Marine Engineering Marine engineering is a field that deals with the engineering aspect of the maritime industry. Like any conventional engineering course, marine engineering is a four year course which prepares an individual to become an engineer on ships. Marine engineering is all about machinery on ships, boats, yachts, or any sea going vessel.

Engineering is a broad work category that refers to jobs that use science and mathematics to solve a variety of problems. Engineers work in disciplines that include mechanical, electrical, chemical, civil, and environmental engineering, among others.
