'My primary aim in writing this book is to demonstrate the importance of individual human beings in modern warfare. In the battle to drive the Iraqi army out of Kuwait, Coalition forces used every form of high-technology weapon available; yet in the end success depended on the performance of individuals, whether they were pilots, divers, tank drivers, mechanics, engineers, cooks, radio operators, infantrymen, nurses or officers of all ranks. It was these ordinary people who, at the end of the day, were going to put their lives on the line and risk their neck when their Government decided to

go to war.' Gen. Sir Peter de la Billiere Note that it has not been possible to include the same picture content that appeared in the original print version.

As Chief of the General Staff, Sir Richard Dannatt was in overall command of the British army for three years from 2006. This is his fascinating reflection of a life of military service in which he offers a frank analysis of whether Britain's defence strategy is fit to respond to the threats we will face in the 21st century.

Written in Ron Cody's signature informal, tutorial style, this book develops and demonstrates data cleaning programs and macros that you can use as written or modify which will make your job of data

cleaning easier, faster, and more efficient. --

Nick Stone has always kept his job as ex-SAS trouble shooter at arms' length from his home life. But when his son falls dangerously ill and the doctor who saves him comes under threat from an old adversary, it is no longer possible. Life just got very personal. To stop his cover being terminally blown, he must follow a trail that begins in Triad-controlled Hong Kong. He is propelled back into the brutal world he thought he'd left behind. The forces ranged against him have guns, helicopters, private armies and a terrified population in their vice-like grip. Nick Stone has two decades of operational skills - but this time, that may not be

enough

An insider's view of court life during the Renaissance, here is the handiwork of a 16th-century diplomat who was called upon to resolve the differences in a war of etiquette among the Italian nobility.

'We are the Pilgrims, master; we shall go, Always a little further; it may be, Beyond that last blue mountain barred with snow.' If there was ever anyone who went a little further, a little beyond, it was Alastair MacKenzie. In a career spanning 30 years, MacKenzie served uniquely with the New Zealand Army in Vietnam, the British Parachute Regiment, the British Special Air Service (SAS), the South African Defence Force's famed ParaBats, the Sultan of Oman's Special Forces and a host of private security agencies and defence contractors. MacKenzie lived the soldier's life to the full as he journeyed 'the Golden Road to Samarkand'. This extraordinary new work from the author of *Special Force: The Untold Story of 22nd Special Air Service Regiment (SAS)* vividly documents the experience of infantry combat in Vietnam, life with the Paras, the tempo of selec-

tion for UK Special Forces, covert SAS operations in South Armagh and SAS Counter Terrorist training on the UK mainland, vehicle-mounted Pathfinder Brigade insertions into Angola and maritime counter-terrorism work in Oman.

Warfare and defence.

'Hard eyes stare out of massive beards, their faces marked by the scars of battle. With these guys their webbing looks like it belongs to them, rather than it's been hung on a pair of reluctant shoulders. There's not a word been said to us, but the ante has clearly been upped. There's a dark and sinister feeling in the air. It doesn't take a genius to figure it's about to kick off.' Former SAS soldier Big Phil Campion tells it like is in this brutally honest account of his insanely dangerous life as a private military operator. From playing chicken with a suicide bomber in backstreet Kabul, to taking on pirates with his bare hands, this is true-life action-packed drama at its best.

Since 1854 the Victoria Cross has been the highest award for gallantry in the British Armed Forces. It bears the simple legend 'For Valour', but behind it

are thrilling and ultimately humbling tales of unimaginable bravery. *SUPREME COURAGE* tells the tales of some of those who have won the medal, bringing this badge of honour alive with breath-taking accounts of courage in action. Visiting battle-scenes across the globe, peppering his accounts with letters and first-hand accounts, Sir Peter de la Billière uncovers not just heroism but the hearts and minds of men. With his accounts of Australians, Canadians, New Zealanders, Indians and the Gurkhas, Sir Peter de la Billière does more than accompany the man into battle. He reveals their backgrounds, the climate of their times, what it was that drove them on, and the price of fame - the burden of expectation in civilian life that accompanied more than one recipient to a pauper's grave. Extraordinary and intensely moving, *SUPREME COURAGE* is a thrilling addition to the literature of war, and a unique and magnificent monument to heroism.

