Rely on this handy pocket guide to quickly reference the must-know information you need to prepare for the everyday encounters you'll face in clinical and practice. From easy-to-scan charts of the teeth and detailed depictions of dental instruments to helpful tips on how to administer oxygen and assist patients with multiple medical conditions, this comprehensive, chairside guide is the perfect companion for any setting.

With this hands-on resource, you will learn the most current methods of placing -- or assisting in the placement -- of dental materials, and how to instruct patients in their maintenance. Dental Materials uses step-by-step procedures to show how to mix, use, and apply dental materials within the context of the patient's course of treatment. Expert authors Carol Hatrick, W. Stephan Eakle, and William F. Bird enhance this edition with four new chapters, along with coverage of newly approved materials and esthetic tools including the latest advances in bleaching and bonding. A new companion Evolve website lets you practice skills with challenging exercises! Procedure boxes include step-by-step instructions for common tasks. Procedural icons indicate specific guidelines or precautions that need to be followed for each procedure. End-of-chapter review questions help you assess your retention of material, with answers provided in an appendix. End-of-chapter case-based discussions provide a real-life application of material covered in the chapter. Clinical tips and precautions emphasize important information, advice, and warnings on the use of materials. Key terms are defined at the beginning of each chapter, bolded within the chapter, and defined in the glossary. Objectives help you focus on the information to gain from each chapter. Introductions provide an overview of what will be discussed in each chapter. Summary tables and boxes make it easy to find and review key concepts and information. Full-color photos and illustrations show dental materials and demonstrate step-by-step procedures, including new clinical photos of bleaching and bonding. New Dental Ceramics chapter addresses the growth in esthetic dentistry by discussing porcelain crowns, inlays, and veneers and the process of selecting the proper shade. New Dental Amalgam chapter discusses the use of metal - still the most commonly used material in restorative and corrective dentistry. New Casting Alloys, Solders, and Wrought Metal Alloys chapter breaks down specific types of combination metals and the procedures in which they are used. New Dental Implants chapter covers several different types of implants as well as how to instruct patients on hygiene and home care of their implant(s). The Materials Handling section reflects the new Infection Control Environment (ICE) standards and all approved ADA methods for the disposal of surplus materials. A companion Evolve website includes exercises to help you identify images and master procedures, plus competency skill sheets to assess your understanding.

Get the hands-on practice and reinforcement you need to master the concepts and skills covered in Modern Dental Assisting, 12th Edition. With chapters corresponding to the chapters in Bird & Robinson's bestselling textbook, this workbook features ample review questions and exercises, competency skills evaluation sheets for practice with dental assisting procedures, and case applications with questions. Applicable chapters also contain a review of video procedures located on the text's companion website, as well as original practice management exercises designed to be used with the Dentrix software that's included with the workbook. In all, it's the essential practice and review you need to succeed in clinical practice! Correlation with textbook chapters makes it easy to move back and forth between the two resources. Practice and review questions for each chapter include short answer, fill-in-the-blank, multiple-choice, and labeling questions to help reinforce your understanding of terminology and concepts. Competency skill checklists provide clear guidelines for performing each dental assisting skill and help you evaluate your strengths and weaknesses, with perforated pages so that you can detach individual skill sheets for use in clinical settings. Patient case exercises use patients on the companion Evolve website's Interactive Dental Office and include medical and dental histories, radiographs, and charting to help you solve problems relating to patient health issues. Video review sections visually reinforce your understanding of text material and help prepare you for patient encounters. Removable flashcards summarize key information about the sciences, medical emergencies, infection control, radiography, dental materials, dental instruments, and dental procedures, offering convenient, on-the-go review and exam preparation. Trusted expert authors Doni Bird and Debbie Robinson present information and procedures in a way that makes it easy for you to understand and apply the material. NEW! Content matches that in the text, addressing new technology, public health and access to care, teledentistry, Zika virus, Ebola, infection control guidelines, the oral-systemic health connection, and more. NEW! Anatomy and tooth morphology labeling exercises help you master key foundational content essential to dental assisting practice. NEW! Additional Dentrix practice management exercises have been added to the Dentrix Learning Edition software, enabling you to work with patient data much like you will in the office environment. NEW! Additional content supporting the dental assisting externship provides information and resources to support practicum.
