S4U713 - BROOKLYNN PITTS

This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought; the thread throughout Rost's book is that leadership was conceived of as good management. He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways. The ethics of leadership from a postindustrial perspective completes the paradigm. The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership.

"This book focuses on what qualities distinguish between First-Time Leadership and traditional leaders, while furthering leadership theories that look at other variables such as situational factors, knowledge base, skill levels, etc"--

Leadership is hard. How can you balance compassion for your people with effectiveness in getting the job done? A global pandemic, economic volatility, natural disasters, civil and political unrest. From New York to Barcelona to Hong Kong, it can feel as if the world as we know it is coming apart. Through it all, our human spirit is being tested. Now more than ever, it's imperative for leaders to demonstrate compassion. But in hard times like these, leaders need to make hard decisions—deliver negative feedback, make difficult choices that disappoint people, and in some cases lay people off. How do you do the hard things that come with the responsibility of leadership while remaining a good human being and bringing out the best in others? Most people think we have to make a binary choice between being a good human being and being a tough, effective leader. But this is a false dichotomy. Being human and doing what needs to be done are not mutually exclusive. In truth, doing hard things and making difficult decisions is

often the most compassionate thing to do. As founder and CEO of Potential Project, Rasmus Hougaard and his longtime coauthor, Jacqueline Carter, show in this powerful, practical book, you must always balance caring for your people with leadership wisdom and effectiveness. Using data from thousands of leaders, employees, and companies in nearly a hundred countries, the authors find that when leaders bring the right balance of compassion and wisdom to the job, they foster much higher levels of employee engagement, performance, loyalty, and well-being in their people. With rich examples from Netflix, IKEA, Unilever, and many other global companies, as well as practical tools and advice for leaders and managers at any level, *Compassionate Leadership* is your indispensable guide to doing the hard work of leadership in a human way.

Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to "educate the leaders of the future"- yet fail to give leadership its intellectual due? The *Handbook of Leadership Theory and Practice* seeks to bridge this disconnect. Based on the Harvard Business School Centennial Colloquium "Leadership: Advancing an Intellectual Discipline" and edited by HBS professors Nitin Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. More than a means of getting ahead and gaining power, leadership must be understood as a serious professional and personal responsibility. Featuring the thinking of today's most renowned scholars, the *Handbook of Leadership Theory and Practice* will be a catalyst for elevating leadership to a higher intellectual plane - and help shape the research agenda for the next generation of leadership scholars.

For more than three decades, Bernard Bass's handbook has been indispensable bible for every serious student of leadership. For thirty-three years and through three editions, Bass & Stogdill's *Handbook of Leadership* has been the indispensable bible for every serious student of leadership. Since the third edition came out in 1990, the field of leadership has expanded by an order of magnitude. This completely revised and updated fourth edition reflects the growth and changes in the study of leadership over the past seventeen years, with new chapters on transformational leadership, ethics, presidential leadership, and executive leadership. Throughout the *Handbook*, the contributions from cognitive social psychology and the social, political, communications, and administrative sciences have been expanded. As in the third edition, Bernard Bass begins with a consideration of the definitions and concepts used, and a brief review of some of the better-known theories. Professor Bass then focuses on the personal traits, tendencies, attributes, and values of leaders and the knowledge, intellectual competence, and technical skills required for

leadership. Next he looks at leaders' socioemotional talents and interpersonal competencies, and the differences in these characteristics in leaders who are imbued with ideologies, especially authoritarianism, Machiavellianism, and self-aggrandizement. A fuller examination of the values, needs, and satisfactions of leaders follows, and singled out for special attention are competitiveness and the preferences for taking risks. In his chapters on personal characteristics, Bass examines the esteem that others generally accord to leaders as a consequence of the leaders' personalities. The many theoretical and research developments about charisma over the past thirty years are crucial and are explored here in depth. Bass has continued to develop his theory of transformational leadership -- the paradigm of the last twenty years -- and he details how it makes possible the inclusion of a much wider range of phenomena than when theory and modeling are limited to reinforcement strategies. He also details the new incarnations of transformational leadership since the last edition. Bass has greatly expanded his consideration of women and racial minorities, both of whom are increasingly taking on leadership roles. A glossary is included to assist specialists in a particular academic discipline who may be unfamiliar with terms used in other fields. Business professors and students, executives in every industry, and politicians at all levels have relied for years on the time-honored guidance and insight afforded by the Handbook.

