Abstract Nursing shortage is an internationally recognized crisis and the biggest challenge in achieving the health system effectiveness. This paper sought to review literature on issues and trends in nursing administrations.

: Issues and Trends in Professional Nursing - Top Grade ...

To counter nursing shortages, electronic intensive care units (E-ICUs) were established, mostly in rural areas, to enable out-of-state nurses to monitor patients remotely via video camera. That's when hospitals and other healthcare facilities started to look to robotics and machines for some nursing tasks, like stocking rooms and even monitoring patients.

Emerging trends in nursing - American Nurse

Even before the pandemic, nurse educators were exploring creative ways to quickly grow the nursing workforce to alleviate the expanding nursing shortage. According to the World Health Organization report State of the World's Nursing 2020 , nurses constitute 59% of the healthcare workforce, and they predict that there needs to be an 8% yearly increase worldwide for the next 10 years to alleviate this shortage.
