or write to us at Team@wagmob.com. We would love to improve our eBooks and eBooks platform.

Addition and Subtraction, Multiplication and Division, Fractions and Decimals, Money, Patterns, Metric System, Perimeter, Transformations and Symmetry, and more! If you are home schooling (or if you are just trying to get extra practice for your child), then you already know that math workbooks and curriculum can be expensive. Home School Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. Each topic of this book may also be purchased separately.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Math in a Minute for grade 5 includes essential math skills such as finding factors and multiples, analyzing patterns and relationships, and understanding the place value system. This 96-page workbook also includes adding, subtracting, multiplying, and dividing multi-digit whole numbers, identifying equivalent fractions and converting customary and metric measurements and more. -Math in a Minute has fun math activities with pages separated by skill, theme, and completion time. Activities range in complexity from 1 minute to 10 minutes depending on the grade level. This allows children to gradually build their way up to more and more intense work. The repetition gives children an opportunity to rein-

force basic skills and concepts. Beat the clock for fast-paced math practice!

Our 6th Grade Common Core Math eBook is designed to explain the Common Core Standards and provide students the opportunity to practice the basic skills needed to be successful when taking the new Common Core Assessments in the 2013-2014 school year. Students will prepare for the new Common Core Assessments by building proficiency in the basic skills needed for 6th Grade Math with: *Standard Overviews that explain each objective in easy to understand terms so you know exactly what your student will learn during the school year and what they need to know how to do to be on grade level *Vocabulary lists that help students become familiar with the math vocabulary they will work with during the year *Practice Problems for each standard that give students multiple chances to practice the various skills needed to be successful with Common Core *A full length diagnostic test for students to take at the beginning of the year to see which skills they already know and ones they will need to practice throughout the year *2 Full length practice tests for students to use throughout the year to track progress *Annotated answers for each and every problem in the diagnostic and practice tests that clearly explain how to solve each problem on the test This eBook is designed to align to the Common Core Standards and set students up for success on the PARCC and Smarter Balance Assessments. You can use this to pace your student through 6th grade or use this to give your 5th grader a head start or your 7th grader a review of the basics! Like us on Facebook Follow us on Twitter Keep an eye out for our new app set to launch on all iOS plat-

forms. Learn with our eBooks, study with our flashcard sets, practice with our practice test system, and connect with others taking the same test as you all in one place!

FIFTH GRADE: Covers basic concepts such as multiples, factors, area, research, and more and develops the skills your child needs for grade-level success. INCLUDES: Fun, educational activities in phonics, reading, language arts, writing, and math, plus review lessons, teaching suggestions to extend learning, and answer keys. ALL-INCLUSIVE: This all-in-one comprehensive resource provides an entire curriculum of instruction that improves academic performance - updated with relevant, high-interest reading passages and artwork. HOMESCHOOL FRIENDLY: This elementary workbook for kids is a great learning resource for at home or in the classroom and allows parents to supplement their children's learning in the areas they need it most. WHY CARSON DELLOSA: Founded by two teachers more than 40 years ago, Carson Delloso believes that education is everywhere and is passionate about making products that inspire life's learning moments.

Over 50 discussion questions and activities, and 300 questions, fill this comprehensive workbook. The book covers science, math and social science for fifth grade. If you are homeschooling (or if you are just trying to get extra practice for your child), then you already know that social science workbooks and curriculum can be expensive. Homeschool Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. Each subject may also be purchased individually.

Mathematics and Teaching uses case studies to explore complex and pervasive issues that arise in teaching. In this volume, school

mathematics is the context in which to consider race, equity, political contexts and the broader social and cultural circumstances in which schooling occurs. This book does not provide immediate or definitive resolutions. Rather, its goal is to provoke and facilitate thoughtful discussion about critical issues for professional decision-making in mathematics teaching. This is the 7th volume in *Reflective Teaching and the Social Conditions of Schooling: A Series for Prospective and Practicing Teachers*, edited by Daniel P. Liston and Kenneth M. Zeichner. It follows the same format as previous volumes in the series. Part I includes four case studies of classroom experiences: "Race and Teacher Expectations"; "Mathematics for All?"; "Culture and School Mathematics"; and "Politics and School Mathematics." Each case is followed by a space for readers' own reactions and reflections, school stakeholders' reactions, and a summary with additional questions for further discussion. Part II presents three public arguments representing different views about the issues that arise in mathematics teaching: conservative, liberal and radical multiculturalist. Part III offers the authors' reflections on the centrality of culture in teaching mathematics, resources and exercises for further reflection, and a bibliography for further reading. *Mathematics and Teaching* is pertinent for all prospective and practicing teachers at any stage in their teaching careers. It is appropriate for any undergraduate and graduate course addressing mathematics teaching issues.

Focus your curriculum to heighten student achievement. Learn 10 high-leverage team actions for grades 9–12 mathematics instruction and assessment. Discover the actions your team should take before a unit of instruction begins, as well as the actions and

formative assessments that should occur during instruction. Examine how to most effectively reflect on assessment results, and prepare for the next unit of instruction.

In *Interactive Notebooks: Math for fifth grade*, students will complete hands-on activities about expressions, patterns, decimals, fractions, volume, the coordinate plane, and more. The *Interactive Notebooks* series spans kindergarten to grade 5. Each 96--page book contains a guide for teachers who are new to interactive note taking, lesson plans and reproducibles for creating notebook pages on a variety of topics, and generic reproducibles for creating even more notebook pages. The books focus on grade-specific math or language arts skills and are aligned to current state standards.