From his childhood, rebellion at school, the early death of his father and conflict with his step-father, on to his exploits in the army in Korea, Egypt, Malaya, Oman, Borneo, the Sudan, the Falklands, and the Gulf War, this book chronicles the SAS General's life.

In the winter of 1812, Napoleon's army retreated from Moscow under appalling conditions, hunted by three separate Russian armies, its chances of survival apparently nil. By late November Napoleon had reached the banks of the River Berezina—the last natural obstacle between his army and the safety of the Polish frontier. But instead of finding the river frozen solid enough to march his men

across, an unseasonable thaw had turned the Berezina into an icy torrent. Having already ordered the burning of his bridging equipment, Napoleon's predicament was serious enough: but with the army of Admiral Chichagov holding the opposite bank, and those of Kutusov and Wittgenstein closing fast, it was critical. Only a miracle could save him ... In a gripping narrative Alexander Mikaberidze describes how Napoleon rose from the pit of despair to the peak of his powers in order to achieve that miracle. Drawing on contemporary sources—letters, diaries, memoirs—he recreates one of the greatest escapes in military history—a story often half-told in general histories of the Russian campaign but never before fully explored.

The beauty of DOE is about learning—from mistakes, from trying new things, and from working with others. Cautionary Tales in Designed Experiments aims to explain statistical design of experiments (DOE), Ronald Fisher's great innovation, to readers with minimal mathematical knowledge and skills. The book starts with historical examples and goes on to cover missteps, mismanaged experi-

ments, learnings, the importance of randomization, and more. In later chapters, the book covers more statistical concepts, such as various designs for experiments, analysis of variance, Bayes' theorem in DOE, measurement, and when experiments fail. The book concludes by citing the ubiquity of statistical design of experiments.

(Stephen King). When a group of schoolboys are stranded on a desert island, what could go wrong? ONE OF THE BBC'S '100 NOVELS THAT SHAPED OUR WORLD' 'One of my favorite books - I read it every couple of years.' Suzanne Collins, author of The Hunger Games What are we? Humans? Or animals? Or savages? What's grown-ups going to think? Going off-hunting pigs-letting fires out-and now! A plane crashes on a desert island. The only survivors are a group of schoolboys. By day, they explore the dazzling beaches, gorging fruit, seeking shelter, and ripping off their uniforms to swim in the lagoon. At night, in the darkness of the jungle, they are haunted by nightmares of a primitive beast. Orphaned by society, they must forge their own; but it isn't long before their innocent games devolve into a murderous hunt ... 'Thrills me with all the power a fiction can have ... Exemplary.' Ian McEwan 'An existential fable backlit with death's incandescent glare.' Ben Okri 'Violently real ... An apocalyptic novelist [who writes with] humanist rage and defiance.' Marlon James 'Beautiful and desperate, something quite out of the

ordinary.' Stevie Smith 'Beautifully written, tragic and provocative.' E. M. Forster 'A fragment of nightmare.' New Statesman 'A post-apocalyptic, dystopian survivor-fantasy ... [A novel] for all time ... A cult classic.' Guardian 'Stands out mightily in my memory ... Such a strong statement about the human heart.' Patricia Cornwell 'Terrifying and haunting.' Kingsley Amis What readers are saying: 'Every real human being should read this ... This is what we are.' 'It's brilliant, it's captivating, it's thought provoking and brutal and for some, its truly terrifying.' 'It can be read and re-read many times, and every time something new will appear.' 'There is a reason why this is studied at school ... Excellent read.' 'This is one of the few books I've read that I keep on my Kindle to read again.' 'I revisit this every few years and it's always fresh and impressive ... One of the best books I've ever read.' In 1994 Cameron Spence travelled to Bosnia as Second-in-Command of an SAS troop. This book details the patrol's rollercoaster ride through a lawless country, leading to the book's climax: a daring bid by a trapped SAS

patrol to break out of the besieged Muslim town of Gorazde.

