These models serve as the basis for designing your own karakuri or m. Originally published in Japan, Karakuri is an introduction to the simple mechanisms, such as gears, cranks, cams, and levers, used to bring to life these amazing moving paper models or automata. Included are pull-out pages for you to use to construct your own moving models of the different types of gears.

Karakuri: How to Make Mechanical Paper Models That Move by ...

Karakuri Kaizen is a mechanical device that generally improves work. The device uses only mechanical gadgetry, and shuns electric, hydraulic, or pneumatic power. It is also not controlled by a computer but rather by the design of the mechanics. At the Karakuri Kaizen Exhibition 2017 in Nagoya, I saw lots of neat examples. However, some of them included a bit of pneumatics or electric.

KARAKURI HOW TO MAKE MECHANICAL PAPER MODELS PDF

It originated with mechanical dolls in Japan, called karakuri ningyo. These dolls are first mentioned around 1500 years ago, but were most popular around 200 years ago. These dolls can be seen as the precursor to robots. The principles of Karakuri Kaizen are: Don't use the human hand. Move objects automatically. Don't spend money.

Karakuri, meaning 'trick' or 'mechanism', are mechanical automata pieces that were first made in Japan during the 17th century. Nakamura's craft mixes that tradition with kirigami, an art that combines paper cutting with origami or paper folding. Above, a sheep in wolf's clothing. Below, a surprised octopus:
