Relevant costing is a management accounting tool-kit that helps managers reach decisions when they are posed with the following questions: Whether to buy a component from an external vendor or manufacture it in house? Whether to accept a special order? What price to charge on a special order? Relevant costing aids man-

agement in making non-routine decisions by analyzing relevant costs and benefits. Not all costs are useful in decision-making. Relevant costs refer to those that will differ between different alternatives. Irrelevant costs are those that will not cause any difference.

For a particular decision, different types of cost and benefits are considered. Called relevant costs, these have a bearing on the future and differ under various decision alternatives. If any of these qualification is absent, it would be an irrelevant cost.

### **Relevant Cost Of Decisions | Accounting Simplified**

A relevant cost is a cost that only relates to a specific management decision, and which will change in the future as a result of that decision. The relevant cost concept is extremely useful for eliminating extraneous information from a particular decision-making process. Also, by eliminating irrelevant costs from a decision, management is prevented from focusing on information that might otherwise incorrectly affect its decision.
