During the past decade, the media landscape and the coverage of sports events have changed fundamentally. Sports fans can consume the sports content of their choice, on the platform they prefer and at the time they want. Furthermore, thanks to electronic devices and Internet, content can now be created and distributed by every sports fan. As a result, it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant. Moreover, it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law. This book, illustrates that media law is still needed, even in an era of abundance, to guarantee public's access to live and full sports coverage. Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines, such as legal and public policy, political science, media and communications studies, journalism and European studies. Additionally it contains valuable information and points of view for policy makers, lawyers and international and intergovernmental organisations, active in media development. The book contains an up-to-date analysis and overview of the different competition authorities' decisions and media provisions dealing with the sale, acquisition and exploitation of sports broadcasting rights. Katrien Lefever is Senior Legal Researcher at IBBT - The Interdisciplinary Centre for Law and ICT (ICRI), KU Leuven, Belgium. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

History was made on November 22 2003 - England was crowned the World Champion. Everything was ready for rugby to explode in England, for the national team to kick-on, for the level of the domestic game to continue growing and for the sport to truly become prominent nationwide. It did not eventuate. England lost far too many matches and the Aviva Premiership does not match the French Top 14. The result for Rugby World Cup 2015 is a match schedule allocating more games to Wales than to the north of England. Understanding how this came about and also how and why Wales secured matches is an important part of the puzzle and carries substantial implications for future Rugby World Cups. Local and global issues including decision making, rival sports and nationalized players are all tackled in an analysis that seeks to offer realistic and viable solutions for the benefit of English and global rugby.

This book presents a proposal for a new soft computing innovative method called by "CFE" forevaluation of the football matches of FIFA(IFAB) and UEFA to compute the true 'Winner'. It is a research work in the area of 'Football Science', being proposed to FIFA (IFAB) and UEFA, Zurich, Switzerland for consideration to replace the existing obsolete and weak rules of football matches of 90 minutes to declare the final 'Winner'. In CFE, the final decision about any football match of 90 minutes is obtained "by computation", by execution of a software called by 'CFE-software' with the real time input values directly from the field on a number of highly significant parameters, some of them being continuous variables. The result of m-n goals at the end of 90 minutes play in a football match is just one of the many parameters for the computation of the 'Winner' in our proposed CFE method. The evaluation is mainly based upon the application of Fuzzy Logic, 'Fuzzy Pocket Machine', fast Computer Server, good Communication system from playing-field to the server (as used in Cricket matches) and the CFE-software at the server. The Referees need not be experts in fuzzy set theory; they can be easily trained within just 30 minutes of demonstration on : how to use the 'fuzzy pocket machine' for giving real time inputs to the database at the server.

"This book considers the nature and development of linkages between international football and politics between 1900 and 1939, and also provides a history of international football in Britain. It discusses Britain's influence over the development of football as a world game, British footballers as international stars, and the extra-sporting significance of fixtures such as England v. Germany (1935 and 1938). Finally, it illuminates the long-standing sporting debates as to whether professionals representing their country play for themselves rather than for their nation, whether international sport serves as a force for co-operation or conflict, and whether sporting performances affect a nation's prestige."--Jacket.

The World Cup is the biggest stage in international soccer, and the 2022 edition in Qatar will be no different. A total of 32 teams will compete for the title, with 64 matches taking place across eight stadiums in the country. The World Cup will be held in Qatar from November 21 to December 18, 2022. It will be the first World Cup held in the Middle East and the first World Cup held in an Islamic country. Qatar was selected as the host country by FIFA's Executive Committee on December 2, 2010. There is no denying that Qatar is a deserving host country. It has the financial resources to build the infrastructure needed to host a World Cup, and it has a proven track record of delivering large-scale events, such as the 2006 Asian Games and the 2009 Gulf Cup of Nations. There are many star players who will be looking to shine on the world stage in 2022. Lionel Messi, Cristiano Ronaldo, Neymar, Kylian Mbappe, and Sadio Mane are just some of the big names who will be hoping to lead their teams to glory. However, there will also be a number of young players who will be looking to make a name for themselves at the World Cup. Qatar will be hoping to make a good impression as hosts, but they will also be aware of the controversy surrounding their selection as hosts. Nonetheless, the World Cup is sure to be an event to remember. So mark your calendars and get ready for some world-class soccer action! Match -fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim is to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

Timed to coincide with the World Cup in Brazil and told in the style of a page-turning thriller, this is the book that will blow the lid off international match fixing in football: a pandemic that has struck at the heart of the 'beautiful game'

This is the first book to take a truly global look at facilities operations management in the sport industry. Sports facilities management is in the national news with reports from the BBC that three 2012 Olympic venues in London are being evaluated by accountants to see whether they will deliv-

er value for money. The current estimate of government spending on the games is £9.3billion. There is also an ongoing debate about the fate of the 80,000 seat stadium that is being constructed for the games at a cost of £500million. Sport facilities of all shapes and sizes are an ingrained part of global sport management culture. As such, it is inevitable that students who enter into the field of sport management will interact with the management and operations of a sport facility at some point during their career. This textbook provides the theoretical foundation for sport facility operations management, and is supplemented both in the text and in the companion site containing: schematics, planning documents, sample forms, and sample ownership/ management structures. In addition, each author will infuse research and experiences from sport facilities around the world (North America; Europe; Middle East/ Asia; Australia and New Zealand) to ensure that a global perspective is at the core of this book. This book is published with the sport management lecturer and student in mind.

The 2010 FIFA World Cup will be the 19th FIFA World Cup, the premier international football tournament. It is scheduled to take place between 11 June and 11 July 2010 in South Africa. The 2010 FIFA World Cup will be the culmination of a qualification process that began in August 2007 and involved 204 of the 208 FIFA national teams. As such, it matches the 2008 Summer Olympics as the sports event with the most competing nations (although four of the teams - England, Scotland, Wales and Northern Ireland - compete as one in the Olympics). This will be the first time that the tournament has been hosted by an African nation, after South Africa beat Morocco and Egypt in an all-African bidding process. Italy are the defending champions. The draw for the finals will take place on 4 December 2009 in Cape Town.

This edited volume considers the U.S.-Mexico soccer rivalry, which occurs against a complex geopolitical, social, and economic backdrop. Multidisciplinary contributions explore how a long and complicated history between these countries has produced a unique rivalry—one in which loyalties split friends and family; fan turnout in many regions of the U.S. favors Mexico; and games are imbued with both national pride and politics. The themes of nationhood, geography, citizenship, acculturation, identity, globalization, narrative and mythology reverberate throughout this book, especially with regard to how they shape place, identity, and culture.