Your child's summer partner in building grade 4 success! *Summer Link Math plus Reading* offers third-grade children skill-and-drill practice in key subject areas to help them get ready for fourth grade over the summer months. Aligned to state and national

As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are merging to create a new kind of classroom: *CrossActionSpaces*. Grounding its exploration of these co-located communication spaces in global empirical research, *Digital Didactical Designs* facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The *Digital Didactical Design* model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents

critical views of contemporary education, theories of socio-technical systems and behavior patterns, and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.

“What is important for citizens to know and be able to do?” The OECD Programme for International Student Assessment (PISA) seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills. As more countries join its ranks, PISA ...

Peterson's Private Secondary Schools is everything parents need to find the right private secondary school for their child. This valuable resource allows students and parents to compare and select from more than 1,500 schools in the U.S. and Canada, and around the world. Schools featured include independent day schools, special needs schools, and boarding schools (including junior boarding schools for middle-school students). Helpful information listed for each of these schools include: school's area of specialization, setting, affiliation, accreditation, tuition, financial aid, student body, faculty, academic programs, social life, admission information, contacts, and more. Also includes helpful articles on the merits of private education, planning a successful school search, searching for private schools online, finding the perfect match, paying for a private education, tips for taking the necessary standardized tests, semester programs and understanding the private schools' admission application form and process.

Summer Link Math Plus Reading is designed to be a fun way to help a child prepare for the grade ahead during the summer. Each 320-page book includes fun learning activities covering a

range of topics in math and reading. The activities review skills from the previous grade and gradually increasing in difficulty to prepare a child for the grade ahead. Summer Link Math Plus Reading is designed for parents looking for a fun and affordable way to help their children stop the summer learning slide and prepare for the grade ahead during the 10 weeks of summer. or navigate using our table of contents Intuitive hyperlinks allow for intuitive and efficient navigation Content Outline Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from the new Common Core standards, for each of the following: Expressions & Equations Creating & solving expressions with whole number exponents Creating & solving expressions based on written descriptions Creating equivalent expressions Identifying equivalent expressions Creating expressions using variables to represent unknown numbers in word problems Solving equations & inequalities Using variables to write & solve equations for real world situations Writing inequalities to represent real life situations Determining relationships between variables in order to solve word problems Geometry Finding the area of polygons Finding the area of right rectangular prisms Drawing polygons in a coordinate plane Using 2d nets to represent 3d shapes & find surface area The Number System Dividing fractions Multiplying multi-digit numbers Adding, subtracting, multiplying & dividing decimals Finding greatest common factors and least common multiples Using positive & negative numbers to represent opposite values or directions Rational numbers as part of the number line Ordering & absolute value of positive & negative numbers Finding the distance between 2 points on a coordinate plane Ratios & Proportions Understanding ratios & using them to describe relationships Using unit rates to describe relationships between 2 quantities Using ratios to solve real world problems Statistics & Probability Identifying & creating statistical questions Describing the distribution of data with center, spread, or overall shape Describing the distribution of data with measures of center and measures of variability

Recognizing & generating graphs to represent statistical data Summarizing data sets in relation to the question asked

Taken literally, the title "All of Statistics" is an exaggeration. But in spirit, the title is apt, as the book does cover a much broader range of topics than a typical introductory book on mathematical statistics. This book is for people who want to learn probability and statistics quickly. It is suitable for graduate or advanced undergraduate students in computer science, mathematics, statistics, and related disciplines. The book includes modern topics like non-parametric curve estimation, bootstrapping, and classification, topics that are usually relegated to follow-up courses. The reader is presumed to know calculus and a little linear algebra. No previous knowledge of probability and statistics is required. Statistics, data mining, and machine learning are all concerned with collecting and analysing data.

TestSoup's 7th Grade Math BOOST - Parent Edition has been specifically designed to support parents as they work with their students on math skills that might be particularly challenging for them. The resources we have compiled into this Parent Guide have been designed to help parents understand what students are struggling with and how to best help them at home. 7th Grade Math can be challenging, let us work with you to develop a strong understanding of what is expected from your students with these new standards and skills! ~Premium Content~ *Our eBook Study Guide helps give students extra help with 7th Grade Math and to help them develop the necessary basic skills needed to be successful with 7th grade math.. *Mini-lessons on every skill included in the eBook. *Hundreds of practice questions and full

explained answers. *Overviews of each skill that will tell you what you need to know, what you will be learning, and what you should expect to see in 7th Grade. *Great for parents who are looking to support their students who are struggling with math. ~Superior User Interface~ *Bookmark pages you want to revisit *Make notes with our easy-to-use annotations tool *Highlight important passages or questions with our highlight tool *Adjust font size *Skip to the last page read, or navigate using our table of contents *Intuitive hyperlinks allow for intuitive and efficient navigation ~Content Outline~ Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from this eBook in helping to build foundational skills, for each of the following: -Expressions & Equations- *Creating & solving expressions with whole number exponents *Creating & solving expressions based on written descriptions *Creating equivalent expressions *Identifying equivalent expressions *Creating expressions using variables to represent unknown numbers in word problems *Solving equations & inequalities *Using variables to write & solve equations for real world situations *Writing ine-
