While traditional lab manuals simply offer core concepts on A&P topics, this one-of-a-kind resource presents material from easily understood comparisons to help you learn about A&P from a real-world point of view. Plus, hands-on activities experiments help link what you're learning today with how it may be used in your professional life. Labeling exercises help you memorize the small details of complicated body parts and processes. Practical experiments that center on your own physiological processes and knowledge of the world in general help you make connections between the text, lab, and the world around you. Numerous full-color illustrations and photomicrographs help you visualize difficult concepts and reinforce development of spatial perspective.

A streamlined, workbook-style approach to the A&P lab This full-color laboratory manual is designed for instructors who teach a two-semester anatomy & physiology lab course, but do not require the full range of laboratory exercises found in Marieb's best-selling Human Anatomy & Physiology Lab Manuals (Cat, Fetal Pig, and Main). This lab manual is written to complement Marieb's Anatomy & Physiology, Sixth Edition, but can be used with any two-semester text. Instructors will find 27 concise, activity-based lab exercises that explore fundamental concepts in anatomy & physiology and build students' observational and laboratory skills. Each lab is presented with learning objectives, cogent summaries of key concepts, and meaningful activities. For instructors who want their students to experience how to use a microscope, a complete exercise on its use and care can be found in Appendix A. The fully revised Sixth Edition provides a more active, workbook-style approach that incorporates more visual summary tables, streamlines information, and engages students with hands-on drawing and review activities. Each lab includes a list of materials needed for conducting the lab, a complete list of learning objectives at the beginning of each exercise to help students track their progress, and up-to-date terminology in accordance with Terminologia Anatomica and Terminologia Histologica. The lab manual also features a full-color, extensive Histology Atlas, integrated Review Sheets with new full-color art, and new art and photos that help bring A&P to life.

For the two-semester A&P laboratory course. Fully engage students in their A&P Lab experience Human Anatomy & Physiology Laboratory Manual: Making Connections distinguishes itself from other A&P lab manuals by focusing on and addressing the most common teaching challenges in the lab—getting students to engage in the lab, to prepare for the lab, and to apply concepts in the lab. Catharine Whiting's active learning approach incorporates a rich variety of hands-on activities and guided questions to get students engaged and asking questions. The 2nd Edition provides new features, such as "What You Need to Know Before You Start this Unit" at the beginning of each Unit and new Pre-Lab Video Coaching Activities to help students learn what they need to review before lab. Developed as the companion to Erin Amerman's Human Anatomy & Physiology, 2nd Edition, Whiting's lab manual reflects the same superb art program and terminology found in the Amerman textbook. Human Anatomy & Physiology Laboratory Manual: Making Connections, 2nd Edition is available in three versions for your students: Main, Cat and Fetal Pig. The Cat and Fetal Pig versions are identical to the Main version except that they include seven additional cat dissection and nine additional fetal pig dissection exercises, respectively, at the back of the lab manual.