Books about leadership abound, often generalizing from a heroic leader's own experiences or reflecting the latest incremental advances in scholarly theorizing. *Rethinking Leadership* is different in that Ladkin questions the key questions of leadership thinking and thus arrives at a radically different conception of leadership. It is a welcome conception that recognizes the embodied, sensual, felt nature of leadership as an ongoing process involving leaders and followers within a particular context. For the complex and challenging times we live in, we need complex and challenging conceptions of leadership and Donna Ladkin has given us an excellent starting place. Steve Taylor, Worcester Polytechnic Institute, US Beautifully written, insightful and novel, this book departs nicely from mainstream views on leadership and can be strongly recommended to anyone wanting a new look on the complexities, meanings and dynamics of leadership and workplace relations. Mats Alvesson, Lund University, Sweden Donna Ladkin's inspiring and informed book breaks new ground in leadership studies. Writing lucidly, warmly and accessibly, Ladkin makes philosophy to bear on some key themes of leadership. Picking up concepts from philosophy's all-time greats, she enriches the existing leadership discourse powerfully. Questions of charisma, vision, indeed the nature of leadership itself, are cast in fresh settings, and they become alive. Skilfully avoiding becoming overtly abstract, with a keen eye to examples, Donna Ladkin delivers a delightful, elevating and original contribution to the rethinking of leadership. Esa Saarinen, Helsinki University of Technology, Finland Adopting a post-positivist phenomenological perspective inspired by the writings of Husserl and Heidegger among others, Donna Ladkin crafts a series of philosophical questions that prompt the reader to deconstruct and reposition many habitually held views of leaders and leadership. Through her deep questioning, Ladkin reminds us that wisdom the virtue of practical circumspection is central to the ethical and aesthetic moment of leading. *Rethinking Leadership* is a refreshing and much-needed re-evaluation of the field, which should be read by anyone with a serious interest in the subject. Peter Case, University of the West of England, UK Writing anything new about leadership might seem like a difficult task these days. Writing anything new and interesting about leadership might seem beyond most of us. Writing anything new, interesting and provocative about leadership is restrict-

ed to only a few very talented scholars. Ladkin is one of these very talented scholars she has done all three in a groundbreaking review of the nature of leadership and the questions we should be asking about this phenomenon. Keith Grint, University of Warwick, UK A must-read for serious leadership studies scholars, *Rethinking Leadership* offers a radical reconceptualisation of leadership as a contextually embedded, physically embodied phenomenon. The book arrives at original and surprising answers to perennial questions such as What is leadership? and How do leaders lead change?, by addressing them from a philosophical, rather than psychological or sociological standpoint. Beautifully written, Ladkin makes complex ideas accessible by illustrating them with practical examples drawn from her wide experience as a leadership academic and management consultant across a range of commercial, political and not-for-profit organisations. A fresh voice amongst the crowded field of leadership studies, *Rethinking Leadership* delivers not just new answers, but an entirely new way of thinking about leadership and its role in contemporary society.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

