From Anthony and Agatha Award-winning author of the Dead-End Job mysteries—a gritty series featuring a no-nonsense female journalist who follows her stories wherever they may lead...especially if they lead to big trouble. St. Louis City Gazette columnist Francesca Vierling has scored a ticket to the Leather and Lace Bikers' Society Ball, one of the highlights of the social calendar. The organizers of the ball would prefer the event be considered a low-light, however, and have done everything they can to rough up the affair and deter the RUBs—Rich Urban Bikers who can't tell a Harley Hog from a Holstein heifer—from showing up. A little grittiness can't stop ultra-fashionable socialite Sydney Vander Venter from making an appearance. She's the talk of the town thanks to an impending divorce from her ultra-wealthy husband. But after spending the evening making moves on a few too many married men, she's told to hit the road. When Sydney's body is found ditched in a back alley, Francesca finds herself on a hunt for a murderer that takes her into the lives of St. Louis's hardcore biker gangs and the prim and powerful elite. But she soon learns that those very different worlds have one rule in common... If you don't belong, you don't survive for long. Note: The author has made some minor revisions to the original text for this edition of the book.

From the beginning of the sound era until the end of the 1930s, independent movie-making thrived. Many of the independent studios were headquartered in a section of Hollywood called "Poverty Row." Here the independents made movies on the cheap, usually at rented facilities where shooting was limited to only a few days. From Allied Pictures Corporation to Willis Kent Production, 55 Poverty Row Studios are given histories in this book. Some of the studios, such as Diversion Pictures and Cresent Pictures, came into existence for the sole purpose of releasing movies by established stars. Others, for example J.D. Kendis, were early exploitation filmmakers under the guise of sex education. The histories include critical commentary on the studio's output and a filmography of all titles released from 1929 through 1940.

The Science of Forensic Entomology builds a foundation of biological and entomological knowledge that equips the student to be able to understand and resolve questions concerning the presence of specific insects at a crime scene, in which the answers require deductive reasoning, seasoned observation, reconstruction and experimentation—features required of all disciplines that have hypothesis testing at its core. Each chapter addresses topics that delve into the underlying biological principles and concepts relevant to the insect biology that forms the bases for using insects in matters of legal importance. The book is more than an introduction to forensic entomology as it offers in depth coverage of non-traditional topics, including the biology of maggot masses, temperature tolerances of necrophagous insects; chemical attraction and communication; reproductive strategies of necrophagous flies; archaeoentomology, and use of insects in modern warfare (terrorism). As such it will enable advanced undergraduate and postgraduate students the opportunity to gain a sound knowledge of the principles, concepts and methodologies necessary to use insects and other arthropods in a wide range of legal matters.

The forensic entomologist turns a dispassionate, analytic eye on scenes from which most people would recoil—human corpses in various stages of decay, usually the remains of people who have met a premature end through accident or mayhem. To Lee Goff and his fellow forensic entomologists, each body recovered at a crime scene is an ecosystem, a unique microenvironment colonized in succession by a diverse array of flies, beetles, mites, spiders, and other arthropods: some using the body to provision their young, some feeding directly on the tissues and by-products of decay, and still others preying on the scavengers. Using actual cases on which he has consulted, Goff shows how knowledge of these insects and their habits allows forensic entomologists to furnish investigators with crucial evidence about crimes. Even when a body has been reduced to a skeleton, insect evidence can often provide the only available estimate of the postmortem interval, or time elapsed since death, as well as clues to whether the body has been moved from the original crime scene, and whether drugs have contributed to the death. An experienced forensic investigator who regularly advises law enforcement agencies in the United States and abroad, Goff is uniquely qualified to tell the fascinating if unsettling story of the development and practice of forensic entomology.

Wing Commander Charles Learmonth, DFC and Bar, was a well-known flyer in World War II, who was based in Pearce, WA, and involved in the air

search for HMAS Sydney. He fought in the skies of New Guinea and was killed at the age of 26 in a crash 30 kilometres north-west of Rottneest Island. Learmonth Airport was named in his honour. In this extensively researched biography of Learmonth, Charles Page fills a significant gap in Australian World War II history. It is, Page writes, a story that needed to be told. The deeds of Charles Learmonth and his band of brothers deserve more than a shoebox full of aerogrammes held together with rubber bands.

Taking Edgar Allan Poe's 1841 "The Murders in the Rue Morgue" as an inaugural frame, Andrea Goulet traces shifting representations of violence, space, and nation in French crime fiction from serial novels of the 1860s to cyberpunk fictions today. She argues that the history of spatial sciences—geology, paleontology, cartography—helps elucidate the genre's fundamental tensions: between brutal murder and pure reason; historical past and constructive present; national identity and global networks. As the sciences underlying her analysis make extensive use of strata and grids, Goulet employs vertical and horizontal axes to orient and inform her close readings of crime novels. Vertically, crimes that take place underground subvert above-ground modernization, and national traumas of the past haunt present criminal spaces. Horizontally, abstract crime scene maps grapple with the sociological realities of crime, while postmodern networks of international data trafficking extend colonial anxieties of the French nation. Crime gangs in the catacombs of 1860s Paris. Dirt-digging detectives in coastal caves at the fin-de-siècle. Schizoid cartographers in global cyberspace. Crime fiction's sites of investigation have always exposed central rifts in France's national identity while signaling broader, enduring unease with violent disruptions to social order. Reading murder novels of the last 150 years in the context of shifting sciences, Legacies of the Rue Morgue provides a new spatial history of modern crime fiction.
