*Understanding Mathematics Anxiety: Investigating the ...
Mathematics Anxiety in Secondary School Students*

The purpose of this meta-analysis was to examine the relation between mathematics anxiety (MA) and mathematics performance among school-aged students, and to identify potential moderators and under...

Mathematics anxiety is a global phenomenon that has generated research interest over the past four decades. Many researchers have suggested that girls display higher levels of mathematics anxiety than boys. This article explores that conjecture in the New Zealand context. It reports on the prevalence of mathematics anxiety in adolescents and investigates the factors that influence students' mathematics anxiety in mathematics classrooms.

Maths anxiety can severely disrupt students' performance in the subject in both primary and secondary school. But importantly -- and surprisingly -- this new research suggests that the majority of...

'Maths anxiety' causing fear and despair in children as ...

We assessed math anxiety in 6th- through 12th-grade children (N = 564) as part of a comprehensive longitudinal investigation of children's beliefs, attitudes, and values concerning mathematics....

mathematics anxiety, thus supporting the research aim to diagnose our students' anxieties. Methodology This study examined the mathematics anxiety of students from a secondary school in Singapore, which offers all the three courses, the EXP stream (P-SLE aggregate of 202 - 227), the NA stream (174-194), and the NT stream (117-154). Samples

DISSERTATION THE RELATIONSHIP BETWEEN MATH ANXIETY AND ...

Mathematical anxiety affects all aspects of teaching and learning mathematics. This study aimed to compare mathematical anxiety levels and its impacts on performance between Malaysia and Tanzania secondary schools mathematics learners. The study was performed using correlation survey.

*The Relation Between Mathematics Anxiety and Mathematics ...
Origins and nature of 'math anxiety' -- ScienceDaily*

2 School of Psychology and Cognitive Science, East China Normal University, Shanghai, China Math anxiety (MA) has been suggested to decrease the math performance of students. However, it remains unclear what factors moderate this relationship. The aim of this research was to explore the link between MA and math performance.

Understanding Mathematics Anxiety: Investigating the experi-

ences of UK primary and secondary school students. <https://doi.org/10.17863/CAM.37744>. Abstract. The project investigated individuals' attitudes towards mathematics because of what could be referred to as a "mathematics crisis" in the UK. Evidence suggests that functional literacy skills amongst working-age adults are steadily increasing but the proportion of adults with functional maths skills equivalent to a GCSE grade C has ... Effects of Math Anxiety in Elementary and Secondary School Students. Math anxiety impacts students as early as the first grade by affecting their working memory. Working memory is like a 'mental scratchpad'. It is important when we need to keep track of numbers. But this working memory can be disrupted by math anxiety in both elementary and secondary school students.

MA is a debilitating emotional reaction to mathematics that is increasingly recognised in psychology and education. It has been defined as "a feeling of tension and anxiety that interferes with the manipulation of numbers and the solving of mathematical problems in ordinary life and academic situations".

Understanding Anxiety in Secondary School Students

School: exam stress, pressure, competitiveness, fitting in. One size doesn't fit all - we are all different, and everybody will experience anxiety in their own, unique way. And because no experience will be exactly the same, no cure will be the same either.

Third, most studies of math anxiety have been conducted with high school and college-age students, and thus little is known about its prevalence in younger populations. The few studies of math anxiety in younger students show that math anxiety scores, like test anxiety scores, increase across age (Brush, 1980; Meece, 1981).