This book develops a new paradigm in the field of leadership studies, referred to as the "leadership-as-practice" (L-A-P) movement. Its essence is its conception of leadership as occurring as a practice rather than residing in the traits or behaviours of particular individuals. A practice is a coordinative effort among participants who choose through their own rules to achieve a distinctive outcome. It also tends to encompass routines as well as problem-solving or coping skills, often tacit, that are shared by a community. Accordingly, leadership-as-practice is less about what one person thinks or does and more about what people may accomplish together. It is thus concerned with how leadership emerges and unfolds through day-to-day experience. The social and material contingencies impacting the leadership constellation -- the people who are effecting leadership at any given time -- do not reside outside of leadership but are very much embedded within it. To find leadership, then, we must look to the practice within which it is occurring. The leadership-as-practice approach resonates with a number of closely related traditions, such as collective, shared, distributed, and relational leadership, that converge on leadership processes. These approaches share a line of inquiry that acknowledges leadership as a social phenomenon. The new focus opens up a plethora of research opportunities encouraging the study of social processes beyond influence, such as intersubjec-

tive agency, shared sense-making, dialogue, and co-construction of responsibilities.

Deals with a different dimension of workplace psychology, which is the basis of fulfilling, productive work.

This book is about leadership in organizations. The primary focus is on managerial leadership, as opposed to parliamentary leadership, leadership of social movements, or informal leadership in peer groups. The book presents a broad survey of theory and research on leadership in formal organizations. The topic of leadership effectiveness is of special interest.

The second edition of the Journal, a fully updated companion publication to Andy Buck's bestselling book 'Leadership Matters 3.0', supports readers in their reflections on their leadership style, to identify what is most useful for you in the context of their current role.

The development of leadership capacities addresses a vital and continuing need in communities and organizations as they attempt to adapt to a wide range of social, economic, environmental, and political changes. Leadership development activities that focus on building new skills and fostering new ideas directly shape local and organizational capacity. At the organizational level, leadership is a valued resource as organizations are faced with challenges of limited resources, funding, and other capacities. Community leadership operates within a different domain; an environment with different dynamics, structures, and goals. Community leadership is distinctive in that leaders often do not have formal training or authority to dictate and facilitate change. Instead, community leaders must rely on informal networks of diverse citizens, each with a unique local capacity, as the basis for change. This book brings together classic and contemporary articles drawn from Community Development. Divided into two sections, the book begins with a range of seminal leadership theory and conceptualization pieces. These have been instrumental in shaping leadership development in a wide range of settings. Following the theory section, a variety of research and application chapters are presented. These chapters operationalize theory through applied research and programming, and provide replicable frameworks for future research and programs. This book is a compilation of articles published in the journal Community Development. In this era of ever more complex policing issues and the changing nature of policing itself, senior police officers face a never-ending challenge to keep up not only with the latest reforms, but also with the latest research. *Police Leadership: Rising to the Top* looks at policing from the dual perspectives of academics and senior police practitioners, and creates a conversation between them about the issues, reforms, and research. It provides authoritative surveys of fields such as leadership, community engage-

ment, change management, utilizing policing research, and multi-agency working. Each leadership issue is allocated a chapter, with academic contributors presenting key ideas and concepts in their area of expertise, identifying leading contributions and research studies, and offering concise reviews of some of the most important literature in policing scholarship. This academic knowledge is juxtaposed with the views of senior police practitioners, who provide their own local knowledge and stories, reflecting on their achievements and challenges in leadership roles. Taken together, these discussions build bridges between the two worlds by encouraging 'shared reflections' that consider the importance of theory and practice for future leaders.

Communication is the absolutely indispensable leadership discipline. But, too often, leaders and professional communicators get mired in tactics, and fail to influence public attitudes in the ways that would help them the most. *The Power of Communication* builds on the U.S. Marine Corps' legendary publication *Warfighting*, showing how to apply the Corps' proven leadership and strategy doctrine to all forms of public communication — and achieve truly extraordinary results. World-renowned leadership communications expert, consultant, and speaker Helio Fred Garcia reveals how to orient on audiences, recognizing their centers of gravity and most critical concerns. You'll learn how to integrate and succeed with all three levels of communication: strategic, operational, and tactical. Garcia shows how to take the initiative and control the agenda... respond to events with speed and focus... use the power of maneuver... prepare and plan... and put it all together, becoming a "habitually strategic" communicator.

