Here's the link to where he uploads the latest revisions. The image posted by OP is already a week out of date. I just bought a computer this weekend (I'm standing by the door waiting for the UPS man with baited breath) after about two weeks of substantial research, using the logical increments guide from /g/ and this subreddit as a launching platform.

The average PC user spends several hours a day touching a computer mouse, making it one of the most critical computer peripherals. And yet, few PC users spend much time considering mice before purchasing one that they'll end up using for years. It can be interesting to learn more about specific models of a mouse [...]

Logical Increments - PC Buying Guide | Computer hardware

Logical Increments PC Buying Guide from /g/ : buildapc

On the Intel side, Coffee Lake is still the king of gaming CPUs. If you want the best of the best and are willing to pay a hefty price for it, then the 6-core 12-thread i7-8700K paired with a Z370 motherboard (such as the ASUS Prime Z370-A) is the only way to go.. The i7-8700K is supposed to come in at an MSRP of \$370, but is often seen selling for more than \$400 due to supply shortages.
