Ghost tries to help Skeleton get rid of the hiccups.

"A provocative and entertaining magical mineral tour through the life and afterlife of bone." —Wall Street Journal Our bones have many stories to tell, if you know how to listen. Bone is a marvel, an adaptable and resilient building material developed over more than four hundred million years of evolutionary history. It gives your body its shape and the ability to move. It grows and changes with you, an undeniable document of who you are and how you lived. Arguably, no other part of the human anatomy has such rich scientific and cultural significance, both brimming with life and a potent symbol of death. In this delightful natural and cultural history of bone, Brian Switek explains where our skeletons came from, what they do inside us, and what others can learn about us when these arti-

facts of mineral and protein are all we've left behind. Bone is as embedded in our culture as it is in our bodies. Our species has made instruments and jewelry from bone, treated the dead like collectors' items, put our faith in skull bumps as guides to human behavior, and arranged skeletons into macabre tributes to the afterlife. Switek makes a compelling case for getting better acquainted with our skeletons, in all their surprising roles. Bridging the worlds of paleontology, anthropology, medicine, and forensics, *Skeleton Keys* illuminates the complex life of bones inside our bodies and out.

Unpacking assumptions about corseting, Rebecca Gibson supplements narratives of corseted women from the 18th and 19th centuries with her seminal work on corset-related skeletal deformation. An undergarment that provided support and shape for centuries, the corset occupies a familiar but exotic space in modern consciousness, created by two sometimes contradictory narrative arcs: the texts that women wrote regarding their own corseting experiences and the recorded opinions of the medical community during the 19th century. Combining these texts with skeletal age data

and rib and vertebrae measurements from remains at St. Bride's parish London dating from 1700 to 1900, the author discusses corseting in terms of health and longevity, situates corseting as an everyday practice that crossed urban socio-economic boundaries, and attests to the practice as part of normal female life during the time period Gibson's bioarchaeology of binding is the first large-scalar, multi-site bioethnography of the corseted woman. Your skeleton helps you leap, somersault, and touch your toes—without it, you would be as floppy as a beanbag! There are over 200 bones living and growing inside you that make up your skeleton. There are also ligaments and joints that hold your bones together, and cartilage in your bendable parts like your ears and your nose. Read and find out all about what a skeleton can do! Now rebranded with a new cover look, this book features content-rich vocabulary, fascinating side bars and diagrams, and beautifully detailed illustrations by veteran illustrator True Kelley. The classic text by Philip Balestrino and the illustrations were vetted for accuracy by an expert in the field. This is a Level 2 Let's-Read-and-Find-Out Science title, which means the book

explores more challenging concepts for children in the primary grades and supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out Science is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

An adult human skeleton is made up of 206 bones, but there's much more to learn about the skeleton than just about bones. Your readers will learn interesting details including what bone marrow is and what joints do. They'll be instructed on different poses and exercises they can do to make sure their bones and joints stay strong and healthy.

First serialised between 1866 and 1867 by the Newsagents' Publishing Company and Edwin J. Brett, The Skeleton Crew, or, Wildfire Ned was among the finest and most popular of the fierce 'penny dreadful' tales which flourished in the mid nine-

teenth century. Edward Warbeck, the eponymous Ned, pursues a quest to defeat murderous bandits known as the Skeleton Crew, led by the indefatigable Death-wing. Occultist A. E. Waite described this bloodthirsty tale as "suggestive of a film produced by the inmates of Bedlam" with a storyline "in a state of nightmare". The original vivid, and often terrifying, images of the skeleton outlaws are reproduced in this edition. This edition also includes a critical introduction, explanatory footnotes, and extensive contextual material. A new edition of this beloved and best-selling Hallowe'en classic. Description This is how the story begins. On a dark dark hill there was a dark dark town. In the dark dark town there was a dark dark street . . . Janet and Allan's frightfully funny Hallowe'en classic tells the story of three skeletons - a big skeleton, a little skeleton and a dog skeleton - who venture out of their cellar one night to find someone to scare, only to find that everyone is in bed. Who will they scare now?!