Complete your leadership toolkit with this inside look at high-level, executive positions *Hidden Truths: What Leaders Need to Hear But Are Rarely Told* delivers profound and rarely discussed insights about C-suite jobs that provide aspiring leaders with practical, new skills that will equip them for the immense challenges of their desired jobs. Through 14 illuminating chapters, accomplished Harvard Business School faculty member and former Senior Partner of McKinsey & Company sets out the essential habits that help leaders create success, time and time again. You'll learn: How to recognize the limits of monetary incentives for employees and colleagues To manage your relationships with members of the Board of Directors How to value and realize true diversity How to manage mergers and acquisitions properly, one of the most difficult parts of business leadership Perfect for managers, executives, and other business leaders with an eye on the C-suite, *Hidden Truths* also belongs on the bookshelves of people who already find themselves in a C-level position and wish to learn how to better manage the stresses and challenges of the job.

Supports the growing demand for courses in leadership and ensures that such courses and instruction are developed with multiple considerations and best practices in mind.

"Now in paperback, this national bestseller proves more than ever, your success as a leader isn't just about being great at business. You must be a great person, performing well in all domains of your life—including work, home, community, and your private self. The good news is that, contrary to conventional wisdom about "balance," you don't have to assume that these domains compete in a zero-sum game. *Total Leadership* is a game-changing blueprint for how to perform well as a leader not by trading off one domain for another, but by finding mutual value among all four. Stew Friedman shows you how to achieve these "four-way wins" as a leader who can be real, be whole, and be innovative. With engaging examples and clear instruction, Friedman provides more than thirty hands-on tools for using these proven principles to produce stronger business results, find clearer purpose in what

you do, feel more connected to the people who matter most, and generate sustainable change. *Total Leadership* is a unique resource that shows how to win in all domains of life. "--

In this business bestseller, how companies can adapt in an era of continuous disruption: a guide to responding to such acute crises as COVID-19. Gold Medalist in Business Disruption/Reinvention. When COVID-19 hit, businesses had to respond almost instantaneously--shifting employees to remote work, repairing broken supply chains, keeping pace with dramatically fluctuating customer demand. They were forced to adapt to a confluence of multiple disruptions inextricably linked to a longer-term, ongoing digital disruption. This book shows that companies that use disruption as an opportunity for innovation emerge from it stronger. Companies that merely attempt to "weather the storm" until things go back to normal (or the next normal), on the other hand, miss an opportunity to thrive. The authors, all experts on business and technology strategy, show that transformation is not a one-and-done event, but a continuous process of adapting to a volatile and uncertain environment. Drawing on five years of research into digital disruption--including a series of interviews with business leaders conducted during the COVID-19 crisis--they offer a framework for understanding disruption and tools for navigating it. They outline the leadership traits, business principles, technological infrastructure, and organizational building blocks essential for adapting to disruption, with examples from real-world organizations. Technology, they remind readers, is not an end in itself, but enables the capabilities essential for surviving an uncertain future: nimbleness, scalability, stability, and optionality.

This text offers comprehensive coverage of the design and use of qualitative methods in leadership research. The book equips leadership researchers at all levels with the knowledge to make informed choices of research strategies. The second edition features 50% new research and includes new developments in qualitative research methods.

The volume brings to life a number of the conference themes including corporate social responsibility, culture, academic integrity, vulnerability, health, military ethics, education, leadership, sustainability and philosophy and addresses concerns of many leading applied ethicists.

This book is the third volume in the *Leadership Horizons* series. This series, started by Jim Meindl, is devoted to new developments in theory and research on leadership within the context of continuing and emerging organizational issues. In this spirit, the present volume delves into implicit leadership theories (ILTs), and opens intriguing new avenues for research on ILTs, but does so while maintaining an eye on the past. For example, the book offers valuable historical perspectives from those who were "there" - Dov Eden and Uriel Leviatan share the inside scoop on the origination of the concept of ILTs, and Bob Lord traces the evolution of social-cognitive perspectives with respect to work on ILTs - while all authors raise interesting questions and offer important new directions to advance this work well into the future. It features a wide range of scholars and perspectives, and practical implications are implicit and explicit throughout the volume. The book offers a valuable resource for researchers, students, and practitioners interested in leadership and social cognition in the workplace.

