"Overall this volume should be valuable for readers . . . demonstrates the practical and theoretical advantages of incorporating participatory action research in the social science tool kit." --Agricultural Systems "I recommend this book for researchers, and I also suggest that it be considered seriously by persons grappling with philosophy of social issues." --Journal of Marketing Research "We have a book that deals with a potential revolution in the way organization science is done. . . . The last third of the book, dealing with PAR in agriculture, is of great value. . . . This is a formid-

able challenge for any of us to take on, but many useful and practical tips are scattered throughout the book, in chapters appropriately written by academics, managers, a union leader, and government administrators. Thus, the message of PAR is embodied in the structure of the book. It is a message we should heed." --Journal of Management "Provides a rich set of insights into the intricacies and challenges encountered in research in applied settings with an agenda toward action." --International Journal of Nursing Studies Participatory Action Research (PAR) is a powerful research tool that unites the work of researcher and client to improve both the topic researched and the research findings themselves. Yet, despite the fact that various forms of PAR have been practiced for decades, no single resource existed that detailed this practical research method. Now, in Participatory Action Research, a distinguished team of contributors takes you step-by-step through this research technique, from the initial design of a project, through data gathering and analysis, to final conclusions and actions arising out of the research. Contributors thoroughly outline the theory and methods behind PAR, weigh its strengths and weaknesses, then present a series of case studies taken both from organizational and agricultural settings. Organizational researchers and consultants, managers, sociologists, or anyone engaged in qualitative or applied research will find Participatory Action Research an invaluable tool.

This book describes the Proceedings of the International Conference on Nuclear Data for Science and Technology held at Jillich in May 1991. The conference was in a series of application oriented nuclear data conferences organized in the past under the aus-

pices of the Nuclear Energy Agency-Nuclear Data Committee (NEANDC) and with the support of the Nuclear Energy Agency--Committee on Reactor Physics (NEACRP). It was the first international conference on nuclear data held in Germany, with the scientific responsibility entrusted to the Institute of Nuclear Chemistry of the Research Centre Jillich. The scientific programme was established by the International Programme Committee in consultation with the International Advisers, and the NEA and IAEA cooperated in the organization. A total of 328 persons from 37 countries and five international organizations participated. The scope of these Proceedings extends to a wide range of interdisciplinary topics dealing with measurement, calculation, evaluation and application of nuclear data, with a major emphasis on numerical data. Both energy and non-energy related applications are considered and due attention is given to some fundamental aspects relevant to the understanding of nuclear data.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This volume follows and updates AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE published by Gordon and Breach, Science Publishers, Inc., in 1971. The time period covered is primarily the calendar years 1970 and 1971. Also included, however, is much material from the calendar years 1968 and 1969 not in the previous publication. A brief analysis of the sources of material precedes the citations and abstracts, which comprise the main section of the volume. The bibliography is followed by a permuted subject index and an author index. Also included, following the indexes, is a micro thesaurus. Although no attempt has been made to do a critical subject analysis, such an analysis could be accomplished through selecting a particular subject, looking up the appropriate key works in the rotated index, identifying the abstracts, analyzing them, obtaining complete copy as desired, and completing the critical review. David C. Weeks, Ph.D. Director, BSCP Washington, D.C.

"The arrest and public confession of Pakistani nuclear weapons scientist Abdul Qadeer Khan in 2004 revealed the existence of a global proliferation network which had, over almost two decades, provided nuclear technology, expertise, and designs to Iran, North Korea, Libya and possibly other countries. Khan was not the only nuclear arms merchant and Pakistan was not the only country implicated in his shadowy network. It spanned three continents and eluded both national and international systems of export controls that had been designed to prevent illicit trade. The discovery of the network highlighted concerns that nuclear technology is no longer the monopoly of industrially advanced countries, but can be purchased off-the-shelf by both states and terrorist groups. The IISS Strategic Dossier on nuclear black markets provides a comprehensive assessment of the Pakistani nuclear programme from which the Khan network emerged, the network's onward proliferation activities, and the illicit trade in fissile materials. In addition, the Strategic Dossier provides an overview

of the clandestine nuclear procurement activities of other states, along with the efforts made both by Pakistan and the international community to prevent the reoccurrence of further proliferation networks and to secure nuclear technology. The final chapter assesses policy options for further action.

The 1961 Cryogenic Engineering Conference Committee is pleased to present the papers of the 1961 Cryogenic Engineering Conference. We are grateful to have had the University of Michi-

gan at Ann Arbor, Michigan as our host for the seventh annual meeting of this group. The Conference Committee in presenting the papers of this Conference takes this opportunity to acknowledge the assistance of an Editorial Committee in the selection of papers for the program. Since over one hundred and twenty papers were submitted, their task of screening and evaluating the papers was a difficult one. The Committee guided by G. J. Van Wylen, who also served as chair man of the Conference Committee, included R. W. Arnett, B. W. Birmingham, D. B. Chelton, R. J. Corruccini, C. J. Guntner, M. J. Hiza, R. B. Jacobs, A. J. Kidnay, R. H. Kropschot, J. Macinko, D. B. Mann, R. P. Mikesell, R. L. Powell, J. R. Purcell, R. P. Reed, R. J. Richards, A. F. Schmidt, R. B. Stewart, and K. A. Warren.

Honorable Mention, 2008 ASLI Choice Awards. Atmospheric Science Librarians International This book offers an informed and revealing account of NASA's involvement in the scientific unders-

tanding of the Earth's atmosphere. Since the nineteenth century, scientists have attempted to understand the complex processes of the Earth's atmosphere and the weather created within it. This effort has evolved with the development of new technologies—from the first instrument-equipped weather balloons to multibillion-dollar meteorological satellite and planetary science programs. Erik M. Conway chronicles the history of atmospheric science at NASA, tracing the story from its beginnings in 1958, the International Geophysical Year, through to the present, focusing on NASA's programs and research in meteorology, stratospheric ozone depletion, and planetary climates and global warm-

ing. But the story is not only a scientific one. NASA's researchers operated within an often politically contentious environment. Although environmental issues garnered strong public and political support in the 1970s, the following decades saw increased opposition to environmentalism as a threat to free market capitalism. *Atmospheric Science at NASA* critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved—among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military.
