The field of Strategic Human Resource Management (SHRM) has burgeoned over the past thirty years. Over this time there has been a shift towards a strategic conception which posited workers as 'assets' rather than 'costs'. These 'human resources' were reconceptualised as a key source of competitive advantage. As such, these assets were to be treated seriously: selected with care, trained and developed, and above all, induced to offer commitment. The concept of 'human capital' came to the fore, and in the decades fol-

lowing these developments, research output has been voluminous. *Strategic Human Resource Management: A Research Overview*, authored by global research leaders, provides an expert summary of this crucial element of organizational performance. This new shortform book develops the argument that one of the crucial elements of organizational performance is the way work is organized in skill and talent packages both within an organization's boundary and across global competency clusters. Secondly, it focuses on current and emergent challenges. The 'package' of HR approaches has changed over time and patterns can be observed. This new volume pays special regard to the HR implications arising from radically altering contexts - economic, social, and technological. This concise volume covers crucial themes of lasting interest, and as such is essential reading for business scholars and professionals.

The expert authors of this leading text present a thorough introduction to HRM by exploring a variety of perspectives, styles and arguments. It takes a rigorous, critical approach that makes contemporary developments in Human Resource Management accessible to students. They explore the most pressing and topical themes and debates of today - the effects of HRM on organisational performance, management and leadership development, performance management and employee reward - whilst covering in depth the theory and practice of the operational aspects of HRM. The final part of the text compares trends in HRM around the world, with a particular focus on India and China, as well as the influence of multinational corporations. *Human Resource Management* is written for undergraduate, postgraduate and MBA students, as well as those studying for the CIPD qualifications. For students: *MyManagementLab for HRM* is a new online study guide which measures student understanding and creates a personalised study guide based on this. Includes video and audio material.
