About 80% of people have the desire to write a book at some point. With the advance of computer and printing technology, this dream can become a reality. One important factor of publishing a book is to create a professional looking book cover. This book uses book cover design as a case study to teach you how to use FREE Scribus software (instead of expensive professional software like InDesign, Photoshop, and QuarkXpress) to create professional presentations. With fewer words and many full color screenshots, we walk you step by step through the entire process. No prior experience is needed. You will learn how to: 1. Download all the FREE software needed. 2. Put the cover template in correct formats. 3. Set up the sheet correctly using units, colors (RGB or CMYK), layers, the imported cover template, sizes, guides, bleed area, and safety margin. 4. Add the background color for the cover with a shape or image frame. 5. Add the cover image and author's photo, as well as how to handle a fully bleed image. 6. Add the titles and text accurately, including information on selecting or changing the text color, using the text box, centering the text, aligning different text boxes, and rotating the text. 7. Add the barcode by extracting the barcode from an EPS file and moving all the barcode elements together or by adding the barcode as a JPEG image file. 8. Use Scribus software to create professional presentations such as book covers, magazine covers, graphic designs, posters, newsletters, renderings, and more. About the authors Alice Chen is an avid Scribus user. She has extensive interest in presentation software, and resides in California. What others are saying about "LEED Green Associate Exam Guide"...(Part I) "Finally! A comprehensive study tool for LEED GA Prep!" "I took the one-day Green LEED Green Associate course and walked away with a power point binder printed in very small print--which was missing MUCH of the required information (although I didn't know it at the time). I studied my little heart out and took the test, only to fail it by 1 point. Turns out I did NOT

study all the material I needed to in order to pass the test. I found this book, read it, marked it up, retook the test, and passed it with a 95%. Look, we all know the LEED Green Associate Exam is new and the resources for study are VERY limited. This one's the VERY best out there right now. I highly recommend it." --Consultant VA "Complete overview for the LEED Green Associate exam" "I studied this book for about three days and passed the exam ... if you are truly interested in learning about the LEED system and green building design, this is a great place to start." --K.A. What others are saying about LEED AP O+M Mock Exam ... "These are TOUGH sample tests. You need this book!" "I used this book as a review in the day or two before my exam. The questions in this book could very well be found on the exam, but most actual exam questions will not be as complex as they are made here. Most of these questions on these mock exams have a twist or trick and many can only be answered if you know the materials backwards and forward. This makes for GREAT exam preparation because it makes you acutely aware of the types of tricks and the level of detail you MIGHT see on the exam..." — G. Patton "I highly recommend this book! "The book was extremely helpful for me passing the exam. The questions really challenged me to dig deeper into the details of each category. I felt this was one of several tools to help me be prepared for the exam. I highly recommend this book." — Edwin F Sierra "Such a great tool! "I passed the exam at the first attempt. These mock exams helped me to learn how to tackle the problems and which areas I should focus on! I worked with another book of the author also. It took 2-3 weeks for my preparation." — Chai