This innovative book integrates traditional and new leadership theories—including transformational leadership, leader-member exchange, authentic leadership, servant leadership, self-leadership, shared and distributed leadership, identity theory, and the value of emotions and affect—to provide a comprehensive look at the many facets of effective leadership. Practical and fun to read, the book incorporates personal reflections and current business

examples to bring the theories of organizational leadership to life. In addition, engaging and relevant "Put it in Practice" features help students see how they can apply the leadership research to their own work lives, while leadership cases throughout demonstrate how real leaders have succeeded by applying the leadership principles discussed in the book. Written in a conversational style, the book is concise enough to be used in a case- or course pack-oriented course or in a modular program.

WINNER: CMI Management Book of the Year 2019 - Aspiring Leaders Category The best leaders are born, not made. The best leaders are always in control. The best leaders are those with the highest IQs. But are they really? The thinking surrounding what makes the greatest leaders is increasingly muddled by stereotypes, snake oil promises and pseudo-science. The best leaders rely on fact, not fads. *Myths of Leadership* blasts away the fluff and confronts false legends head on. Jo Owen uses the most credible research to analyze each myth, using international business case studies, leadership theory and insightful interviews, to uncover the truth. This is a compelling and practical examination of the most pervasive misconceptions about leadership that will help you elevate your own leadership abilities, better inspire your team and empower your organization by thinking differently. Entertaining but evidence-based, *Myths of Leadership* throws out the management jargon and skewers over-hyped leadership trends to bring you the best practical tips you need to become a better leader.

Why are some leaders effective, many ineffective, and only a very few exceptional? Chandler and Chandler argue that four common elements drive leadership effectiveness across all domains, cultures, and eras. Three of them are skills, and the fourth is the degree of a leader's selflessness. To illustrate the power of these elements, *On Effective Leadership* examines sixteen case studies of leaders in a range of fields, cultures, and historical settings. It concludes with the implications for followers, leaders, and leadership development.

With contributions from leading authors in the most important areas of current research, this book provides insight into the streams that are driving leadership theory and practice today. The Second Edition provides students with an updated and complete yet concise handbook that solidifies and integrates the vast and disparate leadership literature.

Too many companies are managed not by leaders, but by mere role players and faceless bureaucrats. What does it take to be a real leader—one who is confident in who she is and what she stands for, and who truly inspires people to achieve extraordinary results? Rob Goffee and Gareth Jones argue that leaders don't become great by aspiring to a list of universal character traits. Rather, effective leaders are authentic: they deploy individual strengths to engage followers' hearts, minds, and souls. They are skillful at consistently being themselves, even as they alter their behaviors to respond effectively in changing contexts. In this lively and practical book, Goffee and Jones draw from extensive research to reveal how to hone and deploy one's unique leadership assets while managing the inherent tensions at the heart of successful leadership: showing emotion and withholding it, getting close to followers while keeping distance, and maintaining individuality while "conforming enough." Underscoring the social nature of leadership, the book also explores how leaders can remain attuned to the needs and expectations of followers. *Why Should Anyone Be Led By You?* will forever change how we view, develop, and practice the art of leadership, wherever we live and work.

How can managers bring about optimum performance from the individuals in their organizations? What leadership techniques produce the most effective organizations? This book examines the

theory and practice of the dynamic and innovative style of transformational leadership. The transformational leader encourages followers by acting as a role model, motivating through inspiration, stimulating intellectually, and giving individualized consideration to their needs and goals. Chapters explore how transformational leadership affects important issues in today's organizations such as delegation, teamwork, decision making, total quality management and corporate reorganization.