Storm Command was the account of the last command held by Britain's most decorated officer. Now, in Sir Peter de la Billiere's story leading up to the Gulf War, we have a portrait of life in the SAS and a soldier's view of almost every British Army action since World War II. This sensational 1941 memoir of life on the front-line of wartime Europe by a 'magnificent' (Antony Beevor) trailblazing female reporter is a rediscovered classic, introduced by Christina Lamb: 'I was blown away ... The Forrest Gump of journalism ... Incredible.' Madrid in the Spanish Civil War Prague during the Munich crisis Berlin the day Germany invaded Poland Helsinki as the Russians attacked Moscow betrayed by the Nazis Paris as it fell to the Germans London on the first day of the Blitz Virginia Cowles has seen it all. As a pioneering female correspondent, she reported from Europe from the 1930s into the Second World War, watching 'the lights in the death-chamber go out one by one' from the frontline - always in the right place at the right time. Flinging off her

heels under shellfire; meeting Hitler ('an inconspicuous little man'); gossiping with Churchill by his goldfish pond; dancing in the bomb-blasted Ritz; reading The Intelligent Woman's Guide to Socialism on a Soviet train; eating reindeer with guerrilla skiers ... Introduced by Christina Lamb, Cowles' incredible dispatches will make you an eyewitness to the twentieth-century as you have never experienced it before. 'Passionate and vivid ... A brave reporter and fine writer.' Lindsey Hilsum (Channel 4 News, International Editor, and author of In Extremis; the Life of War Correspondent Marie Colvin) What readers are saying: The Forrest Gump of early World War II The queen of historical name-dropping Holy cow! What a wonderful find!! Most unexpectedly great book that I have read in years. Reads like a novel [but] this is real life. The best book I've read this year ... Exquisitely written [day-to-day] drama of history ... Breathtakingly fresh. I can't recommend this book enough. Cowles' voice and humanity are her greatest assets, but her willingness to be where the action was - and always find trouble - paid off. A marvel. Her ability to capture anec-

dotes and dialogue that offer surprising insights into historic personages and events is a frequent source of wonder. It was difficult for me not to drive my family crazy wanting to read them quotes. The intrepid Virginia Cowles was in the right places at the right times and connected to the right people. What a life she led!

Life and leadership lessons from the Special Forces, from the stars of Channel 4 series SAS: Who Dares Wins - including Sunday Times best-selling author of FIRST MAN: LEADING FROM THE FRONT, Ant Middleton Are you up to the challenge of SAS leadership? Only the best will succeed... Britain's SAS (Special Air Service) has an unparalleled reputation for soldiering excellence. Their skills and techniques have been perfected in the most demanding environments imaginable, but many of these can also be used in our everyday lives. This book takes situations all of us will experience during our lives and presents tactical lessons drawn from SAS training and battlefield experience. Its four authors - stars of the hit Channel 4 show SAS: Who Dares Wins - how their finely honed unders-

tanding of how to handle extreme challenges can be applied in any environment. Their advice on negotiation, people management, self-motivation and resilience, among other things, can transform your performance in a whole range of scenarios: from buying a house, nailing a job interview, and the experience of dealing with rejection, to maintaining a diet, or managing that pushy colleague at work. This is the ultimate guide to leadership and personal achievement.

