WORKSHEET - Observing Wind Patterns.pdf

Q. A belt of calms or light variable winds and subsiding air located near the center of the subtropical high. Legend states when water supplies ran low for sailors, animals were the first to be rationed water.

As a formative assessment, students show their understanding of global winds and jet streams by diagramming global winds and writing answers to follow up questions. My intention with these questions is for students to understand the impact of global winds in real life by recognizing wind patterns impact direction and speed of pilots flight plans.