This book presents a comprehensive overview of Black leadership in every aspect of American life, including movements for social justice, education, business, and politics. In the quest for human rights and social advancement, African-American leaders have emerged to lead the fight to overcome racial and economic barriers. This struggle has influenced the exercise of Black leadership in many other areas and the author uses an interdisciplinary approach to reveal the changes, continuities, and variety of African-American approaches to effective leadership. The book also suggests a theoretical framework for future research on the impact of Black leadership in America. A wide range of issues are considered in this volume, beginning with the definition of leadership and the concept of Black leadership. Gordon then considers outstanding examples of Black leadership in contemporary America in a variety of fields. Scholars and students in history, political science, and ethnic studies will find this an important resource for understanding Black leadership and its impact on American life.

These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. "The manager's job is to make human strength effective and human weakness irrelevant." —Peter F. Drucker "I am often asked by management students and middle managers, 'How can we make the changes you talk about if we are not at the top?' I reply, 'You can begin where you are, whatever your job. You can bring new insight, new leadership, to your team, your group.'" —Frances Hesselbein "As they say, 'None of us is as smart as all of us.' That is good because the problems we face are too complex to be solved by any one person or any one discipline." —Warren Bennis These are just a few of the insights collected in *Leader to Leader*, an inspiring examination of mission, leadership, values, innovation, building collaborations, shaping effective institutions, and creating community. Management pioneer Peter F. Drucker, Southwest Airlines CEO Herb Kelleher, best-selling authors Warren Bennis, Stephen R. Covey, and Charles Handy, Pulitzer Prize winner Doris Kearns Goodwin, Harvard professors Rosabeth Moss Kanter and Regina Herzlinger, and learning organization expert Peter Senge are among those who share their knowledge and experience in this essential resource. Their essays will spark ideas, open doors, and inspire all those who face the challenge of leading in an ever-changing environment. For a reader's guide, see www.leaderbooks.org

Shared Leadership: Reframing the Hows and Whys of Leadership brings together the foremost thinkers on the subject and is the first book of its kind to address the conceptual, methodological, and practical issues for shared leadership. Its aim is to advance understanding along many dimensions of the shared leadership phenomenon: its dynamics, moderators, appropriate settings, facilitating factors, contingencies, measurement, practice implications, and directions for the future. The volume provides a realistic and practical discussion of the benefits, as well as the risks and problems, associated with shared leadership. It will serve as an indispensable guide for researchers and practicing managers in identifying where and when shared leadership may be appropriate for organizations and teams.

A searching examination of leadership as it is practiced, or malpracticed, in America today. Includes the elements of motivation, shared values, social cohesion, and institutional renewal.

"A compilation of both new articles and articles previously published in the popular "Management Moment" column from the Journal of Public Health Management and Practice, this collection of short essays explores the challenges related to managing people, partners, information, and finances in the public health setting." -- publisher.

Within contemporary culture, 'leadership' is seen in ways that appeal to celebrated societal values and norms. As a result, it is becoming difficult to use the language of leadership without at the same time assuming its essentially positive, intrinsically affirmative nature. Within organizations, routinely referring to bosses as 'leaders' has, therefore, become both a symptom and a cause of a deep, largely unexamined new conceptual architecture. This architecture underpins how we think about authority and power at work. Capitalism, and its turbo-charged offspring neo-liberalism, have effectively captured 'leader' and 'leadership' to serve their own purposes. In other words, organizational leadership today is so often a particular kind of insidious conservatism dressed up in radical adjectives. This book makes visible the work that the language of leadership does in perpetuating fictions that are useful for bosses of work organizations. We do this so that we – and anyone who shares similar discomforts – can make a start in un-

ravelling the fiction. We contend that even if our views are contrary to the vast and powerful leadership industry, our basic arguments rest on things that are plain and evident for all to see. *Critical Perspectives on Leadership: The Language of Corporate Power* will be key reading for students, academics and practitioners

in the disciplines of Leadership, Organizational Studies, Critical Management Studies, Sociology and the related disciplines. First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.