The SAS describes its attitude to the use of lethal force as 'Big boys' games, big boys' rules'. Anyone caught with a gun or bomb can expect to be shot. In Big Boys' Rules: The SAS and the Secret Struggle Against the IRA Mark Urban meticulously explores the security forces' covert operations in Northern Ireland: from the mid-1970s, when they were stepped up, to the Loughall ambush in 1987, in which eight IRA Provisionals were killed. While charting the successes and failures of special operations during the troubles, Urban reveals the unenviable dilemmas faced by intelligence chiefs engaged in a daily struggle against one of the world's

most sophisticated terrorist organisations. 'This is a book that needed to be written and which fulfils the essentials of any Ulster story; it expands understanding beyond fragmented jingoism and newspaper headlines.' John Stalker, Sunday Times

After twenty years of SAS operations Bob Shepherd retired to work as an advisor on the international commercial security circuit. Then 9/11 happened and Bob found himself back in war zones on assignments far more perilous than anything he had encountered in the SAS: from ferrying journalists across firing lines in the West Bank and Gaza to travelling to the heart of Osama bin Laden's Afghan lair. As the war on terror escalated, Bob contended with increasingly sophisticated insurgents. But the most disturbing development he witnessed was much closer to home; namely The Circuit's rise from a niche business staffed by top veterans into an unregulated, billion dollar industry that too often places profits above lives... Tracking originated with man's need for food; he needed to understand what he was following and what the rewards would

be if he was successful. Little has changed over time about the terms of tracking. We still track game for sport and food, but we have also found other uses for tracking. Border police patrol to stop illegal immigrants from entering their country; the military tracks down wanted terrorists or enemy forces. Tracking has become a military skill. In the SAS Tracking Handbook, former SAS soldier and British Empire Medal (BEM) award-winner Barry Davies teaches not only how to survive in the outdoors with the skills of tracking, but how to use these skills from a military standpoint. Included in this book are many helpful tips on topics including: The types of dogs used for tracking. Traps for catching wild animals. Modern military tracking. Using your surroundings to your advantage. And much more. The success or failure of the modern tracker is dependent on the personal skills of the individual tracker. Training is vital in learning tracking skills, and continuous exercise the best way to interpret signs. These skills are rarely found, but they remain hidden deep within all of us. So whether you're already a skilled tracker or a novice

in the field, the SAS Tracking Handbook will be your guide to mastering this old and respected art.

On 2 September 2008, in eastern Afghanistan, Trooper Mark Donaldson made a split-second decision that would change his life. His display of extraordinary courage saw him awarded the Victoria Cross for Australia, making him the first Australian to receive our highest award for bravery since 1969. Yet Mark's journey to those crucial moments was almost as exceptional as the acts that led to his VC. He was rebellious even before the death of his father in his mid-teens. A few years later, his mother disappeared, presumed murdered. Mark's lifestyle could have easily led him further down the path of self-destructiveness and petty crime. But he took a different road: the army. It proved to be his salvation.

In January 1991, eight members of the SAS regiment embarked upon a top secret mission that was to infiltrate them deep behind enemy lines. Under the command of Sergeant Andy McNab, they were to sever the underground communication link between Baghdad and north-west Iraq, and to seek and destroy mobile Scud launchers. Their call sign: BRAVO TWO ZE-

RO. Each man laden with 15 stone of equipment, they patrolled 20km across flat desert to reach their objective. Within days, their location was compromised. After a fierce fire fight, they were forced to escape and evade on foot to the Syrian border. In the desperate action that followed, though stricken by hypothermia and other injuries, the patrol 'went ballistic'. Four men were captured. Three died. Only one escaped. For the survivors, however, the worst ordeals were to come. Delivered to Baghdad, they were tortured with a savagery for which not even their intensive SAS training had prepared them. Bravo Two Zero is a breathtaking account of Special Forces soldiering: a chronicle of superhuman courage, endurance and dark humour in the face of overwhelming odds.

A raw, honest and evocative account of life as the most highly decorated serving soldier in the British Army. From the break-neck pace of an opening where he is in action in Helmand province, under fire from the Taliban, Mick Flynn pulls no punches. It's obvious that he is a trained killer. But how did

it reach this point? The journey starts with his childhood, a working class lad, learning to fight and finding himself repeatedly on the wrong side of the law. Even after joining the Army he is found at fault and jailed, an experience that finally shocks him into behaving himself. From there, it is off to Northern Ireland and straight into hotspots where Mick's courage and determination are all that keep him alive. There's love too: his estranged wife, Denise, is being brought back into the picture, just as Mick tries to start a new life with his girlfriend Rachel. Can he manage to separate his ferocious soldiering persona from the real Mick? As things remain complicated, Mike flings himself into further tours of duty, in Bosnia, Iraq, the Falklands. Action-packed, shoot-from-the-hip narration from an engaging hero, this is gritty realism at its most shocking.

