KDL5ZP - LAM BURNETT

The number one dental title in the world, STURDEVANT'S ART & SCIENCE OF OPERATIVE DENTISTRY, is the book of choice for dental students and practitioners. Designed to be used by students throughout their dental education program and into professional clinical practice. Covers in detail the appropriate material needed to understand theory by using a heavily illustrated, step-by-step approach related to biological rationales. Both practical and scientific, this book is rich with restorative and preventive concepts fully supported by sound clinical and laboratory research. This is the most complete operative dentistry text on the market, integrating both theory and practice. Starting with dental anatomy and occlusion, STURDEVANT'S ART & SCIENCE OF OPERATIVE DENTISTRY presents the most current information on cariology, infection control, dental materials, and patient assessment -- including medical concerns. All chapters have been thoroughly revised to reflect the numerous changes that are occurring in dentistry. New techniques are presented so today's students and practitioners may incorporate them into their approach to providing the care that patients require and often demand. Provides discussion of treatment planning and reviews of topical issues Includes computer assisted design and computer assisted machining Incorporates procedural alternatives that offer the practitioner choices in performing each procedure Features new and contemporary 2 colour format and 1200 new illustrations Showcases the latest techniques in operative dentistry and four new chapters present the most important concepts of enamel and dentin adhesion as well as composite and amalgam restorations. Spanish version of 3rd edition also available, ISBN: 84-8174-187-6

This manual covers basic clinical techniques and background and contains practical instructions for more than 50 specific testing and examination techniques. It features informative tables, photographs, illustrations, and lists of suggested resources for more in-depth study.

Now a worldwide symbol of sweet indulgence, macarons seduce the senses with their delicate crunch and velvet filling. In this book French chef José Maréchal discloses the secrets of macarons, including the tips and techniques required to make these little treats. This book equips the reader with the skills to master nine classic flavours, and create their own signature macarons.

This annual publication includes a wide range of feature articles devoted to the design, development and service history of the world's fighting ships.

-- The leading dental title in the world fully revised and updated to meet the challenges and needs of dental students and practitioners into the 21st century. -- An all new contemporary two-color format, four 8-page sections of new full-color photographs plus over 1200 new illustrations. Designed to be used by students throughout their dental education program and into professional clinical practice. Starting with dental anatomy and occlusion, it presents the most current information on cardiology, infection control, dental materials, and patient assessment -- including medical concerns. New techniques are presented so today's students and practitioners may incorporate them into their approach to providing the care that patients require and often demand. -- More detailed discussion of treatment planning and materials selection and a new and consistent format. -- Updated information about diagnosis and treatment planning, cardiology, infection control, dental materials, and patient assessment. -- Addition of procedural alternatives. -- Deeper and broader review of concerns regarding mercury. -- Information on complex restorations -- Specific information on advantages disadvantages indications, and contraindications for amalgam and composite restorations. -- Chapter outlines presented at the beginning of each chapter with page numbers indicating where each topic is discussed. -- Fully incorporates computer-assisted design and computer-assisted machining (CAD/CAM). -- Comprehensive list of references concludes each chapter.

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components. The innovative Teacher Edition with CD allows a teacher to approach the teaching and learning of Science with confidence as it includes pages from the student book with wrap around teacher notes including answers, hints, strategies and teaching and assessment advice.

The General Maintainer Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: use of general maintenance skills; knowledge of a variety of trade fields such as carpentry, landscaping, painting, paving, roofing, structural and mechanical maintenance; working knowledge of materials, tools, equipment; and more.
