As luck would have it, Johann Bernoulli, Europe's foremost mathematician of his time, was a friend of Leonhard's father and the influence of this great mathematician on the young Leonhard was immense. Euler's father wanted to prepare him for a career in theology and it was Bernoulli who persuaded his friend to let the boy study mathematics.

In mathematics and physics, many topics are named in honor of Swiss mathematician Leonhard Euler (1707-1783), who made many important discoveries and innovations. Many of these items named after Euler include their own unique function, equation, formula, identity, number (single or sequence), or other mathematical entity.
