Stunning photographic guide to bugs, from the beautiful to the bizarre and every bug in between Smithsonian Handbook of Interesting Insects presents striking photographic profiles of insects, each one specially selected from the 34 million specimens found in one of the oldest and most important entomology collection in the world, held by London's Natural History Museum. The book showcases more than one hundred significant bug species, including the ruby-tailed wasp, the garden tiger moth, the jewel beetle, the flying stick insect, the orchid bee, and many others.