Scholey vividly describes life as a soldier, giving first-hand accounts of jungle warfare in Borneo to desert fighting in Aden. This exciting account of some of this century's most sensitive and dangerous operations also offers a genuine insight into the one of the world's premier

fighting forces.

Bridging the gap between statistics texts and SAS documentation, *Elementary Statistics Using SAS* is written for those who want to perform analyses to solve problems. The first section of the book explains the basics of SAS data sets and shows how to use SAS for descriptive statistics and graphs. The second section discusses fundamental statistical concepts, including normality and hypothesis testing. The remaining sections of the book show analyses for comparing two groups, comparing multiple groups, fitting regression equations, and exploring contingency tables. For each analysis, author Sandra Schlotzhauer explains assumptions, statistical approach, and SAS methods and syntax, and makes conclusions from the results. Statistical methods covered include two-sample t-tests, paired-difference t-tests, analysis of variance, multiple comparison techniques, regression, regression diagnostics, and chi-square tests. *Elementary Statistics Using SAS* is a thoroughly revised and updated edition of Ramon Littell and Sandra Schlotzhauer's *SAS System for Elementary Statistical Analysis*.

From his cage in a putrid, overcrowded Indian gaol, Paul Jordan reflects on a life lived on the edge and curses the miscalculation that robbed him of his freedom. His childhood, marred by the loss of his father and brother, produce a young man hell bent on being the best of the best - an ambition he achieves by being selected to join the elite SAS. He survives the gut-wrenching training regime, deployment to the jungles of Asia and the horrors of genocide in Rwanda before leaving the army to embark on a career as a security adviser. His new life sees him pursuing criminals and gun-toting bandits in Papua New Guinea and the Solomons, protecting CNN newsmen as the US 7th Cavalry storms into Baghdad with the outbreak of the Iraq War, and facing death on a massive scale as he accompanies reporters into the devastated Indonesian town of Banda Aceh, flattened by the Boxing Day tsunami. During his 24 days in an Indian gaol, Paul Jordan discovers that friendship and human dignity somehow survive the filth and deprivation. This is a personal account of a tough, hardened fighter who suddenly finds himself totally de-

pendent on others for his every need. The Easy Day was Yesterday is fast paced, brutally honest and raw, but laced with dark humour. The core of Paul Jordan's eventful life, however, is the strength of his bonds with family and friends and the ability of the human spirit to survive even the direst adversity.

To use statistical methods and SAS applications to forecast the future values of data taken over time, you need only follow this thoroughly updated classic on the subject. With this third edition of SAS for Forecasting Time Series, intermediate-to-advanced SAS users—such as statisticians, economists, and data scientists—can now match the most sophisticated

forecasting methods to the most current SAS applications. Starting with fundamentals, this new edition presents methods for modeling both univariate and multivariate data taken over time. From the well-known ARIMA models to unobserved components, methods that span the range from simple to complex are discussed and illustrated. Many of the newer methods are variations on the basic ARIMA structures. Completely updated, this new edition includes fresh, interesting business situations and data sets, and new sections on these up-to-date statistical methods: ARIMA models Vector autoregressive models Exponential smoothing models Unobserved component and state-space models Seasonal adjustment

Spectral analysis Focusing on application, this guide teaches a wide range of forecasting techniques by example. The examples provide the statistical underpinnings necessary to put the methods into practice. The following up-to-date SAS applications are covered in this edition: The ARIMA procedure The AUTOREG procedure The VARMAX procedure The ESM procedure The UCM and SSM procedures The X13 procedure The SPECTRA procedure SAS Forecast Studio Each SAS application is presented with explanation of its strengths, weaknesses, and best uses.
